Shame And Jealousy The Hidden Turmoils:

Shame and Jealousy Phil Mollon, 2018-04-24 A volume in the Psychoanalytic Ideas Series published for the Institute of Psychoanalysis by Karnac Here shame and jealousy are examined as hidden turmoils as basic human feelings found in everyone but often suppressed and neglected An unfulfilled need unanswered plea for help and failure to connect with and understand other people are all underlying causes for shame and feeling inadequate The author argues that feelings of shame form an intrinsic part of the analytic encounter but astonishingly this shame laden quality of the psychoanalytic and psychotherapeutic setting is rarely addressed This lucidly written and much needed volume explores the profound effects shame and jealousy can have on self esteem and how this can eventually lead to a chronic condition

Jealousy: A Forbidden Passion Giulia Sissa, 2017-11-10 Amorous jealousy is not a monster as Shakespeare's venomous Iago claims It is neither prickly and bitter fancy nor a cruel and mean passion nor yet a symptom of feeble self esteem All those who have experienced its wounds are well aware that it is not callous nasty delusional and ridiculous It is just painful Yet for centuries moralists have poured scorn and contempt on a feeling that in their view we should fight in every possible way It is allegedly a disease to be treated a moral vice to be eradicated an ugly pre modern illiberal proprietary emotion to be overcome Above all no one should ever admit to being jealous So should we silence this embarrassing sentiment Or should we like the heroines of Greek tragedy see it as a fundamental human demand for reciprocity in love By examining its cultural history from the ancient Greeks to La Rochefoucauld Hobbes Kant Stendhal Freud Beauvoir Sartre and Lacan this book demonstrates how jealousy far from being a green eyed fiend reveals the intense and apprehensive nature of all erotic love which is the desire to be desired We should never be ashamed to love

Saving Face Stephen Pattison, 2016-04-01 Faces are all around us and fundamentally shape both everyday experience and our

understanding of people To lose face is to be alienated and experience shame to be enfaced is to enjoy the fullness of life In theology as in many other disciplines faces as both physical phenomena and symbols have not received the critical appreciative attention they deserve This pioneering book explores the nature of face and enfacement both human and divine Pattison discusses questions concerning what face is how important face is in human life and relationships and how we might understand face both as a physical phenomenon and as a series of socially inflected symbols and metaphors about the self and the body Examining what face means in terms of inclusion and exclusion in contemporary human society and how it is related to shame Pattison reveals what the experience of people who have difficulties with faces tell us about our society our understandings of and our reactions to face Exploring this ubiquitous yet ignored area of both contemporary human experience and of the Christian theological tradition Pattison explains how Christian theology understands face both human and divine and the insights might it offer to understanding face and enfacement Does God in any sense have a physically visible face What is the significance of having an enfaced or faceless God for Christian life and practice What does the vision of God mean now If we want to take face and defacing shame seriously and to get them properly into perspective we may need to change our theology thought and practice changing our ways of thinking about God and about theology

Troubled People, Troubled World Michael Briant,2025-03-04 Ethical issues are the stuff of psychotherapy and in fact Freud envisaged the process as one in which an

unexamined irrational and oppressive conscience gives way to one more benignly rooted in reason Therapists endeavour to be non judgemental and indeed are no more qualified to pass judgement on others than anyone else do they nevertheless learn anything about ethics from their disciplined listening The same question was asked after the war about the persecution of the Jews and other minorities and it s a very live issue again faced as we are by movements like ISIS or Putinism in Russia that cause great suffering in the name of religious or moral regeneration a bewildering paradox that David Astor former editor of The Observer called the scourge Can psychotherapy throw any light on it or contribute any ideas as to how we might contain if not prevent the barbarism it sanctions Can it offer any insights into a different more inclusive kind of ethics and if so can we glean any guidance from it as to how we might further it These are the questions the author explores drawing on psychoanalytic thinking on these issues for over a century and illustrated by his work with individuals over four decades

Emotional Labour and Lesson Observation Ursula Edgington, 2016-11-21 This book presents research on emotion work and the emotional labour of teaching and learning based in England's further education sector where an increasing emphasis on marketised systems means accountability and audit cultures have become embedded within everyday teaching practice Uniquely this book explores micro level issues of the managerial policies relating to classroom lesson observations as well as the profoundly emotional philosophical aspects of these situations which research asserts cause stress and anxiety for many staff Drawing on theoretical psychosocial concepts exploring the interplay of hidden or underground micro and macro elements of teaching and learning contexts the book illuminates how the presence of an observer fundamentally alters the dynamics of a classroom The author argues that it is not necessarily the performativity that creates the stress and anxiety in an observation but the individual's perception of this performativity and how it relates to a wider consideration of their emotional labour in the classroom For this reason the book puts forward a case for ending the formal graded method of lesson observations in favour of a developmental holistic approach that is sensitive to the emotional nuances of the individuals involved as well as the social and historical contexts of the institutions in which they are situated The diverse use of lesson observations as a tool for staff development and quality assurance policies make this a valuable resource for educational researchers policy makers teachers and managers from many different sectors and backgrounds

Violent States and Creative States (2 Volume Set) John Adlam, Tilman Kluttig, Bandy Lee, 2018-05-03 This is a provocative collection exploring the different types of violence and how they relate to one another examined through the integration of several disciplines including forensic psychotherapy psychiatry sociology psychosocial studies and political science By examining the violent states of mind behind specific forms of violence and the social and societal contexts in which an individual act of human violence takes place the contributors reveal the dynamic forces and reasoning behind specific forms of violence including structural violence and conceptualise the societal structures themselves as violent states Other research often stops short at examining the causes and risk factors for violence without considering the opposite states that may not only mitigate but allow for a different unfolding of individual and societal evolution As a potential antidote to violence the authors prescribe an understanding of these creative states with their psychological origins and their importance in human behaviour

and meaning seeking Making a call to move beyond merely mitigating violence to the opposite direction of fostering creative potential this book is foundational in its capacity to cultivate social consciousness and effect positive change in areas of governance policy making and collective responsibility This two volume set includes Volume 1 Structural Violence and Creative Structures ISBN 9781785925641 Volume 2 Human Violence and Creative Humanity ISBN 9781785925658 The Space Between Carmel Flaskas, Barry Mason, Amaryll Perlesz, 2018-05-08 The papers in this book focus on many different aspects of the therapeutic relationship including the self of the therapist working cross culturally and with language difference impasse risk taking the place of research and the influence of theory Clinical examples illustrate successful as well as less successful outcomes in therapy and these clinical explorations make the book accessible to both systemic and non systemic practitioners alike Part of the Systemic Thinking and Practice Series Contributors Rhonda Brown John Burnham John Byng Hall Alan Carr Carmel Flaskas Jo Howard Alfred Hurst Ellie Kavner Sebastian Kraemer Inga Britt Krause Rabia Malik Maeve Malley Michael Maltby Barry Mason Sue McNab Amaryll Perlesz David Pocock Hitesh Raval Justin Schlicht and Lennox K Thomas **Psychoanalytic Energy Psychotherapy** Phil Mollon, 2018-03-26 People like to talk We know that talking to an attentive and thoughtful listener can be helpful in clarifying conscious and unconscious feelings thoughts and motivations But is talk enough The complex physiology of anxiety and traumatic stress reactions is often stubbornly persistent despite therapeutic exploration in both conscious and unconscious areas of the mind In the case of severe trauma talking can stir up the emotions and associated bodily disturbance without providing any resolution sometimes leaving clients feeling worse The developing field of energy psychology offers an entirely new perspective and gamut of techniques for locating where these traumatic patterns are encoded They are not in the mind but in the energy system at the interface of psyche and soma By addressing these realms concurrently a powerful therapeutic synergy emerges that allows rapid and deep shifts in the patterns of distress that drive the psychosomatic system
