**Cyber-physical Systems and Digital Twins** Michael E. Auer, Kalyan Ram B., 2019-07-10 This book constitutes the proceedings of the 16th International Conference on Remote Engineering and Virtual Instrumentation REV held at the BMS College of Engineering Bangalore India on 3-6 February 2019. Today online technologies are at the core of most fields of engineering as well as of society as a whole and are inseparably connected with Internet of Things, cyber physical systems, collaborative networks and grids, cyber cloud technologies, service architectures, to name but a few. Since it was first held in 2004, the REV conference has focused on the increasing use of the Internet for engineering tasks and the problems surrounding it. The 2019 conference demonstrated and discussed the fundamentals, applications and experiences in the field of online engineering and virtual instrumentation. It also presented guidelines for university level courses on these topics in view of the increasing globalization of education and the demand for teleworking, remote services and collaborative working environments.

*Digital Literacy at the Intersection of Equity, Inclusion, and Technology* Prager, Katelyn Burton, Bilge, Nurhayat, 2024-08-15 At the forefront of contemporary higher education lies a need for a profound exploration of the relationships between equity, inclusion and digital technologies. Across diverse disciplines, students and faculty grapple with the far-reaching impacts of this complex interplay. As our educational landscape transforms at an unprecedented pace, a national and global imperative emerges: the necessity for a deeper understanding of the challenges posed by digital technologies. In response to this call, the book titled *Digital Literacy at the Intersection of Equity, Inclusion, and Technology* serves as a resource to help educators. This book seeks to unravel the issues that permeate the educational sphere, fostering broader multidisciplinary conversations. It is a pivotal resource designed to empower teacher-scholars as they navigate the swiftly evolving terrain of the digital age. The primary objective of this text is to examine the intersection of equity, inclusion and digital pedagogies. It embarks on a journey to explore how educators can harness the power of technology to create learning environments that are inherently equitable, both online and offline. Not merely theoretical, this book is a blend of insightful theoretical chapters on equitable digital pedagogies and a wealth of practical materials, including assignments, syllabi and course program designs. This compilation is a compass for teacher-scholars navigating the nuanced terrain of leveraging technology to foster thoughtful digital citizens, merging theory with actionable strategies.

*ITJEMAST 12(3) 2021*, 2021-03-01 Internet and Society in Latin America and the Caribbean International Development Research Centre (Canada), 2004 This book presents pioneering research that is designed to show from a qualitative and ethnographic perspective how new information and communication technologies, as applied to the school system and to local governance initiatives, merely reproduce traditional pedagogical approaches and the dominant forms by which power is exercised at the local level. The studies thus constitute points of departure for further thinking about the need to promote an Internet culture based on the social application of a OC right to communication and culture, OCO and an OC Internet right, OCO that will permit the establishment of true citizen participation and free access to knowledge with due regard to personal and
