C. S. Peirce and the Deconstruction of Tradition Gheorghe Jurj,2023-01-20 What professional philosophy needs most today is a new and fresh imagination Only this will enable a move away from the traditional positions and schools such as realism idealism pragmatism and empiricism Nothing much will happen in philosophy as long as its main object is the defense of a position expressed in history As this book argues there is no thinker better positioned to overcome this impasse than Charles Sanders Peirce who through emancipation from the intellectual fortifications of the past made a fresh imagination spring forth This text ably guides the reader through the work and thought of Peirce It first analyses his dialogue with the traditions of philosophy and semiotics from Aristotle to the present day before moving on to a close study of Peirce s own ontology epistemology and logic

into dialogue with the Extended Evolutionary Synthesis that is emerging in contemporary biology to show how all living things participate in semiosis so that that a cultural dimension is present through the whole order of nature and the whole of natural history It also retrieves Aquinas doctrine of intentions in the medium to show how signification can be attributed in a diminished way to even inanimate nature with the ontological implication that being as such should be reconceived in semiotic terms The phenomena of human culture are therefore to be understood not as breaks with a meaningless nature but instead as heightenings and deepenings of natural movements of meaning that long precede and far exceed us Against the modern divorce of nature and culture Signs in the Dust argues that culture is natural and nature is cultural through and through
