Canada's Other Red Scare Scott Rutherford, 2020-12-17 Indigenous activism put small town northern Ontario on the map in the 1960s and early 1970s Kenora Ontario was home to a four hundred person march popularly called Canada's First Civil Rights March and a two month long armed occupation of a small lakefront park Canada's Other Red Scare shows how important it is to link the local and the global to broaden narratives of resistance in the 1960s it is a history not of isolated events closed off from the present but of decolonization as a continuing process Scott Rutherford explores with rigour and sensitivity the Indigenous political protest and social struggle that took place in Northwestern Ontario and Treaty 3 territory from 1965 to 1974 Drawing on archival documents media coverage published interviews memoirs and social movement literature as well as his own lived experience as a settler growing up in Kenora he reconstructs a period of turbulent protest and the responses it provoked from support to disbelief to outright hostility Indigenous organizers advocated for a wide range of issues from better employment opportunities to the recognition of nationhood by using such tactics as marches cultural production community organizing journalism and armed occupation They drew inspiration from global currents from black American freedom movements to Third World decolonization to challenge the inequalities and racial logics that shaped settler colonialism and daily life in Kenora Accessible and wide reaching Canada's Other Red Scare makes the case that Indigenous political protest during this period should be thought of as both local and transnational an urgent exercise in confronting the experience of settler colonialism in places and moments of protest when its logic and acts of dispossession are held up like a mirror

We Believe the Children Richard Beck, 2015-08-04 Of the many hundreds of people who were investigated in connection with day care and ritual abuse cases around the country some 190 were formally

charged with crimes leading to more than 80 convictions But none of it happened It was a decade long outbreak of collective hysteria on a par with the Salem witch trials Using extensive archival research conducted in Los Angeles Miami New York Minneapolis and elsewhere and drawing on dozens of interviews conducted with the hysteria s major figures n 1 editor Richard Beck shows how a group of legislators doctors lawyers and parents most working with the best of intentions set the stage for a cultural disaster Psychiatrists and talk therapists turned dubious theories of trauma and recovered memory into a destructive new kind of psychotherapy Social workers and detectives employed coercive interviewing techniques that led children to tell them what they wanted to hear *Debating Dissent* Gregory S. French political culture has long been seen as a model of leftist militancy while the left in the United States is often perceived in terms of organizational discontinuity Yet the crisis of social democracy today suggests that at a time when the archetypal European welfare state is in danger critics and citizens interested in understanding or reviving progressive politics are invited to consider the United States where modes of creative activism recurrently demonstrate potentialities for a renewed leftist culture Using a transatlantic perspective this volume identifies activist influence through the designation or rejection of specific intellectual and militant figures across generations and it examines various narrative modes used by militants to write their own history *The Oxford Encyclopedia of Women in World History* Bonnie G. Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune women's and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike

American Culture in the 1960s Sharon Monteith, 2008-10-08 This book charts the changing complexion of American culture in one of the most culturally vibrant of twentieth century decades It provides a vivid account of the major cultural forms of 1960s America music and performance film and television fiction and poetry art and photography as well as influential texts trends and figures of the decade from Norman Mailer to Susan Sontag from Muhammad Ali's anti war protests to Tom Lehrer's stand up comedy from Bob Dylan to Rachel Carson and from Pop Art to photojournalism A chapter on new social movements demonstrates that a current of conservatism runs through even the most revolutionary movements of the 1960s and the book as a whole looks to the West and especially to the South in the making of the sixties as myth and as history *Hall-Dennis and the Road to Utopia* Josh Cole, 2021-07-15 The quarter century that followed the end of the Second World War was marked by intense social and economic transformation the changing face of postwar capitalism a revolution

in communications technology the rise of youth culture and the pronounced ascent of individual freedom all contributed to a dramatic push to remake and thus improve society This push was especially felt within education the primary vehicle for modernizing the postwar world from the ground up Hall Dennis and the Road to Utopia explores this moment of renewal through a powerful and influential education reform project 1968 s Living and Learning The Report of the Provincial Committee on Aims and Objectives of Education in the Schools of Ontario The Hall Dennis report as it became known urged Ontarians to accept a new vision of education in which students were no longer organized in classes their progress no longer measured by grades and their experience no longer characterized by the painful acquisition of subjects but rather by a joyous and open ended process of learning This new democratic system of education was associated with the highest ideals of postwar progress liberalism and humanism yet its recommendations were paradoxically both profoundly radical and fundamentally conservative Its avant garde research strategies and controversial post literate curricular reforms were balanced by a pedagogical approach designed to mould students into obedient citizens and productive economic actors As Canadians once again find themselves asking fundamental questions about the aims and objectives of education under radically changing circumstances Josh Cole revisits Hall Dennis to show how the committee and its report represent a significant moment in Canadian cultural and political history a prescient document in the history of education and a revealing expression of the fragmentary circumstances of global modernity in the second half of the twentieth century

The Battle for Christian Britain Callum G. Brown, 2019-10-17 Exposes the mechanisms by which conservative Christianity dominated British culture during 1945 65 and their subsequent collapse

Lee Lozano Jo Applin, 2018-01-01 An illuminating study of an overlooked artist from the 1960s whose work has recently returned to the limelight This is the first in depth study of the idiosyncratic ten year career of Lee Lozano 1930 1999 assuring this important artist a key place in histories of post war art The book charts the entirety of Lozano s production in 1960s New York from her raucous drawings and paintings depicting broken tools genitalia and other body parts to the final exhibition of her spectacular series of abstract Wave Paintings at the Whitney Museum of American Art in 1970 Highly regarded at the time Lozano is now perhaps best known for Dropout Piece 1970 a conceptual artwork and dramatic gesture with which she quit the art world Shortly afterwards she announced she would have no further contact with other women Her dropout and boycott of women lasted until her death by which time she was all but forgotten This book tackles head on the challenges that Lozano poses to art history and especially to feminist art history attending to her failures as well as her successes and arguing that through dead ends and impasses she struggled to forge an alternative mode of living

Lee Lozano Not Working looks for the means to think about complex figures like Lozano whose radical politically ambiguous gestures test our assumptions about feminism and the right way to live and work

Hippies Micah Issitt, 2009-10-22 An insightful introduction to hippie culture and how its revolutionary principles in the 1960s helped shape modern culture This title explores how hippies and 1960s counterculture in general developed and

Sonic Interventions makes a compelling case for the importance of sound in theorizing literature subjectivity and culture Sound is usually understood as our second sense and as our belief in a visually dominated culture prevails remains of secondary interest Western cultures are considered to be predominantly visual while other societies are thought to place more importance on the acoustic dimension This volume questions these assumptions by examining how sound differs from and acts in relationship to the visual It moves beyond theoretical dichotomies between the visual and the sonic the oral and literature and instead investigates sonic interventions in their often multi faceted forms The case studies deal with political appropriations of music and sounds they explore the poetic use of the sonic in novels and plays they develop theoretical concepts out of sonic phenomena and pertain to identity formation and the practice of mixing in hip hop opera and dancehall sessions Ultimately the book brings to the fore what roles sound may play for the formation of gendered identity for the stabilization or questioning of race as a social category and the conception of place Their intricate interventions beckon critical attention and offer rich material for cultural analysis *Pop Goes the Decade* Martin Kich,Aaron Barlow,2020-01-07
