Raid On The Breme:

The War at Sea, 1939-1945 Stephen Wentworth Roskill, 1961 **Daring Raids of World War Two** Peter Jacobs, 2015-06-30 The Second World War saw a host of heroic raids enacted across the various theatres all delivered valiantly in a variety of ways by British combatants on land by sea and from the air Daring exploits such as the raid on Rommel the endeavours of the Cockleshell Heroes and the Dam Busters have become legendary in the annals of warfare All feature here alongside details of fascinating lesser known operations It goes without saying that not all the raids were a success in fact some went disastrously wrong but the men who carried them out did so with extreme courage and in the knowledge that they might not return Here Peter Jacobs tells the gripping stories of some of the most heroic raids of the entire conflict These include the disastrous landings at Dieppe the amphibious assault on the dry dock at St Nazaire more Victoria Crosses were won during this raid than in any other operation of the war the airborne assaults on the German radar installation at Bruneval and later on Pegasus Bridge as a prelude to D Day and the low level raid by RAF Mosquitos on the prison at Amiens to release members of the French Resistance This is an intriguing and insightful historical record of thirty of the most daring and strategic raids of military history and is sure to appeal to all enthusiasts of the genre **Destined to Live** Kristin Gilpatrick, 2001 Bodies and Ruins David F. Crew, 2017-05-19 *Bodies and Ruins* explores changing German memories of World War II as it analyzes the construction of narratives in the postwar period including the depiction of the bombing of individual German cities The book offers a corrective notion rising in the late 1990s notion that discussions of the Allied bombing were long overdue because Germans who had endured the bombings had largely been condemned to silence after 1945 David Crew shows that far from being marginalized in postwar historical consciousness the bombing war was in fact a central strand of German memory and identity Local narratives of the bombing war including photographic books had already established themselves as important vectors of memory in the late 1940s and early 1950s The bombing war had allowed Germans to see themselves as victims at a time when the Allied liberation of the concentration camps and the Nuremberg trials presented Germans to the world as perpetrators or at least as accomplices The bombing war continued to serve this function even as Germans became more and more willing directly to confront the genocide of European Jews which by the 1960s was beginning to be referred to as the Holocaust *Bodies and Ruins* examines a range of local publications that carried photographic images of German cities destroyed in the air war images that soon entered the visual memory of World War II Despite its obvious importance historians have paid very little attention to the visual representation of the bombing war This book follows the search for what were considered to be the right stories and the right pictures of the bombing war in local publications and picture books from 1945 to the present and is intended for historians as well as general readers interested in World War II the Allied bombing of German cities the Holocaust the history of memory and photographic visual history *The Heavy Bomber Offensive of WWII* Martin W. Bowman, 2015-05-31 This book contains fourteen stirring

accounts each conveying an authentic sense of what it was really like to fly as a member of air crew during the various bombing operations of the Second World War The storytellers are an eclectic mix of pilots navigators bomb aimers wireless operators and gunners who flew on operations in heavy bombers It conveys the terror of being coned by German searchlights over the target attacks by Luftwaffe night fighters often catastrophic damage to aircraft and the ensuing struggle to keep the machine airborne on the return trip to base It tells of the comradeship between the crew and the humour between them often borne of fear The gentle and unassuming narratives include Millennium One of Our Aircraft Is Missing Bomber s Moon Bombing Berlin The Ordeal Of Pilot Officer Romans DFC Last Man Out operations on Whitleys and Halifaxes Flying Officer X Stirlings Rescue At Sea The Incendiary Load s Alight The Night Of The Bombs and The Kassel Raids of 1943 as well as BBC Broadcasts and stories by Allied war correspondents Each of these accounts conveys the sense of purpose that these men felt in doing one of the most dangerous jobs of the war It is a fitting tribute to those that survived and the many thousands who died in the struggle against Hitler s dreadful ambitions in Europe

The Bomber Command War Diaries Martin Middlebrook, Chris Everitt, 2014-04-02 The essential WWII historical reference detailing RAF Bomber Command s extensive campaign of strategic bombings across occupied Europe The Royal Air Force Bomber Command s strategic bombing campaign started on the first day of the Second World War and ended five and a half years later with the final victory in Europe It was a campaign of such enormous scale that historians have only recently begun to piece together the finer details of the individual raids Aviation historian Martin Middlebrook and his research colleague Chris Everitt were the first to compile a complete review of all the raids and their background stories The Bomber Command War Diaries not only documents every Bomber Command operation but also details their effects on the ground drawing on local archives from Germany Italy and the occupied countries It is a groundbreaking work on historical research bringing together the two sides of Bomber Command s war This edition includes retrospective observations and a new appendix

RAF Bomber Command at War, 1939-1945 Craig Armstrong, 2021-04-28 The Royal Air Force had placed a great deal of faith in its force of bombers Bomber Command in the event of a future war The belief in the ability of formations of bombers flying in daylight and unescorted protecting themselves from enemy fighter attack informed early tactics but led to bloody losses Hampered by government restrictions on targets by late 1941 Bomber Command was in crisis As a result and coupled the growing dire war situation a new and forceful commander Sir Arthur Harris was appointed and new strategies allowed Bomber Command to broaden its attacks despite some opposition The result was the area bombing strategy which focussed attacks upon enemy held towns and cities This Main Offensive period lasted throughout 1943 1944 and saw both victories and defeats It was also the period that saw a limited number of precision attacks on Augsburg Peenemunde and most famously the Ruhr dams Bomber Command also aided in tactical and strategic support for the invasion of Europe and the subsequent fight to push inland New technological developments allowed Bomber Command to hit V Weapons sites and to focus more on precision

bombing but Harris remained determined to hit German towns and cities whenever possible while the Command's growing power allowed it to rain devastation upon its targets culminating at Dresden. Much has been written about Bomber Command but this book focusses largely on those who took part in the raids and on public attitudes towards the campaign in Britain. Using accounts from national and local archives, newspapers and existing historiography, the book seeks to shed light on untold stories from Bomber Command's war.

Flight Surgeon Thurman Shuller, 2021-07-07 Colonel Thurman Shuller's war diary traces his story from Las Vegas Army Airfield in the summer of 1941 to the desperate days of the air war in Europe. The group surgeon character in the motion picture *Twelve O'Clock High* was based on Shuller during his time as Group Surgeon of the famed 306th Bomb Group at Thurleigh, England, where he struggled with finding medical solutions for high altitude frostbite, oxygen deprivation, combat fatigue, and a growing crisis of hopelessness among the air crews. Shuller campaigned for setting the maximum number of missions for air crews to fly in a combat tour and argued for the elimination of Maximum Effort missions that forced them back to base from furloughs and passes. Shuller's diary brings his wartime experience back to life. His descriptions of the journey across the North Atlantic in the nose of a B-17 Flying Fortress are vivid and personal. His accounts about life among the British during the war bring a fresh look at the air war as it emerged from the pleasant meadowlands of East Anglia. Royalties for the book are being donated to the National Museum of the Mighty Eighth Air Force.

How Strategic Airpower has Changed the World Order Nigel David MacCartan-Ward, Anthony Wells, 2024-06-30 This work demonstrates how maritime deterrence strategy in a challenging world is critically underpinned by strategic air power at sea and on land. In this book, the history and utility of land and carrier-based strategic airpower is brought to life by the gallant exploits and photographs of B-17 aircraft Quittin Time and of its Navigator Fred Julian in the Second World War and by the unforgiving and unswerving dedication of Sharkey Ward and his Sea Harrier team in the Falklands war. The overarching message is that the strategic airpower lessons of the past eight decades underpin the urgent need for the UK government to invest more wisely in its Fleet so that the latter may work effectively in conjunction with the US Navy on the global mission to deter those that would harm us and to maintain the freedom of passage of all shipping throughout the global commons. The authors show how a maritime deterrence strategy in a challenging world is critically underpinned by strategic air power at sea and on land.

The RAF's Youngest Bomber Pilot of WW2 Graham Waterton, 2024-08-30 Having left his grammar school just before his 16th birthday, Brian Slade falsified his age to pursue his dream of becoming a pilot. Within a few days of his 17th birthday, he was awarded his wings. It was the start of this teenager's remarkable wartime career. Soon after being awarded his pilot's brevet, Brian was posted to his first squadron. Flying the venerable Vickers Wellington, he found himself experimenting with early target marking techniques. It

was also there that Brian gained the nickname The Boy Slade Though Brian s journey through the wartime RAF mirrored the experiences of tens of thousands of young men what was different if not unique was the fact before he had turned 18 which was the minimum age to begin aircrew training Brian had already completed thirty four operations more than was needed for a tour This tally included the three 1 000 bomber raids against Cologne Essen and Bremen He was awarded a Distinguished Flying Cross for nursing his badly damaged Wellington which sustained flak and night fighter damage home after a raid on Bremen Undaunted Brian soon after volunteered for his second tour of operations It was at this stage that he joined the Lancaster equipped 83 Squadron in the newly formed 8 Group becoming an experienced Pathfinder skipper It was a role in which he marked targets in the Battle of the Ruhr the bombing of Hamburg Operation Gomorrah and the Peenemunde raid The RAF s Youngest Bomber Pilot of WW2 told by his nephew a former officer in the British Army details all of Brian s fifty nine missions and captures his compelling progress with Bomber Command alongside the technological advances in aircraft pathfinder strategy and tactics Sadly Brian s Lancaster was shot down over Berlin in August 1943 The details of its loss remained shrouded in mystery until the puzzle of his aircraft s demise was eventually solved by tracing the family of the only survivor The relentless dangers not just in operations but also in training and the continuous loss of life are drawn into sharp focus But on account of his age Brian s story is unique There may have never been nor will ever be an RAF pilot of 19 years old with his flying and operational experience Complemented with a collection of previously unpublished photographs The RAF s Youngest Bomber Pilot of WW2 is one of the Second World War s most amazing tales **Flying Among Heroes**

Norman Franks, Simon Muggleton, 2012-05-01 Following the extraordinary career of a Second World War bomber pilot Flying Among Heroes brings together adventure and human daring with the harsh realities of being a member of the wartime Royal Air Force Tom Cooke like hundreds of other young men in 1939 joined up to the RAF just a few days before war began aged 18 being selected for pilot training Just five years later he had flown fifty one operations taken part in the Berlin bombings and three 1 000 bomber raids and had even taken part in special operations in conjunction with the SOE Not only did Cooke volunteer for an optional second and third tour of operations but he was also shot down over France on his thirteenth special operation survived the bale out with his crew and evaded capture Helped by the French Resistance he managed to make his way into Spain and was taken back to England from Gibraltar Unsurprisingly considering Cooke s outstanding bravery and patriotism he was decorated multiple times in his career Franks and Muggleton make use of primary documentation including Cooke s own words and contemporary images to put together a poignant story of wartime duty In an effort to portray the situation for many young men like Cooke much information is included on other squadrons and operations as well as on Bomber Command itself In all 55 000 men of Bomber Command gave their lives to the cause of the Second World War this is the tale of just one of those remarkable young men who survived the hardships of war returning victorious to a nation of heroes *Great Eastern Railway Magazine* London and North Eastern Railway, 1915 *The Last Century of Sea Power,*

Volume 2 H. P. Willmott, 2010-03-22 An important contribution a thoughtful account of the years preceding the Second World War and at much greater length of the war itself History In this second volume of his history of naval power in the 20th century H P Willmott follows the fortunes of the established seafaring nations of Europe along with two upstarts the United States and Japan Emerging from World War I in command of the seas Great Britain saw its supremacy weakened through neglect and in the face of more committed rivals Britain's grand Coronation Review of 1937 marked the apotheosis of a sea power slipping into decline Meanwhile Britain's rivals and soon to be enemies were embarking on significant naval building programs that would soon change the nature of war at sea in ways that neither they nor their rivals anticipated By the end of a new world war the United States had taken command of two oceans having placed its industrial might behind technologies that further defined the arena of naval power above and below the waves where stealth and the ability to strike at great distance would soon rewrite the rules of war and of peace This splendid volume further enhances Willmott's stature as the dean of naval historians Praise for The Last Century of Sea Power series The author dean of naval historians provides a sweeping look at and analysis of the transformation of naval power Willmott is fearless in his judgments Seapower H P Willmott is the finest naval historian and among the finest historians of any discipline writing today Bernard D Cole author of The Great Wall at Sea

Bomb Aimer Over Berlin

Les Bartlett, Peter Jacobs, 2007-09-20 The English pharmacist turned RAF aircrew member recounts his missions fighting against the Third Reich during World War II Les Bartlett has become one of the great characters of World War II history He flew as bomb aimer with the then Flying Officer Michael Beetham who later became Marshal of the Royal Air Force At that time he was a sergeant but gained his commission in April 1944 and flew his tour including twenty seven raids over Germany and France between November 1943 and May 1944 On his second operation his aircraft was attacked by

a Ju 88 leaving it with no flaps or brakes a crash landing at Wittering ensued At the end of his third mission they found the whole of Lincolnshire fogbound and eventually landed at RAF Melbourne in Yorkshire just before that airfield was closed also because of the fog His aircraft was hit in the wing by a 30lb incendiary bomb dropped by another Lancaster flying above them on his sixth operation but they survived On his twelfth operation to Leipzig he used the nose guns to destroy a Ju 88 night fighter for which he was awarded the DFM In February 1944 the port outer engine caught fire and the crew baled out Les was then posted as Assistant Adjutant to RAF Thornaby

Night Duel Over Germany Peter Jacobs,2017-01-30 Bomber Commands night offensive against Nazi Germany which lasted for nearly six years was one of Britains major contributions to the Allied effort during the Second World War But the decision to conduct its main operations at night only came about following heavy losses by day when its prewar medium bombers had been found lacking in modern air warfare The Luftwaffe too had its early problems Initially without a dedicated night fighter it was ill equipped to defend the Reich and so the stage was set for what would become one of the most critical strategic encounters of the war Things had to change on both sides Soon there came new and more capable aircraft in ever increasing numbers coupled with new tactics and technology as each side strove to gain the upper hand It became a fascinating encounter between the crews of Bomber Command and the Luftwaffes night fighter force the Nachtjagd with no shortage of courage and heavy losses on both sides Amongst the epic encounters were Bomber Commands Thousand Bomber raids the attack on the German V weapons research establishment at Peenemunde the campaigns against the industrial Ruhr Hamburg and Berlin and the disastrous raid on Nuremberg This new publication consolidates accounts from both sides and from all ranks of service in an effort to provide a comprehensive account of some of the most ferocious nocturnal engagements of the Second World War

Lectures of the Air Corps Tactical School and American Strategic Bombing in World War II Phil Haun,2019-04-12 Following the cataclysmic losses suffered in World War I air power theorists in Europe advocated for long range bombers to overfly the trenches and strike deep into the enemy s heartland The bombing of cities was seen as a means to collapse the enemy s will to resist and bring the war to a quick end In the United States airmen called for an independent air force but with the nation s return to isolationism there was little appetite for an offensive air power doctrine By the 1930s however a cadre of officers at the US Army Air Corps Tactical School ACTS had articulated an operational concept of high altitude daylight precision bombing HADPB that would be the foundation for a uniquely American vision of strategic air attack In Lectures of the Air Corps Tactical School and American Strategic Bombing in World War II editor Phil Haun brings together nine ACTS lecture transcripts which have been preserved in Air Force archives exactly as delivered to the airmen destined to lead the US Army Air Forces in World War II Presented is a distinctive American strategy of high altitude daylight precision bombing as told through lectures given at the ACTS during the interwar period and how these airmen put the theory to the test The book examines the Air Corps theory of HADPB as compared to the reality of combat in World War II by relying on recent

revisionist histories that have given scholars a deeper understanding of the impact of strategic bombing on Germany

Eagles of the Third Reich Samuel W. Mitcham, 2007 Originally published under the title *Men of the Luftwaffe* this insightful well researched book traces the rise and fall of Hitler's air force from the perspective of its top leaders concentrating on problems of organization policy and aircraft production rather than battles and campaigns Publishers Weekly
