Schram, Joseph A. Schwartz, Stephen G. Tibbetts, 2023-10-24 If you are considering a career in any aspect of criminal justice and you want to know more about the motivations and socio psychological makeup of serious offenders then this book is for you Introduction to Criminology Why Do They Do It applies the dominant theories in the existing criminological literature as to why people commit crimes In addition we examine many recent as well as many hypothetical examples of serious crimes and we demonstrate applications of theory as to why the offenders did what they did While other textbooks do a decent job in discussing the basic theories as well as exploring the various types of crime our book integrates various street crimes within each chapter and applies theories that are appropriate in explaining such criminal activity This is extremely important because most instructors never get to the latter typology chapters in a given semester or term So our approach is to incorporate them into the theoretical chapters in which they apply directly to the theories presented Our specific examples and true stories such as notable serial killings and other recent crimes in each chapter as well as our use of established theoretical models to explain the offenses is another primary distinction of this book Obviously this book is meant to be central to an introductory course in criminology but due to the emphasis on applied theoretical explanations it is also appropriate for higher level undergraduate and graduate courses in criminological theory or as a reference for anyone in the field of criminal justice In it we have integrated true crimes and some hypothetical examples both on a general level such as in the Applying Crime to Theory sections and more specifically in the Why Do They Do It sections which often involve serial killings mass murderers or other notorious examples of offenders offending The subtitle of our book Why Do They Do It relates to our theme Our goal in writing this book was to apply

established theories of crime which are often seen as abstract and hypothetical to real crimes that have occurred as well as to hypothetical ones that are quite likely to occur To this end we explore the various reasons for offending or the why they do it in various cases from the first documented serial killers in the United States the Harpe Brothers in the late 18th century to California cop killer spree killer Christopher Dorner in 2013 and then Payton S Gendron who massacred 10 Black shoppers at a grocery store in Buffalo New York in 2022 Importantly throughout these discussions of actual crimes we will apply theories As you will see some of the theories that applied to the earliest crimes seem to apply to the most modern crimes as well Unlike other authors in this field we chose not to include separate chapters on violent or property crimes because we have worked those into and applied them to the theories explored in each chapter We strongly believe that by integrating discussions of such serious crimes all crimes previously identified by the FBI as Index or Part I offenses including murder rape robbery aggravated assault burglary motor vehicle theft larceny and arson as well as other crimes such as simple assault and driving under the influence into the theoretical chapters provides the best exploration of why people commit such offenses And the flip side is good as well by discussing offenses together with theories we show you how to apply theories toward explaining other instances of criminal behavior Again this goes back to our theme of why do they do it It

demonstrates our goal Apply the appropriate theories for the specific crime **Handbook of Clinical Sexuality for Mental Health Professionals** Stephen B. Levine, Candace B. Risen, Stanley E. Home Will Never Be the Same Again Carol R. Hughes, Bruce R. Fredenburg, 2020-06-22 Adult children are often overlooked and forgotten when their parents divorce later in life but in these pages they will find comfort and understanding for the many feelings frustrations and challenges they face For more than two decades a silent revolution has been occurring and creating a seismic shift in the American family and families in other countries It has been unfolding without much comment and its effects are being felt across three to four generations more couples are divorcing later in life Called the gray divorce revolution the cultural phenomenon describes couples who divorce after the age of 50 Overlooked in the issues that affect couples divorcing later in life are the adult children of divorcing parents Their voices open this book and they are the voices of men and women 18 to 50 years old Some of them are single some are married Some have children of their own All of them are in different stages of shock fear and sudden dramatic change In Home Will Never Be the Same A Guide for Adult Children of Gray Divorce Carol Hughes and Bruce Fredenburg share their deep understanding gained during the innumerable hours they have spent with these women and men in their clinical practices The result is a valuable resource for these too often forgotten adult children many of whom find that whenever they express their feelings and experiences the most important people in their lives frequently ignore and dismiss them As the divorce rate for older adults soars so too does

the number of adult children who are experiencing parental divorce Yet these adult children frequently say that they are the only ones who are aware of what they are going through no one understands what they are experiencing and they feel painfully alone

Hope Under Oppression Katie Stockdale, 2021-06-17 We have all been told at one time or another to never give up hope It s a common injunction to children but as we grow older sustaining hope becomes more challenging particularly in a world we come to see as often frightening dark and unjust But what is this thing hope and why is hope so valuable that we are so often urged to preserve and protect it This book explores the nature and essential role of hope in human life under conditions of oppression Oppression is often a threat and damage to hope yet many members of oppressed groups including prominent activists pursuing a more just world find hope valuable and even essential to their personal and political lives Katie Stockdale offers a unique evaluative framework for hope that captures its intrinsic value the rationality and morality of hope and ultimately how we can hope well in the non ideal world we share She develops an account of the relationship between hope and anger about oppression and argues that when people are angry about oppression they tend to also harbour hope for repair When people s hopes for repair are not realized as is often the case for those who are oppressed their anger can evolve into bitterness They feel unresolved anger as a result of losing hope that injustice will be sufficiently acknowledged and addressed Fortunately things do not have to be this way Even when people may feel that they have lost all hope faith can help them to be resilient in the face of oppression They can join with others who share their experiences or commitments for a better world uniting with them in collective action By doing so they can strengthen hope for the future when hope might otherwise be lost Ultimately this work illustrates the crucial value of hope for both individuals and collectives in the pursuit of justice and in an increasingly uncertain world

Handbook of Motivation and Cognition Across Cultures Richard Sorrentino, Susumu Yamaguchi, 2011-04-28 In recent years there has been a wealth of new research in cognition particularly in relation to supporting theoretical constructs about how cognitions are formed processed reinforced and how they then affect behavior Many of these theories have arisen and been tested in geographic isolation It remains to be seen whether theories that purport to describe cognition in one culture will equally prove true in other cultures The Handbook of Motivation and Cognition Across Cultures is the first book to look at these theories specifically with culture in mind The book investigates universal truths about motivation and cognition across culture relative to theories and findings indicating cultural differences Coverage includes the most widely cited researchers in cognition and their theories as seen through the looking glass of culture The chapters include self regulation by Tory Higgins unconscious thought by John Bargh attribution theory by Bernie Weiner and self verification by Bill Swann among others The book additionally includes some of the best new researchers in cross cultural psychology with contributors from Germany New Zealand Japan Hong Kong and Australia In the future culture may be the litmus test of a theory before it is accepted and this book brings this question to the forefront of cognition research Includes contributions from researchers from Germany New Zealand Japan Hong Kong

and Australia for a cross cultural panel Provides a unique perspective on the effect of culture on scientific theories and data
