Lymphokines A Forum For Immunoregulatory Cell Products V 8:

Lymphokines Edgar Pick, 2014-06-05 Lymphokines A Forum for Immunoregulatory Cell Products deals with immunoregulatory cell products that produce lymphokines Topics covered include the purification and characterization of transfer factor activation of cytotoxicity and or suppressor activity in murine macrophages by lymphokines lipopolysaccharide and polyinosinic polycytidylic acid and the role of clotting processes in the action of lymphokines on macrophages A comparison of the immune modulating effects of interferon and interferon inducers is also presented Comprised of 13 chapters this volume begins with a discussion on transfer factor and its ability to react specifically with antigens The clinical uses of transfer factor are considered with special emphasis on its value as a prophylactic agent The reader is then introduced to the subject of T cell regulation of the immunoglobulin E IgE response via potentiating and suppressor lymphokines together with the possible clinical application of IgE suppressive factors in the treatment of atopic diseases Subsequent chapters examine the evidence in favor of the existence of T cell derived polyclonal B cell activator PBA playing a role in both normal antibody responses and autoimmune diseases the role of suppressor T cells and the associated lymphokines in contact sensitivity in mice and lymphokine action on macrophages The book also analyzes the genetics of the response of human and mouse cells to interferons This monograph will be helpful to practitioners and researchers in the fields of microbiology and immunology

Mononuclear Phagocytes R. van Furth, 2012-12-06 Sixteen years have passed since the first Leiden Conference on Mononuclear Phagocytes That first meeting led to new nomenclature i e the Mononuclear Phagocytes System MPS which was published in the Bulletin of the World Health Organization R van Furth et al Bull WHO 1972 46 845 852 The paradigm of the MPS has the advantage of being much more consistent than the Reticuloendothelial System RES L Aschoff Ergebn Inn Med Kinderheilk 1974 26 1 because cells with similar characteristics can be classified in the same category The essence of a new concept is according to Popper that it must be susceptible to falsification This has been attempted several times for the MPS by those who adhere to the RES However in biology no one can be certain of truth Any theory must be based on experimental observations and or theoretical considerations and both should be presented in such a way that others can try to refute it then or later One may have a theoretical or a pragmatic preference for a theory which at a given time is regarded as possibly true but later it may be shown to be false In other words what we present in this volume is regarded as true at this moment but others may consider it as not true and try to disprove it Controversies often stimulate new research
