problems in many disciplines such as engineering computer science operations research transportation telecommunication and manufacturing The book extensively covers algorithms and applications including shortest path problems minimum cost flow problems maximum flow problems minimum spanning tree problems traveling salesman and postman problems location allocation problems project scheduling problems multistage based scheduling problems logistics network problems communication network problem and network models in assembly line balancing problems and airline fleet assignment problems The book can be used both as a student textbook and as a professional reference for practitioners who use network optimization methods to model and solve problems

Reformulation and Acquisition of Linguistic Complexity Claire Martinot, Tomislava Bošnjak Botica, Sonia Gerolimich, Urszula Paprocka-Piotrowska, 2019-03-07 Reformulation and Acquisition of Linguistic Complexity proposes a new answer to the question of the appropriation or acquisition of a mother tongue a complex object one that is both stable and perpetually evolving This answer is based on the reformulating principle that children spontaneously apply a principle that is illustrated here with children retelling the same story These children are all 6 8 or 10 years old and speak French Italian Croatian or Polish as a first language This book demonstrates that the acquisition of any mother tongue is explained by the application of various reformulation procedures between source predications and reformulated predications These procedures are comparable from one language to another and different from one age group to another This book also studies certain complex phenomena at the lexical and syntactical levels and analyzes how children depending on their age treat these phenomena Finally we show that the acquisition of a mother tongue is a fundamentally linguistic activity
