It critically examines the current healthcare landscape highlighting persistent issues such as undernutrition, demographic transitions, and pandemic vulnerabilities. The book emphasises the importance of strengthening public healthcare systems, investing in human resources, and adopting a community-centred approach to health policy. It discusses the need for decentralised community action, substantial public investment in healthcare infrastructure, addressing urban health challenges, and developing a more inclusive and accessible healthcare model. Drawing on microstudies from across different states, the volume offers evidence-based recommendations for policymakers to transform India's healthcare ecosystem and make quality healthcare a reality for all. Its multidisciplinary approach spanning healthcare policy, economics, and social development ensures relevance across diverse professional domains while maintaining a clear focus on healthcare improvement in India. Populations Shahid Ali, Karl Atkin, 2004 This is a book that challenges any existing complacency about the quality of healthcare offered to South Asian populations. It is written for a broad audience who have an interest or direct involvement in this important subject area and in my opinion will appeal to leaders, clinicians, nursing staff, managers, and the wider primary care community. Research, analysis, and commentary are essential, but if South Asian people are to benefit from better services and improved care, then research in particular must be integrated with dissemination and development. This book engaged me, which is a hallmark of a good read. I most certainly recommend it as I am sure it will engage you too. Inequity and inequality must be rigorously challenged and addressed. All members of the primary care team, including doctors and nurses, policy makers and shapers, and healthcare academics and researchers will find this book essential reading **Evaluation of**
