Spirits of Blood, Spirits of Breath Barbara Alice Mann, 2016-01-06

Before invasion Turtle Island or North America was home to vibrant cultures that shared long standing philosophical precepts The most important and wide spread of these was the view of reality as a collaborative binary known as the Twinned Cosmos of Blood and Breath This binary system was built on the belief that neither half of the cosmos can exist without its twin Both halves are therefore necessary and good Western anthropologists typically shorthand the Twinned Cosmos as Sky and Earth but this erroneously saddles it with Christian baggage and worse imposes a hierarchy that puts sky quite literally above earth None of this Western ideology legitimately applies to traditional Indigenous American thought which is about equal cooperation and the continual recreation of reality *Spirits of Blood Spirits of Breath* examines traditional historical concepts of spirituality among North American Indians both at and to the extent it can be determined before contact In doing so Barbara Alice Mann rescues the authentically indigenous ideas from Western and especially missionary interpretations In addition to early European source material she uses Indian oral traditions traced as much as possible to their earliest versions and sources and Indian records including pictographs petroglyphs bark books and wampum Moreover Mann respects each Indigenous culture as a discrete unit rather than generalizing them as is often done in Western anthropology To this end she collates material in accordance with actual historical linguistic and traditional linkages among the groups at hand with traditions clearly identified by group and where recorded by speaker In this way she provides specialists and non specialists alike a window into the purportedly lost and often caricatured world of Indigenous American thought

Charlesworth, 2010-01-01 The serpent of ancient times was more often associated with positive attributes like healing and eternal life than it was with negative meanings This groundbreaking book explores in plentiful detail the symbol of the serpent from 40 000 BCE to the present and from diverse regions in the world In doing so it emphasizes the creativity of the biblical authors use of symbols and argues that we must today reexamine our own archetypal conceptions with comparable creativity From publisher description **Yaxchilan** Carolyn E. Tate, 2013-08-28 As archaeologists peel away the jungle covering that has both obscured and preserved the ancient Maya cities of Mexico and Central America other scholars have only a limited time to study and understand the sites before the jungle weather and human encroachment efface them again perhaps forever This urgency underlies Yaxchilan The Design of a Maya Ceremonial City Carolyn Tate's comprehensive catalog and analysis of all the city's extant buildings and sculptures During a year of field work Tate fully documented the appearance of the site as of 1987 For each sculpture and building she records its discovery present location condition measurements and astronomical orientation and reconstructs its Long Counts and Julian dates from Calendar Rounds Line drawings and photographs provide a visual document of the art and architecture of Yaxchilan More than mere documentation however the book explores the phenomenon of art within Maya society Tate establishes a general framework of cultural practices spiritual beliefs and knowledge likely to have been shared by eighth century Maya people The process of making public art is considered in relation to other modes of aesthetic expression such as oral tradition and ritual This kind of analysis is new in Maya studies and offers fresh insight into the function of these magnificent cities and the powerful role public art and architecture play in establishing cultural norms in education in a semiliterate society and in developing the personal and community identities of individuals Several chapters cover the specifics of art and iconography at Yaxchilan as a basis for examining the creation of the city in the Late Classic period Individual sculptures are attributed to the hands of single artists and workshops thus aiding in dating several of the monuments The significance of headdresses backracks and other costume elements seen on monuments is tied to specific rituals and fashions and influence from other sites is traced These analyses lead to a history of
