The Principles of the Trinary Universe Jeffrey Flesher, Occupy Pynchon Sean Carswell,2017-05 Occupy Pynchon examines power and resistance in the writer s post Gravity s Rainbow novels As Sean Carswell shows Pynchon s representations of global power after the neoliberal revolution of the 1980s shed the paranoia and metaphysical bent of his first three novels and share a great deal in common with the work of Michael Hardt and Antonio Negri s critical trilogy Empire Multitude and Commonwealth In both cases the authors describe

global power as a horizontal network of multinational corporations national governments and supranational institutions Pynchon as do Hardt and Negri theorizes resistance as a horizontal network of individuals who work together without sacrificing their singularities to resist the political and economic exploitation of empire Carswell enriches this examination of Pynchon's politics as made evident in *Vineland* 1990 *Mason Dixon* 1997 *Against the Day* 2006 *Inherent Vice* 2009 and *Bleeding Edge* 2013 by reading the novels alongside the global resistance movements of the early 2010s Beginning with the Arab Spring and progressing into the Occupy Movement political activists engaged in a global uprising The ensuing struggle mirrored Pynchon's concepts of power and resistance and Occupy activists in particular constructed their movement around the same philosophical tradition from which Pynchon as well as Hardt and Negri emerges This exploration of Pynchon shines a new light on Pynchon studies recasting his post 1970s fiction as central to his vision of resisting global neoliberal capitalism

*The Grand Contraption* David Park, 2021-07-13 The Grand Contraption tells the story of humanity s attempts through 4 000 years of written history to make sense of the world in its cosmic totality to understand its physical nature and to know its real and imagined inhabitants No other book has provided as coherent compelling and learned a narrative on this subject of subjects David Park takes us on an incredible journey that illuminates the multitude of elaborate contraptions by which humans in the Western world have imagined the earth they inhabit and what lies beyond Intertwining history religion philosophy literature and the physical sciences this eminently readable book is ultimately about the grand contraption we ve constructed through the ages in an effort to understand and identify with the universe According to Park people long ago conceived of our world as a great rock slab inhabited by gods devils and people and crowned by stars Thinkers imagined ether to fill the empty space and in the comforting certainty of celestial movement they discerned numbers and in numbers order Separate sections of the book tell the fascinating stories of measuring and mapping the Earth and Heavens and later the scientific exploration of the universe The journey reveals many common threads stretching from ancient Mesopotamians and Greeks to peoples of today For example humans have tended to imagine Earth and Sky as living creatures Not true say science savvy moderns But truth isn t always the point The point says Park is that Earth is indeed the fragile bubble we surmise and we must treat it with the reverence it deserves
