Zaloga, 2012-08-20 From the moment that the M4 Sherman had been matched against German Panther and Tiger tanks the American tank crews had known that their vehicles were outclassed by the opposition What was needed was a more powerful tank more heavily armed and armored that could take on the powerful German panzers on a more equal footing Although it took time to develop by the latter months of the war numbers of M26 Pershing tanks were reaching the frontline US armored units Well armored and with a powerful 90mm gun the Pershing was a match for any tank in the German order of battle

The M26 Pershing Robert P. Hanger,2018 The M26 tank nicknamed the General Pershing was the final result of the Ordnance Department s revolutionary T20 series It was the only American heavy tank to be fielded during the Second World War Less is known about this tank mainly because it entered the war too late and in too few numbers to impact events However it proved a sufficient design capable of going toe to toe with vaunted German armor After the war American tank development slowed and was reduced mostly to modernization of the M26 and component development The Korean war created a sudden need for armor and provided the impetus for further development M26s were rushed to the conflict and demonstrated to be decisive against North Korean armor Nonetheless the principle role the tank fulfilled was infantry support In 1951 the M26 was replaced by

its improved derivative the M46 Its final legacy was that of being the foundation of America s Cold War tank fleet
