Discover neglected wild food source that can also be used as medicine The long standing notion of food as medicine medicine as food can be traced back to Hippocrates Eating and Healing Traditional Food As Medicine is a global overview of wild and semi domesticated foods and their use as medicine in traditional s *Legacies of Departed African Women Writers* Helen O. Chukwuma, Chioma Carol Opara,2022-08-29 Legacies of Departed African Women Writers Matrix of Creativity and Power proffers varied perspectives of the invaluable contributions of ten deceased African writers from all across Africa who have cleared the path to a vibrant African feminist arena The dynamics of change gleaned from both their textual and contextual concerns unarguably set the pace for contemporary African women writers who have striven to follow in the footsteps of their literary mothers as well as their oral foremothers This book edited by Helen Chukwuma and Chioma Carol Opara shows the collective testament of ample creativity and power generated by these departed heroes Flora Nwapa Mariama Ba Grace Ogot Zulu Sofola Bessie Head Buchi Emecheta Nawal El Saadawi Assia Djebar Yvonne Vera and Nadine

Gordimer These chapters revolve around the positive impact of the celebrated writers on creative writing theoretical formulations and socio cultural change The contributors argue that these corpuses of works have illuminated creativity rooted in power vision and freedom

Ethnoecology Virginia D. Nazarea,1999-01-01 The re emerging field of ethnoecology offers a promising way to document and analyze human environment interactions Case studies by international experts explore the varied views of scholars on the human dimension of conservation and the different views of local peoples regarding their own environments Filled with peoples voices from North and South America Africa and Asia these cases cover a range of issues natural resource conservation and sustainable development the relationship between local knowledge and biodiversity the role of the commons in development and the importance of diversity and equity in environmental management Ethnoecology Situated Knowledge Located Lives is intended for a wide range of specialists not only in social and natural sciences but also in agricultural studies It conveys the overriding importance of this powerful methodological approach in providing insiders perspectives on their environments and how they manage them

The Land Is Dying Paul Wenzel Geissler,Ruth Jane Prince,2010-06-01 Based on several years of ethnographic fieldwork the book explores life in and around a Luo speaking village in western Kenya during a time of death The epidemic of HIV AIDS affects every aspect of sociality and pervades villagers debates about the past the future and the ethics of everyday life Central to such debates is a discussion of touch in the broad sense of concrete material contact between persons In mundane practices and in ritual acts touch is considered to be key to the creation of bodily life as well as social continuity Underlying the significance of material contact is its connection with growth of persons and groups animals plants and the land and the forward movement of life more generally Under the pressure of illness and death economic hardship and land scarcity as well as bitter struggles about the relevance and application of Christianity and Luo tradition in daily life people find it difficult to agree about the role of touch in engendering growth or indeed about the aims of growth itself

The Gospel Sounds Like the Witch's Spell Kiyoshi Umeya,2022-02-10 The Gospel Sounds Like the Witch s Spell is a highly detailed ethnography about how the Jopadhola in eastern Uganda talk about interpret and cope with death illness and other misfortunes The book presents a provocative discussion that critiques the idea of the revival of witchcraft in the neo liberalised contemporary world as represented by the modernity model of witchcraft and attempts to formulate a spiderweb model that connects witchcraft to contemporary society in a more complex manner The book is a unique ethnography of the collective memory of indigenous knowledge and local historicity The author moves the reader from curse to misfortune to fortune as he plots the notion of curse as deeply embedded in the Adhola way of life He weaves between culture religion state and modernity with lived experience Did the concept of witchcraft unwittingly endear the Adhola to the Christian way of life because of the presence of the notion of curse in the Bible or make them less susceptible to the vagaries of modernity compared to their neighbours These are some of the questions that the author puts on the table in a deeply reflective manner The phenomenon of witchcraft is given an intriguing

angle that invites the reader to reexamine earlier anthropological writings on the subject among African peoples

Phytochemistry and Pharmacology of Medicinal Plants, 2-volume set T. Pullaiah, 2023-08-07 This 2 volume book set Phytochemistry and Pharmacology of Medicinal Plants introduces and provides extensive coverage of 79 important medicinal plant species Each chapter written by noted experts in the field focuses on one important medicinal plant giving a brief introduction about the species and then delving into the plant's bioactive phytochemicals along with its chemical structures and pharmacological activities A wide array of biological activities and potential health benefits of the medicinal plant which includes antiviral antimicrobial antioxidant anti cancer anti inflammatory and antidiabetic properties as well as protective effects on liver kidney heart and nervous system are given An extensive collection of research literature on pharmacological activities on that species is reviewed This volume published under the AAP Focus on Medicinal Plants book series edited by the accomplished editor T Pullaiah who has taught researched written and published on medicinal plants for over 35 years will be an important reference resource for years to come for both new and experienced medicinal researchers Medicinal Plants of East Africa J. O. Kokwaro, 2009 Medicinal Plants of East Africa is a revised edition of the book first published in 1976 on herbal remedies and the traditional medical practice of East Africa The book covers the rich diversity of plants found in Kenya Tanzania and Uganda from sea to alpine plants East Africa also has a rich ethnic diversity and a large number of herbalists whose traditional knowledge and practices are also covered in the book Over 1500 species are described and for the first time over 200 of these herbs have been illustrated Also included are maps detailing where the herbs were collected and an ethnographic map detailing the tribes of each herbalist whose knowledge is contained in the book John Kokwaro is an Eminent Professor of Botany and a research specialist on herbal remedies at the University of Nairobi Flowering Plant Families of East Africa J. O. Kokwaro, 1994 **Eating on the Wild Side** Nina L. Etkin, 2000-11-01 People have long used wild plants as food and medicine and for a myriad of other important cultural applications While these plants and the foraging activities associated with them have been dismissed by some observers as secondary or supplementary or even backward their contributions to human survival and well being are more significant than is often realized **Eating on the Wild Side** spans the history of human plant interactions to examine how wild plants are used to meet medicinal nutritional and other human needs Drawing on nonhuman primate studies evidence from prehistoric human populations and field research among contemporary peoples practicing a range of subsistence strategies the book focuses on the processes and human ecological implications of gathering semidomestication and cultivation of plants that are unfamiliar to most of us Contributions by distinguished cultural and biological anthropologists paleobotanists primatologists and ethnobiologists explore a number of issues such as the consumption of unpalatable and famine foods the comparative assessment of aboriginal diets with those of colonists and later arrivals and the apparent self treatment by sick chimpanzees with leaves shown to be pharmacologically active Collectively these articles offer a theoretical framework emphasizing the cultural

evolutionary processes that transform plants from wild to domesticated with many steps in between while placing wild plant use within current discussions surrounding biodiversity and its conservation Eating on the Wild Side makes an important contribution to our understanding of the links between biology and culture describing the interface between diet medicine and natural products By showing how various societies have successfully utilized wild plants it underscores the growing concern for preserving genetic diversity as it reveals a fascinating chapter in the human ecology
