Sentence Production Developments In Research And Theory:

    <u>Sentence Production</u> S. Rosenberg,1977-01-01   *Cognition and Sentence Production* S.N. Sridhar,2012-12-06 The developments in linguistic theory over the last three decades have given us a better understanding of the formal properties of language However as the truism goes language does not exist in a vacuum It in teracts with a cognitive system that involves much more than language and functions as the primary instrument of human communication A theory of language must therefore be based on an integration of its for mal properties with its cognitive and communicative dimensions The present work is offered as the modest contribution to this research paradigm This book is a revised and slightly enlarged version of my doctoral thesis submitted to the University of Illinois at Urbana Champaign In writing the original version I had the privilege of working with Professor Charles E Osgood who is widely recognized as the founder and one of the leading figures of modern psycholinguistics I have benefited from ex tensive and stimulating discussions with him not only on this topic but in the development of his theory of language performance in general see his Lectures on Language Performance 1980 in this series However the re sponsibility for the particular formulations of the theory hypotheses in terpretations and conclusions found in this work which have been in fluenced no doubt by my training as a linguist rather than as a psychologist are my own   **Sentence Production** Sheldon Rosenberg,1977   **The Dynamic Interlanguage** Miriam R. Eisenstein,2013-06-29 Recent work in applied linguistics has expanded our understanding of the rule governed nature of language The concept of an idealized speaker hearer whose linguistic competence is abstract and separate from reality has been enriched by the notion of an actual interlocutor who possesses communicative compe tence a knowledge of language which accounts for its use in real world con texts Areas of variation previously relegated to idiosyncratic differences in performance have been found to be dynamic yet consistent and lend themselves to study and systematic description Because language acquisition involves the development of communicative competence by its very nature it incorporates variation and systematicity Sec ond language acquisition is similarly variable since interlanguage is subject to the same universal and language specific conventions In addition aspects of the second language have been found to be unevenly acquired and are differ entially reflected in particular contexts or settings Yet despite our expanding knowledge this variability is only beginning to be treated in much of the sec ond language acquisition literature This volume presents the work of some researchers and methodologists who have taken on the challenge of including variation in their research designs and pedagogical recommendations Variation is shown to be relevant to lin guistic social and psychological aspects of language It is apparent in the registers and dialects of the target language and in the inter language of learners   **What Writers Know** Martin Nystrand,2023-07-24   *Functional Approaches to Language* Shannon Bischoff,Carmen Jany,2013-10-29 Functionalism as characterized by Allen 2007 254 holds that linguistic structures can only be understood and explained with reference to the semantic and communicative functions of language whose primary function is to be a vehicle for social

interaction among human beings Since the 1970s inspired by the work of Jespersen Bolinger Dik Halliday and Chafe functionalism has been attached to a variety of movements and models making major contributions to linguistic theory and to various subfields within linguistics such as syntax discourse language acquisition cognitive linguistics typology and documentary linguistics Further functional approaches have had a major impact outside linguistics in fields such as psychology and education both in terms of theory and application The main goal of functionalist approaches is to clarify the dynamic relationship between form and function Thompson 2003 53 Functionalist perspectives have gained more ground over the past decades with more linguists resorting to functional explanations to account for linguistic structure The authors in this volume present the current state of functional approaches to linguistic inquiry expanding our knowledge of language and linguistics *Recent Advances in the Psychology of Language* R. Campbell,2013-03-09 The Stirling Psychology of Language Conference was held in the University of Stirling 21 26 June 1976 250 people attended the conference and 70 papers were presented The two volumes of Pro ceedings present a selection of papers from the conference reflect ing as far as possible the range of topics that were discussed Volume 1 is concerned exclusively with language acquisition In recent years the centre of gravity of acquisition research has shifted from syntactic and phonological description to the amor phous domains of semantics and pragmatics This shift is reflected in the two large sections II and III devoted to these aspects of language development In addition the volume contains three smaller sections dealing with general problems of acquisition theory syntax and the development of comprehension and applied developmental psycholinguistics Volume 2 contains a substantial section of papers which stress the formal aspects of psycholinguistics these include papers in which artificial intelligence figures prominently papers which apply re cent developments in syntax and semantics to psycholinguistic prob lems and papers that are broadly critical of the use psychologists have made of linguistic theories Volume 2 also contains a section dealing with the experimental study of sentence comprehension and production and there is a final section concerned with phonology and its development The Oxford Handbook of Psycholinguistics Shirley-Ann Rueschemeyer,M. Gareth Gaskell,2018-09-06 The ability to communicate quickly and flexibly through both spoken and written language is one of the defining characteristics of the human race Yet it remains a mysterious process The science of psycholinguistics attempts to uncover the mechanisms and representations underlying human language This interdisciplinary field has seen massive developments over the last decades with a broad expansion of the research base and the incorporation of new experimental techniques such as brain imaging and computational modelling The result is that real progress is being made in the understanding of the key components of language in the mind This new and expanded edition of The Oxford Handbook of Psycholinguistics brings together the views of over 80 experts in various domains of psycholinguistic research offering a comprehensive and authoritative review of the field With contributions from the fields of psychology linguistics cognitive neuroscience attention genetics development and neuropsychology divided into five themed sections this new edition of The

Oxford Handbook of Psycholinguistics is unparalleled in its breadth of coverage The comprehensive nature of this book coupled with the accessibility of the short chapter format makes this handbook essential reading for students and researchers in the fields of psychology linguistics and neuroscience   Sociolinguistics / Soziolinguistik. Sedelow,Sally Yeates Sedelow,2011-06-03 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing   **Aspects of Automated Natural Language Generation** Robert Dale,1992-03-25 This volume presents the proceedings of the Sixth International Workshop on Automated Natural Language Generation held in Castel Ivano Trento Italy April 5 7 1992 Besides an invited lecture by Nadia Magnenat Thalmann a well known researcher in computer animation on creating and visualizing speech and emotion the volume includes the 17 thouroughly reviewed papers accepted for presentation selected out of the submissions to the Workshop as well as 11 statements contributed to panels on multilinguality and generation or extending language generation to multiple media The accepted papers by leading researchers from Japan North America and Europe fall in sections on generator system architecture issues in realisation issues in discourse structure and beyond traditional generation   Language Development: Syntax and semantics Stan A.

Kuczaj,1982 First published in 1981 Routledge is an imprint of Taylor Francis an informa company **Regressions in Mental Development** Thomas G. Bever,2017-12-06 Science depends on noticing that things which seem identical are different and conversely In psychology one cannot assume that apparently identical behaviours are due to identical mechanisms The work reported in this book involves the problem of classifying the true nature of behaviour as it appears during child development Originally published in 1982 the papers in this volume attempt to interpret explain or explain away developmental regressions in a variety of different areas In spring 1975 a group of scholars interested in such problems met for several days to discuss their individual findings and the underlying theoretical issues This volume reflects both the discussions at the original conference and succeeding years of thinking reading and writing **Linguistic Structure in Language Processing** G.N. Carlson,M.K. Tanenhaus,2012-12-06 The papers in this volume are intended to exemplify the state of experimental psycho linguistics in the middle to later 1980s Our over riding impression is that the field has come a long way since the earlier work of the 1950s and 1960s and that the field has emerged with a renewed strength from a difficult period in the 1970s Not only are the theoretical issues more sharply defined and integrated with existing issues from other domains modularity being one such example but the experimental techniques employed are much more sophisticated thanks to the work of numerous psychologists not necessarily interested in psycholinguistics and thanks to improving technologies unavailable a few years ago for instance eye trackers We selected papers that provide a coherent overall picture of existing techniques and issues The volume is organized much as one might organize an introductory linguistics course beginning with sound and working up to mean ing Indeed the first paper Rebecca Treiman s begins with considera tion of syllable structure a phonological consideration and the last Alan Garnham s exemplifies some work on the interpretation of pro nouns a semantic matter In between are found works concentrating on morphemes lexical structures and syntax The cross section represented in this volume is by necessity incom plete since we focus only on experimental work directed at under standing how adults comprehend and produce language We do not include any works on language acquisition first or second *Message Production* John O. Greene,2013-11-05 The last two decades have seen the development of a number of models that have proven particularly important in advancing understanding of message production processes Now it appears that a second generation of theories is emerging one that reflects considerable conceptual advances over earlier models Message Production Advances in Communication Theory focuses on these new developments in theoretical approaches to verbal and nonverbal message production The chapters reflect a number of characteristics and trends resident in these theories including the nature and source of interaction goals the impact of physiological factors on message behavior the prominence accorded conceptions of goals and planning attempts to apply models of intra individual processes in illuminating inter individual phenomena treatments which involve hybrid intentional design stance approaches and efforts to incorporate physiological constructs and to meld them with psychological and social terms The processes underlying the

production of verbal and nonverbal behaviors are exceedingly complex so much so that they resist the development of unified explanatory schemes The alternative is the mosaic of emerging theories such as are represented in this book each approach according prominence to certain message production phenomena while obscuring others and providing a window on some portion of the processes that give rise to those phenomena while remaining mute about other processes The amalgam of these disparate treatments then becomes the most intellectually compelling characterization of message production processes **Language Interpretation and Communication** D. Gerver,2013-03-09 Language Interpretation and Communication a NATO Symposium was a multi disciplinary meeting held from September 26 to October 1st 1977 at the Giorgio Cini Foundation on the Isle of San Giorgio Maggiore in Venice The Symposium explored both applied and theoretical aspects of conference interpre tation and of sign language interpretation The Symposium was sponsored by the Scientific Affairs Division of the North Atlantic Treaty Organisation and we would like to express our thanks to Dr B A Bayrakter of the Scientific Affairs Division and to the Members of the NATO Special Programme Panel on Human Factors for their support We would also like to thank Dr F Benvenutti and his colleagues at the University of Venice for their generous provision of facilities and hospitality for the opening session of the Symposium Our thanks are also due to Dr Ernesto Talentino and his colleagues at the Giorgio Cini Foundation who provided such excellent conference facilities and thus helped ensure the success of the meeting Finally we would like to express our appreciation and thanks to Becky Graham and Carol Blair for their invaluable contributions to the organization of the Symposium to Ida Stevenson who prepared these proceedings for publication and to Donald I MacLeod who assisted with the final preparation of the manuscript **Handbook of Cognitive Linguistics** Ewa Dabrowska,Dagmar Divjak,2015-05-19 Cognitive Linguistics is an approach to language study based on the assumptions that our linguistic abilities are firmly rooted in our cognitive abilities that meaning is essentially conceptualization and that grammar is shaped by usage The Handbook of Cognitive Linguistics provides state of the art overviews of the numerous subfields of cognitive linguistics written by leading international experts which will be useful for established researchers and novices alike It is an interdisciplinary project with contributions from linguists psycholinguists psychologists and computer scientists which will emphasise the most recent developments in the field in particular the shift towards more empirically based research In this way it will we hope help to shape the field encouraging methodologically more rigorous research which incorporates insights from all the cognitive sciences Editor Ewa D browska was awarded the Alexander von Humboldt Professorship 2018 **The Psychology of Written Composition** Carl Bereiter,Marlene Scardamalia,2013-11-05 First Published in 1987 Part of a series on the psychology of education and instruction this volume marks a highpoint in the development on writing from a cognitive perspective It significantly expands the data base upon which our understanding of writing rests the book presents an original theory or at any rate the beginnings of a theory of writing and the development of writing skills emphasizing the control processes in writing
