disability by theorists from a range of perspectives illustrating ways in which their theories and insights contest or support assumptions within rehabilitation theory The book argues for a cross fertilisation of ideas and challenges hierarchies of power in which nurses and therapists privilege their own assumptions perspectives and knowledge while overlooking or ignoring the perspectives both of disabled people and of other theorists Provides an accessible introduction to current theoretical perspectives on disability Demonstrates how these theoretical perspectives can inform a practitioner s approach to rehabilitation Relevant for all the rehabilitation and health care professions Anthropologists in the Field Lynne Hume,Jane Mulcock,2004-12-14 All too often anthropologists and other social scientists go into the field with unrealistic expectations Different cultural milieus are prime ground for misunderstandings misinterpretations and interrelational problems This book is an excellent introduction to real world ethnography using familiar and not so familiar cultures as cases The book covers participant observation and ethnographic interviewing both short and long term These methodologies are open to problems such as lack of communication depression hostility danger and moral and ethical dilemmas problems that are usually sanitized for publication and ignored in the curriculum Among the intriguing topics covered are sexualized and violent environments secrecy and disclosure multiple roles and allegiances insider outsider issues and negotiating friendship and objectivity **Encyclopedia of Medical Anthropology** Carol R. Ember,Melvin Ember,2003-12-31 Medical practitioners and the ordinary citizen are becoming more aware that we need to understand cultural variation in medical belief and practice The more we know how health and disease are managed in different cultures the more we can recognize what is culture bound in our own medical belief and practice The Encyclopedia of Medical Anthropology is unique because it is the first reference work to describe the cultural practices relevant to health in the world s cultures and to provide an overview of important topics in medical anthropology No other single reference work comes close to matching the depth and breadth of information on the varying cultural background of health and illness around the world More than 100 experts anthropologists and other social scientists have contributed their firsthand experience of medical cultures from around the world *Sexual Citizenship and Disability* Julia Bahner,2019-12-05 What does sexual citizenship mean in practice for people with mobility impairments who may need professional support to engage in sexual activity The book explores this subject through empirical investigation based on case studies conducted in four countries Sweden England Australia and the Netherlands and develops the abstract notion of sexual citizenship to make it practically relevant to disabled people professionals in disability services and policy makers Through a cross national approach it demonstrates the variability of how sexual rights are understood and their culturally specific nature It also shows how the personal is indeed political states different policy approaches change the outcomes for disabled people in terms of support to explore and express their sexualities By proposing a model of sexual facilitation that can be used in policy development to better cater to disabled service users needs as well as furthering the theoretical understanding of sexual rights and sexual citizenship this book will

Recapturing the Personal Irving Epstein, 2006-12-01 In this volume contributors discuss both the theoretical and practical applications of an embodied knowledge perspective using the field of education as an exemplar It should be noted that while the theorists whose writings are discussed in these pages have made seminal contributions to the sociology of the body literature it is not possible nor is it our goal to comprehensively review the theoretical discourse of everyone who has written in the area Our more modest aim is to give our audience a sampling of what some of the important theoretical positions entail To that end we turn to the writings of the three social and cultural theorists whose work is given the greatest degree of attention in the volume Foucault Bourdieu and Butler and will briefly summarize their views

"The Poor, the Crippled, the Blind, and the Lame" Louise A. Gosbell, 2018-08-03 The New Testament gospels feature numerous social exchanges between Jesus and people with various physical and sensory disabilities Despite this traditional biblical scholarship has not seen these people as agents in their own right but existing only to highlight the actions of Jesus as a miracle worker In this study Louise A Gosbell uses disability as a lens through which to explore a number of these passages anew Using the cultural model of disability as the theoretical basis she explores the way that the gospel writers as with other writers of the ancient world used the language of disability as a means of understanding organising and interpreting the experiences of humanity Her investigation highlights the ways in which the gospel writers reinforce and reflect as well as subvert culturally driven constructions of disability in the ancient world

JCT., 1991* **The Hermeneutical Spirit** Amos Yong, 2017-11-06 In the contemporary biblical studies climate proposals regarding the theological interpretation of Scripture are contested particularly but not only because they privilege encourage and foster ecclesial or other forms of normative commitments as part and parcel of the

hermeneutical horizon through which scriptural texts are read and understood Within this context confessional approaches have been emerging including some from within the nascent pentecostal theological tradition This volume builds on the author s previous work in theological method to suggest a pentecostal perspective on theological interpretation that is rooted in the conviction that all Christian reading of sacred Scripture is post Pentecost meaning after the Day of Pentecost outpouring of the Spirit on all flesh in anticipation of the coming reign of God In that respect such a pentecostal interpretative perspective is not parochially for those within the modern day movement bearing that name but is arguably apostolic in following after the scriptural imagination of the earliest disciples of Jesus the messiah and therefore has ecumenical and missional purchase across space and time The Hermeneutical Spirit thus provides close readings of various texts across the scriptural canon as a model for Christian theological interpretation of Scripture suitable for the twenty first century global context
