Luftwaffe Seaplanes 1939-1945:

Luftwaffe Seaplanes, 1939-1945 Chris Goss, Bernd Rauchbach, 2002 **Secret Projects of the Luftwaffe - Vol 1 - Jet Fighters 1939 -1945** Dan Sharp, 2020-09-22 Germany's air ministry was quick to grasp the potential of the jet engine as early as 1938 and by 1939 several German aircraft manufacturers were already working on fighter designs that would utilize this new form of propulsion. Rocket engines too were seen as the way of the future and companies were commissioned to design fighters around them. As the Second World War began the urgent need to bring these advanced new types into production saw a host of innovative aircraft designs being produced which would eventually result in Messerschmitt's Me 262 jet fighter and the Me 163 rocket propelled interceptor. And as the war progressed efforts were increasingly made to find better ways of utilizing jet rocket and latterly ramjet engines in fighter aircraft. Aviation companies from across Germany set their finest minds to the task and produced some of the most radical aircraft designs the world had ever seen. They proposed rotating wing ramjet fighters, arrowhead shaped rammers, rocket firing bat winged gun platforms, sleek speed machines, tailless flying wings, tiny mini fighters and a host of others ranging from deadly looking advanced fighters to downright dangerous vertical launch interceptors. **Secret Projects of the Luftwaffe Volume 1 Jet Fighters 1939-1945** by Dan Sharp based on original research using German wartime documents offers the most complete and authoritative account yet of these fascinating designs through previously unseen photographs, illustrations and period documentation from archives around the world.

The Luftwaffe and the War at Sea, 1939-1945 David C. Isby, 2005 The Luftwaffe and the War at Sea provides an unrivaled look at the struggle for control of the sea in the European theatre from the point of view of the German offices Kriegsmarine and Luftwaffe that fought it. The contributing authors were involved in all aspects of German attempts to control the seas from the use of Ju 87 Stuka dive bombers in the invasion of Norway to the missions of FW 200 Kondors in cooperation with the U boat campaign against Britain's Atlantic lifelines. These reports were either written as secret reports during the war for the benefit of the Oberkommando der Luftwaffe, the Air Force General Staff or were written immediately after the war when most of the German High Command were prisoners of war or working for the US military. While they lacked the full story of the Allied efforts against them, these reports had the immediacy of either being prepared in wartime or soon afterwards. The book also benefits from having been written specifically for an audience well versed in naval and aviation affairs. Luftwaffe generals or the US military. The detail contained is unique and allows the reader a fresh perspective on these famous campaigns.

The Battleship Scharnhorst Stefan Draminski, 2021-01-21 The Kriegsmarine's Scharnhorst was a German capital ship described either as a battleship or battlecruiser and the lead ship of her class which included one other ship, Gneisenau. She was launched on 3 October 1936 and completed in January 1939, armed with nine 28cm C 34 guns in three triple turrets. She operated with Gneisenau for much of the early portion of World War II, including sorties into the Atlantic to raid British merchant shipping. Norway during which they sank the aircraft carrier HMS Glorious and her escort destroyers Acasta and Ardent Scharnhorst also sank HMS Rawalpindi in November 1939 In early 1943 Scharnhorst joined the Tirpitz in Norway to intercept Allied convoys to the Soviet Union On a sortie from Norway to attack a convoy the German force was intercepted by British ships and during the Battle of the North Cape 26 December 1943 HMS Duke of York and her escorts sank Scharnhorst Most of her crew was lost This is the most comprehensive examination of Scharnhorst ever published drawing on new research and technology to tell the full story of the ship It includes a complete set of detailed line drawings with fully descriptive keys and full colour 3D artwork supported by technical details photographs and text on the building of the ship as well as a record of her service history *Liberty's War* Herman E. Melton, 2017-08-15 In the dark days of World War II merchant mariners made heroic contributions to the eventual Allied victory and suffered tremendous casualties in so doing Among these were the engineers who toiled deep in the bowels of the ship and suffered appalling casualties After the war engineering personnel were unlikely to talk about their experiences let alone write them down These modest and self effacing men were more comfortable in a world of turbines and pistons so they seldom brought their stories forward *Liberty's War* sets out to explore the experiences of one such engineer Herman Melton from his time as a cadet at the U S Merchant Marine Academy through his experiences at sea as a third assistant engineer Melton's story is representative of the thousands of Merchant Marine engineers who served on board Liberty ships during the war Like many young Americans he sought to do his part and in 1942 he obtained an appointment to the newly created U S Merchant Marine Academy at Kings Point New York After graduating from the academy in 1944 he shipped out to the Pacific Theatre surviving the sinking of his Liberty ship the SS Antoine Saugrain and its top secret cargo *Coastal Convoys 1939-1945* Nick Hewitt, 2009-04-20 Using official records from the National Archives personal accounts from the Imperial War Museum and other sources *Coastal Convoys 1939-1945* The Indestructible Highway describes Britains dependence on coastal shipping and the introduction of the convoy system in coastal waters at the outset of the war It brings to life the hazards of the German mining offensive of 1939 the desperate battles fought in coastal waters during 1940 and 1941 and the long struggle against German air and naval forces which lasted to the end of the Second World War Reference is also made to the important role played by coasters during the Dunkirk evacuation in 1940 and the Normandy landings in 1944 **Royal Air Force, 1939-1945: The fight avails, by D. Richards and H. St. G. Saunders** Denis Richards, 1953 *The Naval War in the Baltic, 1939-1945* Poul Grooss, 2017-04-30 A military historian and naval warfare expert delivers a revealing history of the Baltic Sea Campaigns and their significance throughout WWII From the Battle of Westerplatte on the Polish coast in 1939 to the thousands of German refugees lost at sea in 1945 the Baltic witnessed continuous fighting throughout the Second World War This chronicle of naval warfare in the region merges such major events as the Siege of Leningrad the Soviet campaign against Sweden the three wars in Finland the Soviet liberation of the Baltic states the German evacuation of two million people from the East and the Soviet race

Fighter Operations in Europe and North Africa, 1939-1945 David Wragg, 2012-02-29 Fighter Operations in Europe and North Africa 1939 1945 tells the story of Allied and German fighter pilots in Europe over the Mediterranean and in North Africa during the Second World War The book starts with the early skirmishes as each side tested the others defenses moves through the Battle of Britain and then the Blitz when the emphasis switched from single engined day fighters to twin engined night fighters while increasingly fighters were used to sweep over enemy air fields and lines of communication in occupied France This overlapped with the need to provide air cover for the besieged island fortress of Malta by day and by night as well as defensive operations against Axis forces in Crete and North Africa but as the balance of power changed in North Africa the Desert Air Force was formed incorporating elements from many Allied air forces and the emphasis moved to offensive operations in support of ground forces The invasions of Italy and the South of France also called for fighter cover initially by carrier based aircraft The lessons learnt in North Africa were put to good use by the 2nd Allied Tactical Air Force which accompanied the advancing allied armies towards and eventually into Germany achieving all important air supremacy which was a major factor in the Allied victory The book also covers Luftwaffe fighter pilots as they sought to stop the RAF by night and the USAAF by day against increasingly overwhelming odds
