Scientists and researchers concerned with the behavior of large ecosystems have focused in recent years on the concept of resilience Traditional perspectives held that ecological systems exist close to a steady state and resilience is the ability of the system to return rapidly to that state following perturbation However beginning with the work of C S Holling in the early 1970s researchers began to look at conditions far from the steady state where instabilities can cause a system to shift into an entirely different regime of behavior and where resilience is measured by the magnitude of disturbance that can be absorbed before the system is restructured Resilience and the Behavior of Large Scale Systems examines theories of resilience and change offering readers a thorough understanding of how the properties of ecological resilience and human adaptability interact in complex regional scale systems The book addresses the theoretical concepts of resilience and stability in large scale ecosystems as well as the empirical application of those concepts in a diverse set of cases In addition it discusses the practical implications of the new theoretical approaches and their role in the sustainability of human modified ecosystems The book begins with a review of key properties of complex adaptive systems that contribute to overall resilience including multiple equilibria complexity self organization at multiple scales and order it also presents a set of mathematical metaphors to describe and deepen the reader s understanding of the ideas being discussed Following the introduction are case studies that explore the biophysical dimensions of resilience in both terrestrial and aquatic systems and evaluate the propositions presented in the introductory chapters The book concludes with a synthesis section that revisits propositions in light of the case studies while an appendix presents a detailed account of the relationship between return times for a disturbed system and its resilienc In addition to the editors contributors include Stephen R Carpenter Carl Folke C S Holling Bengt Owe Jansson Donald Ludwig Ariel Lugo Tim R McClanahan Garry D Peterson and Brian H Walker **The Federal Cases** ,1895
