Historically philosophy has been the point of origin of the various sciences However once developed the sciences have increasingly become autonomous although often taking some paradigm from leading philosophies of the era As a result in recent times the relationship of philosophy to the sciences has been more by way of dialogue and critique than a matter of spawning new sciences This volume of the *Selected Studies* brings together a series of essays which develop that dialogue and critique with special reference to the insights of phenomenological philosophy Phenomenology in its own way has been interfused with the sciences from its outset Perhaps the most widely noted relation due in part to Edmund Husserl's characterization of the beginning steps of phenomenology as a descriptive psychology has been with the various psychologies It is well known that the early Gestaltists were influenced by Husserl and later the Existential psychologies acknowledged the impact of Martin Heidegger and Jean Paul Sartre to mention but two philosophers And of course Husserl's lifetime concern for the foundations of logic and mathematics especially as these the former in particular were developed into a foundational theory of science has figured prominently in these dialogues 2 INTRODUCTION Less directly but more currently the impact of phenomenology upon the disciplines has begun to be felt in a whole range of the sciences *Essays on Signification* H. Walter Schmitz, 1990 Signification is one of those by no means exclusively sign theoretically relevant movements which arose at the turn of the century It established a philosophical tradition which from its very inception was interlaced with widely varying movements ranging for example from Bresson's semantics to Carnap's and Neurath's logical empiricism In this volume an international group of well known scholars from various disciplines undertakes a broad re evaluation of signification and its development which promises also to yield a better knowledge of research approaches in linguistics semiotics philosophy and psychology with which signification was related or vied for acceptance Contributions deal with Lady Welby's biography and socio cultural background the intellectual context of the signification movement at the turn of the century and the relationships between Welby's semiotic and philosophical ideas on the one hand and those of her contemporaries Bresson Peirce Schiller Vailati etc and followers Ogden Van Eeden Mannoury etc on the other Descriptions of the historiographically most important archive materials a bibliography of publications on Lady Welby and her signification and an index of names conclude the volume *In the Beginning was the Deed* Harry Redner, 2024-07-26 Now that the collective death of mankind has become a possibility no other thought can remain unimpaired Harry Redner traces historically the onset of this acute state of Nihilism from what might be called the Faustian revolution symbolized by Faust's pronouncement In the beginning

was the Deed Redner reflects on the passage of the three main Fausts from Marlowe's to Goethe's to Thomas Mann's and this reflection serves as the dramatic metaphor for a review of the relationship of Progress to Nihilism in modern civilization. Starting with an exposition of the key Faustian thinkers Marx, Nietzsche, Wittgenstein and Heidegger, the book proceeds by examining the dominant modern ideas on Man, Time and Nihilism with reference to Foucault, Derrida and Althusser. It focuses on Language which is a key preoccupation of all these thinkers but has not yet been taken far enough to afford a basis for the explanation of fundamental changes in civilization. Language in its creative and destructive functions as constituting both the conscious and unconscious of a culture is reconceived so as to account for the hidden link between Progress and Nihilism. The author then explores sociologically the dominant aspects of Progress in terms of the ideas of Weber, Adorno and Marcuse on Technology, Subjectivity and Activism. Finally, an extensive literary study of the three main Fausts concludes with a coda on the future of music. In the Beginning Was the Deed is lucid and direct, tinged with wry humor. Redner represents Man in the nuclear age and reflects on that representation seeking to comprehend our era, draw ethical and political conclusions and explore action as a response to the threat of annihilation. This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach and impact. **Signifying and Understanding** Susan Petrilli, Lady Victoria Welby, 2009. This book introduces and provides commentary on a selection of published and unpublished works by Victoria Welby and exponents of the Signific Movement in the Netherlands. Beyond offering an important contribution to the reconstruction of a neglected phase in the history of ideas, it evidences the theoretical topicality of signification, in particular the focus on the relation of signs to value, meaning and understanding on verbal and nonverbal behavior and on language and communication.

**Beyond Meaning** Elly Ifantidou, Louis de Saussure, Tim Wharton, 2021-11-15. Despite the fact that they are often crucial to our understanding, the vague, ineffable elements of language use and communication have received much less attention from linguists than the more concrete, effable ones. This has left a range of important questions unanswered: How might we account for the communication of non-propositional phenomena such as moods, emotions and impressions? What type of cognitive response do these phenomena trigger, if not conceptual or propositional? Do creative metaphors and unknown words in second languages and other pointers to conceptual regions communicate concepts learned from language alone? How might the descriptive ineffability of interjections, free indirect speech etc. be accommodated within a theory of communication? What of those working on the aesthetics of artworks, music and literature? What can evolution tell us about ineffability? The papers in this volume address these fascinating questions head-on. They represent a range of different attempts to answer them and in so doing allow us to pose exciting new questions. The aim is to bring the ineffable firmly within the grasp of theoretical pragmatics.

Roger Wertheimer,1972      *Sign Studies and Semioethics* Susan Petrilli,2014-10-09 This book examines the issues surrounding the problematic perpetuation of dominant sign systems through the framework of semioethics Semioethics is concerned with using semiotics as a powerful tool to critique the status quo and move beyond the reproduction of the dominant order of communication The aim is to present semioethics as a method to engage semiotics in an active rethink of our ability as humans to affect change      Cinema of Disorientation Dominic Lash,2020-07-06 Precisely perhaps because they are so immediately absorbing narrative films can also be profoundly confusing and disorienting This fascinating book neither proposes foolproof methods for avoiding confusion nor does it suggest that disorientation is always a virtue Instead it argues that the best way to come to terms with our confusion is to look closely at exactly what is confusing us and why At the heart of the book are original close readings of four important recent films David Lynch s INLAND EMPIRE 2006 Leos Carax s Holy Motors 2012 Pedro Costa s Colossal Youth 2006 and Jean Luc Godard s Goodbye to Language 2014 Clearly written but critically and theoretically bold The Cinema of Disorientation Inviting Confusions explores both how we get or fail to get our bearings with respect to a film and what we might discover by and while doing so      **Signs of Humanity / L'homme et ses signes** Gérard Deledalle,Michel Balat,Janice Deledalle-Rhodes,2019-05-20 No detailed description available for Signs of Humanity L homme et ses signes      Bloomsbury Semiotics Volume 1: History and Semiosis Jamin Pelkey,2023-01-12 Bloomsbury Semiotics offers a state of the art overview of the entire field of semiotics by revealing its influence on a wide range of disciplinary perspectives With four volumes spanning theory method and practice across the disciplines this definitive reference work emphasizes and strengthens common bonds shared across intellectual cultures and facilitates the discovery and recovery of meaning across fields It comprises Volume 1 History and Semiosis Volume 2 Semiotics in the Natural and Technical Sciences Volume 3 Semiotics in the Arts and Social Sciences Volume 4 Semiotic Movements Written by leading international experts the chapters provide comprehensive overviews of the history and status of semiotic inquiry across a diverse range of traditions and disciplines Together they highlight key contemporary developments and debates along with ongoing research priorities Providing the most comprehensive and united overview of the field Bloomsbury Semiotics enables anyone from students to seasoned practitioners to better understand and benefit from semiotic insight and how it relates to their own area of study or research Volume 1 History and Semiosis provides a general and historical orientation to semiotic traditions and their methodologies followed by an in depth overview of critical issues in the study of sign systems and semiosis It ends with an exploration of issues of sign classification and practical application setting the scene for the remaining volumes      *Semiotics and its Masters. **Positive Psychology in Search for Meaning** Dmitry Leontiev,2016-03-17 What are the ways in which we can

understand the meaning of the psychology of meaning in people's lives. In the last century mainstream psychology has largely neglected the topic of meaning. More recently the concept has become an academically legitimate one within positive psychology and in some other speciality areas of psychology. This book contains a collection of theoretical, methodological and empirical papers written by the acknowledged experts systematically working on the problems of personal meaning within the positive psychology framework. The authors investigate the possibilities and limitations of a scientific study of personal meaning and new perspectives that this concept brings to the field. This book was originally published as a special issue of *The Journal of Positive Psychology*. **The Encyclopædia Britannica** Hugh Chisholm, James Louis Garvin, 1926 **What is Meaning?** Lady Victoria Welby, 1903. In *What is Meaning* 1903 the author elaborates on the fundamental tenets of her theory of sign to which she gives the overall term *significs*. One of the main obstacles to an adequate theory of meaning in Lady Welby's opinion is the unfounded assumption of fixed sign meaning. There is, strictly speaking, no such thing as the Sense of a word but only the sense in which it is used, the circumstances, state of mind, reference, universe of discourse belonging to it. The Meaning of a word is the intent which it is desired to convey, the intention of the user. The Significance is always manifold and intensifies its sense as well as its meaning by expressing its importance, its appeal to us, its moment for us, its emotional force, its ideal value, its moral aspect, its universal or at least social range. This facsimile of the 1903 edition of *What is Meaning* is accompanied by an essay on *Significs as a Fundamental Science* by Achim Eschbach and *A Concise History of Significs* by G Mannoury. *Necessity and Truthful Fictions* Amihud Gilead, 2009-01-01. This book discovers areas and themes especially in philosophical psychology for novel observations and investigations, the diversity of which is systematically unified within the frame of the author's original metaphysics, panenmentalism. The book demonstrates how, by means of truthful fictions, we may detect meaningful possibilities as well as their necessary relationships that otherwise could not be discovered. **Female Friendship** Ida Day, Slav N. Gratchev, Larry Sheret, 2022-07-12. This volume focuses on the literary and artistic exploration of female friendship in various geographical contexts spanning the centuries from the medieval period until the present. The essays address the intense female bonding in world literature as a universal human need for intimacy, sense of belonging and purpose. The main focus is on the reevaluation of friendships between women which have been traditionally less epitomized than those between men. The authors of this volume demonstrate how the emotional unions of women offer compelling insights to various historical and contemporary societies, helping us understand gender relations, traditions, family life and community values. **Attention and Performance XVII** Daniel Gopher, Asher Koriath, 1999. In 1966 the first meeting of the Association for the Study of Attention and Performance was held in the Netherlands to promote the emerging science of cognitive psychology. This volume is based on the most recent conference held in Israel thirty years later. The focus of the conference was the interaction between theory and application. The organizers chose the specific topic, cognitive regulation of performance, because it is an area where contemporary theories of cognitive processes meet the everyday challenges posed

by human interactions with complex systems Present day technological systems impose on the operator a variety of supervisory functions such as input and output monitoring allocation of cognitive resources choice of strategies and regulation of cognitive operations A challenge for engineers and designers is to accommodate the cognitive requirements called for by these systems The book is divided into four sections the presentation and representation of information cognitive regulation of acquisition and performance consciousness and behavior and special populations aging and neurological disorders Contributors Nicole D Anderson Moshe Bar Lynn Bardell Alice E Barnes Irving Biederman Robert A Bjork Richard A Block Fergus I M Craik Heiner Deubel John Dunlosky Ido Erev Ronald Fisher John M Flach Barry Goettl Morris Goldsmith Daniel Gopher Lynn Hasher Okihide Hikosaka Larry L Jacoby Peter Kalocsai Colleen Kelley David E Kieras Roberta Klatzky Asher Koriath Arthur F Kramer Elisabetta Ladavas John L Larish Susan J Lederman John Long Cynthia P May Guilianna Mazzoni Brian McElree David Meyer Satoru Miyauchi Neville Moray Louis Narens Thomas O Nelson Raymond S Nickerson Lynne Reder J Wesley Regian Ian Robertson Wolfgang Schneider Christian D Schunn Wayne Shebilske Shinsuke Shimojo Suresh Subramaniam Tom N Trainham Jehoshua Tsal Timothy A Weber Christopher Wickens Rose T Zacks Dan Zakay
