Counterculture Green Andrew G. Kirk, 2007-11-19 For those who eagerly awaited its periodic appearance it was more than a publication it was a way of life The Whole Earth Catalog billed itself as Access to Tools and it grew from a Bay Area blip to a national phenomenon catering to hippies do it yourselfers and anyone interested in self sufficiency independent of mainstream America In recovering the history of the Catalog s unique brand of environmentalism Andrew Kirk recounts how San

Francisco's Stewart Brand and his counterculture cohorts in the Point Foundation promoted a philosophy of pragmatic environmentalism that celebrated technological achievement, human ingenuity, and sustainable living. By piecing together the social, cultural, material, environmental, and technological history of that philosophy's incarnation in the Catalog, Kirk reveals the driving forces behind it, tells the story of the appropriate technology movement it espoused, and assesses its fate. This book takes a fresh look at the many individuals and organizations who worked in the 1950s, 1960s, and 1970s to construct this philosophy of pragmatic environmentalism. At a time when many of these ideas were seen as heretical to a predominantly wilderness-based movement, Whole Earth became a critical forum for environmental alternatives and a model for how complicated ecological ideas could be presented in a hopeful and even humorous way. It also enabled later environmental advocates like Al Gore to explain our current inconvenient truth, and the actions of Brand's Point Foundation demonstrated that the epistemology of Whole Earth could be put into action in meaningful ways that might foster an environmental optimism distinctly different from the jeremiads that became the stock in trade of American environmentalism. Kirk shows us that Whole Earth was more than a mere counterculture fad. In an era of political protest, it suggested that staying home and modifying your toilet or installing a solar collector could make a more significant contribution than taking to the streets to shout down establishment misdeeds. Given its visible legacy in the current views of Al Gore and others, the subtle environmental heresies of Whole Earth continue to resonate today, which makes Kirk's lucid and lively tale an extremely timely one as well.

Architecture and Identity Chris Abel, Norman Foster, 2012-10-02. Instead of tuning the consumer to the machine, we can now tune the machine to the consumer. This edited collection of essays, now in its second edition, brings together the author's key writings on the cultural, technological, and theoretical developments reshaping Modern architecture into a responsive and diverse movement for the twenty-first century. Chris Abel approaches his subject from a wide range of knowledge, including cybernetics, philosophy, new human science, and development planning, as well as his experience as a teacher and critic on four continents. The result is a unique global perspective on the changing nature of Modern architecture at the turn of the millennium. Including two new chapters, this revised and expanded second edition offers radical insights into such topics as the impact of information technology on customized architecture production, the relations between tradition and innovation, prospects for a global eco-culture, and the local and global forces shaping the architecture and cities of Asia. Chris Abel is an architectural writer and educator based in Malta. He has taught at major universities in the UK, North and South America, Southeast Asia, and the Middle East, and is a contributor to numerous international journals and other publications. He currently holds visiting appointments at the University of Malta and the University of the Philippines.
