Apap,2002-09-25 6 Spain Irish Political Prisoners 1848-1922 Professor Sean Mcconville,2005-08-19 This is the most wide ranging study ever published of political violence and the punishment of Irish political offenders from 1848 to the founding of the Irish Free State in 1922 Those who chose violence to advance their Irish nationalist beliefs ranged from gentlemen revolutionaries to those who openly embraced terrorism or even full scale guerilla war Se n McConville provides a comprehensive survey of Irish revolutionary struggle matching chapters on punishment of offenders with descriptions and analysis of their campaigns Government s response to political violence was determined by a number of factors including not only the nature of the offences but also interest and support from the United States and Australia as well as current objectives of Irish policy **Turning to Political Violence** Marc Sageman,2017-05-05 What motivates those who commit

violence in the name of political beliefs Terrorism today is not solely the preserve of Islam nor is it a new phenomenon It emerges from social processes and conditions common to societies throughout modern history and the story of its origins spans centuries encompassing numerous radical and revolutionary movements Marc Sageman is a forensic psychiatrist and government counterterrorism consultant whose bestselling books Understanding Terror Networks and Leaderless Jihad provide a detailed damning corrective to commonplace yet simplistic notions of Islamist terrorism In a comprehensive new book Turning to Political Violence Sageman examines the history and theory of political violence in the West He excavates primary sources surrounding key instances of modern political violence looking for patterns across a range of case studies spanning the French Revolution through late nineteenth and early twentieth century revolutionaries and anarchists in Russia and the United States to the assassination of Archduke Ferdinand and the start of World War I In contrast to one dimensional portraits of terrorist monsters offered by governments and media throughout history these accounts offer complex and

intricate portraits of individuals engaged in struggles with identity injustice and revenge who may be empowered by a sense of love and self sacrifice Arguing against easy assumptions that attribute terrorism to extremist ideology and counter to mainstream academic explanations such as rational choice theory Sageman develops a theoretical model based on the concept of social identity His analysis focuses on the complex dynamic between the state and disaffected citizens that leads some to disillusionment and moral outrage and a few to mass murder Sageman's account offers a paradigm shifting perspective on terrorism that yields counterintuitive implications for the ways liberal democracies can and should confront political violence

Judgments of Love in Criminal Justice Farhad Malekian, 2017-03-31 This volume is a new chapter in the future history of law Its general perspective could not be more original and its critical ethical edge on the state of international law could not be timelier It explores a compassionate philosophical approach to the genuine substance of law criminal procedure international criminal law and international criminal justice It divides law into three interrelated disciplines i e legality morality and love The norm love is derived from human reason for man's advancement and the securing of natural law It is more than a mere mandatory norm Its goal is to generate a normative and positive powerful result therefore avoiding any impurity that may exist in the application of other norms because of political or juridical pressures a one eyed justice The norm love also renders justice with the principles of legal accountability transparency and the high moral authentic values of humanity The notion of justice cannot be trusted in the absence of the norm love The volume indicates the conditions of its efficiency by proving the reasons for its existence in the context of fairness objectivity and concern for all individuals and entities The concept of the norm love should be the core academic corpus for lecturing law in all faculties of law It is simply the enlightenment of the 21st century A lawyer with requisite knowledge and skill is not a lawyer if he cannot understand that the law does not need a lawyer with ethical competence in its provisions for income purposes but one with knowledge of its essence for the advanced morality of justice and the sheer essence of love for justice

Britannia's Embrace Caroline Shaw, 2015 *Britannia's Embrace* revises current understandings about the origins of refugee which have focused exclusively on the period post 1914. It argues that the responsibility to protect persecuted foreigners developed in nineteenth century Britain through a popular movement that equated refugee relief with what it meant to be liberal on a global stage.

Russian Notions of Power and State in a European Perspective, 1462-1725 Endre Sashalmi, 2022-10-25 Winner of the 2023 Marc Raeff Book Prize, A 2023 REFORC Book Award Longlist Title. This book highlights the main features and trends of Russian political thought in an era when sovereignty, state and politics as understood in Western Christendom were non-existent in Russia or were only beginning to be articulated. It concentrates on enigmatic authors and sources that shaped official perception of rulership or marked certain changes of importance of this perception. Special emphasis is given to those written and visual sources that point towards depersonalization and secularization of rulership in Russia. A comparison with Western Christendom frames the argument throughout the book both in terms of ideas and the practical aspects of state building, allowing the reader to ponder Russia's *differentia specifica*.

Terrorism and Modern Literature Alex Houen, 2002-09-12 Is terrorism's violence essentially symbolic? Does it impact on culture primarily through the media? What kinds of performative effect do the various discourses surrounding terrorism have? Such questions have not only become increasingly important in terrorism studies, they have also been

concerns for many literary writers This book is the first extensive study of modern literature's engagement with terrorism Ranging from the 1880s to the 1980s the terrorism examined is as diverse as the literary writings on it chapters include discussions of Joseph Conrad's novels on Anarchism and Russian Nihilism Wyndham Lewis's avant garde responses to Syndicalism and the militant Suffragettes Ezra Pound's poetic entanglement with Segregationist violence Walter Abish's fictions about West German urban guerrillas and Seamus Heaney's and Ciaran Carson's poems on the Troubles in Northern Ireland In each instance Alex Houen explores how the literary writer figures clashes or collusions between terrorist violence and discursive performativity What is revealed is that writing on terrorism has frequently involved refiguring the force of literature itself In terrorism studies the cultural impact of terrorism has often been accounted for with rigid structural theories of its discursive roots But what about the performative effects of violence on discourse Addressing the issue of this mutual contagion *Terrorism and Modern Literature* shows that the mediation and effects of terrorism have been historically variable Referring to a variety of sources in addition to the literature newspaper and journal articles legislation letters manifestos the book shows how terrorism and the literature on it have been embroiled in wider cultural fields The result is not just a timely intervention in debates about terrorism's performativity Drawing on literary critical theory and philosophy it is also a major contribution to debates about the historical and political dimensions of modernist and postmodernist literary practices

Radical Spaces Christina Parolin, 2010-12-01 *RADICAL SPACES* explores the rise of popular radicalism in London between 1790 and 1845 through key sites of radical assembly the prison the tavern and the radical theatre Access to spaces in which to meet agitate and debate provided those excluded from the formal arenas of the political nation the great majority of the population a crucial voice in the public sphere *RADICAL SPACES* utilises both textual and visual public records private correspondence and the secret service reports from the files of the Home Office to shed new light on the rise of plebeian radicalism in the metropolis It brings the gendered nature of such sites to the fore finding women where none were thought to gather and reveals that despite the diversity in these spaces there existed a dynamic and symbiotic relationship between radical culture and the sites in which it operated These venues were both shaped by and helped to shape the political identity of a generation of radical men and women who envisioned a new social and political order for Britain

The War On Labor And The Left Patricia Cayo Sexton, 2018-02-05 In all countries labour has war stories to tell but none are so violent as those of American labour Since the 1870s at least 700 workers have been killed and thousands seriously injured in labour disputes Nowhere but in this country have employers so actively fought back against strikes through the use of scabs surveillance and mercenary armies Although much of the violence occurred decades ago author Patricia Sexton contends that this rich history sheds light on questions that still plague observers of the American political system Why has the United States been more conservative in its domestic policies than other Western democracies Why is it almost alone among them in lacking a mass labour or democratic socialist party or the kind of social policies favoured by

such parties And why has American labour unionism been in serious decline in recent decades The most familiar answers to these questions involve consensus explanations of what has come to be known as American exceptionalism America is conservative observers say because its citizens have loved capitalism and supported its political policies wholeheartedly or because the nation's open frontier and early voting rights reduced dissent and class consciousness Other explanations focus on various internal constraints said to be unique to the American working class or its organizations such as conflict among diverse immigrants the sectarianism and blunders of leftist groups and the conservatism or incompetence of labour union leadership All of these are said to have prevented labour from carrying out successful conflicts with employers and economic leaders According to Sexton these arguments ignore the remarkable record in American history of labour left struggles the violent suppression of industrial unionism prior to the 1930s legal and forceful repression of trade unionism and destruction by various means of left leaning unions and political organizations Her book explores instead a neglected explanation of American conservatism that of a literal war on labour waged by unusually powerful economic entities using repressive strategies often backed by police and sometimes by federal forces The details of this violent history familiar to labour historians are recounted here in a new perspective emphasizing the impact on workers of conflict sustained over many years But the book is much more than a reinterpretation of this history Patricia Sexton shows how the use of power and repression has played out as well in our institutions of law and government in economic policies and in the media Making these links and showing how America's conservatism is unique among other Western democracies is the contribution of this ambitious book For only by coming to terms with this history of repression and its legacy can we fully understand America's conservatism today
