Handbook of Language and Culture Farzad Sharifian, 2014-12-17 The Routledge Handbook of Language and Culture presents the first comprehensive survey of research on the relationship between language and culture. It provides readers with a clear and accessible introduction to both interdisciplinary and multidisciplinary studies of language and culture and addresses key issues of language and culturally based linguistic research from a variety of perspectives and theoretical frameworks. This Handbook features thirty-three newly commissioned chapters which cover key areas such as cognitive psychology, cognitive linguistics, cognitive anthropology, linguistic anthropology, cultural anthropology, and sociolinguistics. It offers insights into the historical development, contemporary theory, research, and practice of each topic and explores the potential future directions of the field. It shows readers how language and culture research can be of practical benefit to applied areas of research and practice such as intercultural communication and second language teaching and learning. Written by a group of prominent scholars from around the globe, The Routledge Handbook of Language and Culture provides a vital resource for scholars and students working in this area.

The Politics of Chinese Language and Culture Robert I. Hodge, Kam Louie, 1998 An innovative text which adopts the tools of cultural studies to provide a fresh approach to the study of Chinese language, culture, and society. The book tackles areas such as grammar, language, gender, popular culture, film, and the Chinese diaspora and employs the concepts of social semiotics to extend the ideas of language and reading. Covering a range of cultural texts, it will help to break down the boundaries around the ideas and identities of East and West and provide a more relevant analysis of the Chinese and China.

Encyclopedia of Contemporary Literary Theory Irene Rima Makaryk, 1993-01-01 The last half of the twentieth century has seen the emergence of literary theory as a new discipline. As with any body of scholarship, various schools of thought exist and sometimes conflict within it. Irene R. Makaryk has compiled a welcome guide to the field. Accessible and jargon-free, the Encyclopedia of Contemporary Literary Theory provides lucid, concise explanations of myriad approaches to literature that have arisen over the past forty years. Some 170 scholars from around the world have contributed their expertise to this volume. Their work is organized into three parts. In Part I, forty evaluative essays examine the historical and cultural context out of which new schools of and approaches to literature arose. The essays also discuss the uses and limitations of the various schools and the key issues they address. Part II focuses on individual theorists. It provides a more detailed picture of the network of scholars, not always easily pigeonholed into the categories of Part I. This second section analyses the individual achievements as well as the influence of specific scholars and places them in a larger critical context. Part III deals with the vocabulary of literary theory. It identifies significant complex terms, places them in context, and explains their origins and use. Accessibility is a key feature of the work. By avoiding jargon, providing mini-bibliographies, and cross-referencing throughout, Makaryk has provided an indispensable tool for literary theorists and historians and for all scholars and students of contemporary criticism and culture.

Language in Culture Michael Silverstein, 2016 This book offers a rich assortment of some of Michael Silverstein's most important lectures at the University of Chicago over the past forty years. All

of which converge on theoretical issues involved in the semiotic cognitive and sociopolitical study of language and communication Together they provide an overdue home to an impressive body of thought that has otherwise only been available via unofficial distribution in hand written notes audio recordings and other media by longtime fans and students Developing and employing semiotic concepts these lectures concentrate on two central and inverse problems The first is to understand how interpersonal communication is carried in and by the medium of language The second is to understand how language is a defining factor in conceptual representations and mental knowledge Exploring the diversity of sources of knowledge and the many forms of language they can be coded into Silverstein details the modes of semiosis of which language is composed in particular those that express cultural knowledge and conceptualization A sophisticated study of language as a form of interaction these lectures offer one of the most important contributions to linguistics and anthropological semiotics since Ferdinand de Saussure
