## **Semantics Primes And Universals:**

*Semantics : Primes and Universals* Anna Wierzbicka,1996-03-28 This book provides a synthesis of Wierzbicka's theory of meaning which is based on conceptual primitives and semantic universals using empirical findings from a wide range of languages While addressed primarily to linguists the book deals with highly topical and controversial issues of central importance to several disciplines including anthropology psychology and philosophy Conceptual primitives and semantic universals are the cornerstones of a semantic theory which Anna Wierzbicka has been developing for many years *Semantics Primes and Universals* is a major synthesis of her work presenting a full and systematic exposition of that theory in a non technical and readable way It delineates a full set of universal concepts as they have emerged from large scale investigations across a wide range of languages undertaken by the author and her colleagues On the basis of empirical cross linguistic studies it vindicates the old notion of the psychic unity of mankind while at the same time offering a framework for the rigorous description of different languages and cultures A major synthesis of Anna Wierzbicka's work

*Semantic Primes and Universal Grammar* Bert Peeters,2006-08-16 This volume is part of a research program which started with the publication in 1972 of Anna Wierzbicka's groundbreaking work on Semantic Primitives The first within the program to focus on a number of typologically similar languages it proposes a French Spanish Portuguese and Italian version of the Natural Semantic Metalanguage NSM elaborated over the years by Wierzbicka and colleagues Repetition is avoided through teamwork a number of authors working on the languages under examination have had equal input in a set of five papers dealing with distinct parts of the metalanguage Some of the findings presented here invite us to have a fresh look at what has already been achieved and to amend some of the working hypotheses of the NSM approach accordingly The volume also contains six case studies on Italian *sfogarsi* Portuguese *saudades* Spanish crisis French *certes* Spanish expressions of sincerity and Italian and Spanish diminutives respectively

*Semantics* Anna Wierzbicka,1996 Conceptual primitives and semantic universals are the cornerstones of a semantic theory which Anna Wierzbicka has been developing for many years *Semantics Primes and Universals* is a major synthesis of her work presenting a full and systematic exposition of that theory in a non technical and readable way It delineates a full set of universal concepts as they have emerged from large scale investigations across a wide range of languages undertaken by the author and her colleagues On the basis of empirical cross linguistic studies it vindicates the old notion of the psychic unity of mankind while at the same time offering a framework for the rigorous description of different languages and cultures

**Semantic Primes and Universal Grammar** Bert Peeters,2006-01-01 This volume is part of a research program which started with the publication in 1972 of Anna Wierzbicka's groundbreaking work on Semantic Primitives The first within the program to focus on a number of typologically similar languages it proposes a French Spanish Portuguese and Italian version of the Natural Semantic Metalanguage NSM elaborated over the years by Wierzbicka and colleagues Repetition is avoided through teamwork a number of authors

working on the languages under examination have had equal input in a set of five papers dealing with distinct parts of the metalanguage. Some of the findings presented here invite us to have a fresh look at what has already been achieved and to amend some of the working hypotheses of the NSM approach accordingly. The volume also contains six case studies on Italian *sfogarsi*, Portuguese *saudades*, Spanish crisis, French *certes*, Spanish expressions of sincerity and Italian and Spanish diminutives respectively.

**Cross-linguistic Semantics** Cliff Goddard, 2008. Cross-linguistic semantics investigating how languages package and express meanings differently is central to the linguistic quest to understand the nature of human language. This set of studies explores and demonstrates cross-linguistic semantics as practised in the natural semantic metalanguage NSM framework originated by Anna Wierzbicka. The opening chapters give a state-of-the-art overview of the NSM model, propose several theoretical innovations and advance a number of original analyses in connection with names and naming clefts and other specificational sentences and discourse anaphora. Subsequent chapters describe and analyse diverse phenomena in ten languages from multiple families, geographical locations and cultural settings around the globe. Three substantial studies document how the metalanguage of NSM semantic primes can be realised in languages of widely differing types: Amharic (Ethiopia), Korean and East Cree. Each constitutes a lexicogrammatical portrait in miniature of the language concerned. Other chapters probe topics such as inalienable possession in Koromua (Papua New Guinea), epistemic verbs in Swedish, hyperpolysemy in Bunuba (Australia), the expression of momentariness in Berber, ethnogeometry in Makasai (East Timor), value concepts in Russian and virtuous emotions in Japanese. This book will be valuable for linguists working on language description, lexical semantics or the semantics of grammar for advanced students of linguistics and for others interested in language universals and language diversity.

**Semantic and Lexical Universals** Cliff Goddard, Anna Wierzbicka, 1994-01-01. This set of papers represents a unique collection; it is the first attempt ever to empirically test a hypothetical set of semantic and lexical universals across a number of genetically and typologically diverse languages. In fact, the word collection is not fully appropriate in this case since the papers report research undertaken specifically for the present volume and shaped by the same guidelines. They constitute parallel and strictly comparable answers to the same set of questions, coordinated effort with a common aim and a common methodology. The goal of identifying the universal human concepts found in all languages is of fundamental importance both from a theoretical and a practical point of view since these concepts provide the basis of the psychic unity of mankind underlying the clearly visible diversity of human cultures. They also allow us to better understand that diversity itself because they provide a common measure without which no precise and meaningful comparisons are possible at all. A set of truly universal or even near-universal concepts can provide us with an invaluable tool for interpreting and explaining all the culture-specific meanings encoded in the language and culture systems of the world. It can also provide us with a tool for explaining meanings across cultures in education, business, trade, international relations and so on. The book contains 13 chapters on individual languages, including Japanese by Masayuki

Onishi Chinese by Hilary Chappel Thai by Anthony Diller Ewe Africa by Felix Ameka Miskitu languages of South America by Kenneth Hall Australian Aboriginal languages Aranda Yankunytjatjara and Kayardild by Jean Harkins Semantic theory and semantic universals by Goddard Introducing lexical primitives by Goddard and Wierzbicka and Semantic primitives across languages a critical review by Wierzbicka

**Imprisoned in English** Anna Wierzbicka, 2014 Imprisoned in English argues that in the present English dominated world social sciences and the humanities are locked in a conceptual framework grounded in English and that scholars need to break away from this framework to reach a more universal culture independent perspective on things human

**Human Rights and the Body** Annabelle Mooney, 2016-05-13 Human Rights and the Body is a response to the crisis in human rights to the very real concern that without a secure foundation for the concept of human rights their very existence is threatened While there has been consideration of the discourses of human rights and the way in which the body is written upon research in linguistics has not yet been fully brought to bear on either human rights or the body Drawing on legal concepts and aspects of the law of human rights Mooney aims to provide a universally defensible set of human rights and a foundation or rather a frame for them She argues that the proper frames for human rights are firstly the human body seen as an index reliant on the natural world secondly the globe and finally language These three frames generate rights to food water sleep and shelter environmental protection and a right against dehumanization This book is essential reading for researchers and graduate students in the fields of human rights and semiotics of law

*Meaning and Universal Grammar* Cliff Goddard, Anna Wierzbicka, 2002-01-01 Volume two in a set of studies founded on the idea that universal grammar is based on indeed inseparable from meaning The theoretical framework is the natural semantic metalanguage NSM approach originated by Anna Wierzbicka and developed in collaboration with Cliff Goddard

*Language in Life, and a Life in Language: Jacob Mey, a Festschrift* Ken Turner, 2012-11-02 This is a collection of invited papers that honours Professor Jacob Mey on the occasion of his eightieth birthday Professor Mey is and has for a long time been at once one of the most respected enterprising industrious scholarly and now avuncular members of the numerous linguistics communities in which he has worked He has made over a distinguished working life significant contributions to all of the sub disciplines of linguistics from phonetics through phonology morphology syntax semantics and especially pragmatics He has sought to make connections between these sub disciplines and broader areas of thought These connections have resulted in ground breaking advances in for example Japanese sociolinguistics pragmatics and artificial intelligence Marxist linguistics pragmatics and therapy pragmatics and machine processed information gender and language literary pragmatics and societal pragmatics The collection ends with an in depth discussion between Professor Mey and one of the editors in which Professor Mey speaks fully and frankly about his life in language and language in life

*Die Slavischen Sprachen / The Slavic Languages. Halbband 1* Sebastian Kempgen, Tilman Berger, Peter Kosta, Karl Gutschmidt, 2009 In many respects the agreement systems of Slavonic languages are close to canonical Controllers of

agreement are often present they have overt expression of features and they take consistent agreements The target has obligatory bound expression of agreement and there is matching of features values for person number and gender How ever Slavonic also shows several very interesting instances of agreement choices induced by a range of different controller types These agreement choices provide good evidence for the constraints of the Agreement Hierarchy and the Predicate Hierarchy as well as for various types of condition on agreement notably animacy and precedence

**Mental States: Language and cognitive structure** Andrea C. Schalley, Drew Khlentzos, 2007 The contributions to this volume focus on what language and language use reveals about cognitive structure and underlying cognitive categories Wide ranging and thought provoking essays from linguists and psychologists within this volume investigate the insights conceptual categorization can give into the organization and structure of the mind and specific mental states Topics and linguistic phenomena discussed include narratives and story telling language development figurative language linguistic categorization linguistic relativity and the linguistic coding of mental states such as perceptions and beliefs With contributions at the forefront of current debate this book will appeal to anyone with an interest in language and the cognitive structures that support it

**Current Trends in Contrastive Linguistics** María de los Ángeles Gómez González, J. Lachlan Mackenzie, Elsa M. González Álvarez, 2008-12-17 This book examines the contribution of various recent developments in linguistics to contrastive analysis The articles range across a broad gamut of languages with most attention going to the languages of Europe They show how advances in theory and computer technology are together impacting the field of contrastive linguistics Part I focuses from a broadly functional cognitive viewpoint on the close link with typology stressing the importance of embedding the treatment of grammatical categories in their contexts of use Part II turns to methodological issues exploring the enormous potential offered by parallel computer accessible corpora to contrastive linguistics and to enhancing the testability authenticity and empirical adequacy of cross linguistic studies Part III is concerned with contrastive semantics ranging from individual items to entire grammatical constructions and shows how meanings are coupled to language specific cognitive strategies and even to cultural differences in subjective awareness and the fashioning of personal identity

**Semantic Analysis** Cliff Goddard, 2011-08-04 A lively introduction to

methods for articulating the meanings of words and sentences and revealing connections between language and culture It shows that the study of meaning can be rigorous insightful and exciting      *English* Anna Wierzbicka,2006 This book argues that rather than denying the existence and continued relevance of the cultural baggage embedded in English Anglo English it is important to explore the contents of that baggage important for practical as well as intellectual reasons      *Cognitive Linguistics Investigations* June Luchjenbroers,2006-06-01 The total body of papers presented in this volume captures research across a variety of languages and language groups to show how particular elements of linguistic description draw on otherwise separate aspects or fields of linguistic investigation As such this volume captures a diversity of research interest from the field of cognitive linguistics These areas include lexical semantics cognitive grammar metaphor prototypes pragmatics narrative and discourse computational and translation models and are considered within the contexts of language change child language acquisition language and culture grammatical features and word order and gesture Despite possible differences in philosophical approach to the role of language in cognitive tasks these papers are similar in a fundamental way they all share a commitment to the view that human categorization involves mental concepts that have fuzzy boundaries and are culturally and situation based      *Verbal Communication* Andrea Rocci,Louis de Saussure,2016-03-07 Common sense tells us that verbal communication should be a central concern both for the study of communication and for the study of language Language is the most pervasive means of communication in human societies especially if we consider the huge gamut of communication phenomena where spoken and written language combines with other modalities such as gestures or pictures Most communication researchers have to deal with issues of language use in their work Classic methods in communication research from content analysis to interviews and questionnaires not to mention the obvious cases of rhetorical analysis and discourse analysis presuppose the understanding of the meaning of spontaneous or elicited verbal productions Despite its pervasiveness verbal communication does not currently define one cohesive and distinct subfield within the communication discipline The Handbook of Verbal Communication seeks to address this gap In doing so it draws not only on the communication discipline but also on the rich interdisciplinary research on language and communication that developed over the last fifty years as linguistics interacted with the social sciences and the cognitive sciences The interaction of linguistic research with the social sciences has produced a plethora of approaches to the study of meanings in social context from conversation analysis to critical discourse analysis while cognitive research on verbal communication carried out in cognitive pragmatics as well as in cognitive linguistics has offered insights into the interaction between language inference and persuasion and into cognitive processes such as framing or metaphorical mapping The Handbook of Verbal Communication volume takes into account these two traditions selecting those issues and themes that are most relevant for communication scholars It addresses background matters such as the evolution of human verbal communication and the relationship between verbal and non verbal means of communication and offers a an extensive discussion of the explicit and

implicit meanings of verbal messages with a focus on emotive and figurative meanings Conversation and fundamental types of discourse such as argument and narrative are presented in depth as is the key notion of discourse genre The nature of writing systems as well as the interaction of spoken or written language with non verbal modalities are devoted ample attention Different contexts of language use are considered from the mass media and the new media to the organizational contexts Cultural and linguistic diversity is addressed with a focus on phenomena such as multilingual communication and translation A key feature of the volume is the coverage of verbal communication quality Quality is examined both from a cognitive and from a social perspective It covers topics that range from to the cognitive processes underlying deceptive communication to the methods that can be used to assess the quality of texts in an organizational context
