Shape Of This Century:

Interpreting the Seventh Century BC Xenia Charalambidou, Catherine Morgan, 2017-08-31 This book has its origin in a conference held at the British School at Athens in 2011 which aimed to explore the range of new archaeological information now available for the seventh century in Greek lands Archaeologia, Or, Miscellaneous Tracts Relating to Antiquity, 1922

Morgantina Studies, Volume VI Shelley C. Stone, 2015-01-25 Excavation of the ancient city of Morgantina in southeastern Sicily since 1955 has recovered an extraordinary quantity and variety of pottery both locally made and imported This volume presents the fine ware pottery dating between the second half of the fourth century BCE when Morgantina was a thriving inland center closely tied to the Hellenistic east through Syracuse and the first half of the first century CE when Morgantina had been reduced to a dwindling Roman provincial town that would soon be abandoned Bearing gloss and often paint or relief these fine ceramics were mostly tableware and together they provide a well defined picture of the evolving material culture of an important urban site over several centuries And since virtually all these vessels come from dated deposits this volume provides wide ranging contributions to the chronology of Hellenistic and early Roman pottery An introductory chapter sketches out a comprehensive history of the city discusses the many well dated archaeological deposits that contained the excavated pottery and defines the major fabrics of the ceramics found at the site The bulk of the volume consists of a scholarly presentation of more than 1 500 pottery vessels analyzing their shapes fabrics chronology decoration and techniques of fabrication This rich ceramic material includes significant bodies of Republican black gloss and red gloss vases Sicilian polychrome ware and Eastern Sigillata A as well as early Italian terra sigillata with numerous examples imported from Arezzo and other Italian centers along with regional versions from Campania and elsewhere on Sicily The relief ware includes important groups of third century BCE medallion cups and hemispherical moldmade cups of the second and first centuries BCE Morgantina was also an active center of pottery production and the debris from several workshops has been recovered enabling Shelley Stone to reconstruct the working techniques and materials of the local craftsmen the range of ceramics they produced and how their products were influenced by pottery imported to the site from elsewhere on Sicily the Italian mainland and even more distant centers The volume also presents new information about the sources of the clay used by the Morgantina potters as revealed by X ray fluorescence analysis of selected vases *Disability in Ancient Egypt and Egyptology* Alexandra F. Morris, Hannah Vogel, 2024-12-13 This book explores disability across time and space from ancient Egypt as a culture to Egyptology as a contemporary field to go beyond simply identifying disability encouraging readers to thoughtfully consider the history of disabled people in ancient Egypt and Egyptology Through a critical investigation this volume reshapes often overlooked narratives of disability within the discipline of Egyptology and Egyptian Archaeology Chapters explore evidence of disability the historiographical ways in which disability has been approached and how disability histories are mis represented in various contemporary spaces Coverage stretches across Egypt and Nubia from

the Predynastic to the Roman periods as well as receptions of these cultures and disability in museums Its editors and many of its authors are disability community members who are experts in their respective professions comprising an international authorship and including voices from typically underrepresented groups Contributors range from early career researchers to senior scholars as well as those working outside of and adjacent to academia While focusing on ancient Egypt and Egyptology this volume offers new ways to consider disability in the broadest possible sense It uses terminology informed by the disability community and offers guidance for disability inclusivity in curatorial and pedagogical museum and university contexts It prioritises disability as an essential area of research in ancient world studies and platforms both ancient and modern disabled voices The deep detailed exploration into disability in the past and in our discipline offered by this book inspires readers to further explore and appreciate the infinite diversity of the human experience in all its infinite combinations The first book length treatment of the subject Disability in Ancient Egypt and Egyptology provides a much needed resource for students and scholars of ancient Egypt Egyptology and disability in the ancient world It is also suitable for researchers in Disability Studies practitioners in broader ancient world studies and museum and heritage professionals Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Peerless Images Vice-President Eleanor G Sims, Eleanor Sims, Boris Il'ich Marshak, Ernst J. Grube, Boris Marshak, I., 2002-01-01 This book is the first survey of the figural arts of the Iranian world from prehistoric times to the early twentieth century ever to consider themes rather than styles Analyzing primarily painting in manuscripts and albums on walls and on lacquered painted pen boxes and caskets but also the related arts of sculpture ceramics and metalwork the author finds that the underlying themes depicted on them through the ages are remarkably consistent Eleanor Sims demonstrates that all these arts display similar concerns kingship and legitimacy the righteous exercise of princely power and the defense of national territory and the performance of rituals and the religious duties called for by the paramount cult of the day She describes a variety of superb works of art inside and outside these categories noting not only how they illustrate archetypal themes but also what it is about them that is unique She also discusses the ways that Iranian art both influenced and was influenced by invaders and neighboring lands Boris I Marshak discusses pre Islamic and also Central Asian art in particular the earliest Iranian wall paintings and their pictorial parallels in rock carvings and metalwork and the richly painted temples and houses of Panjikent Ernst J Grube considers religious imagery and provides an informative bibliography

The Extramural Sanctuary of Demeter and Persephone at Cyrene, Libya, Final Reports, Volume VI T. V. Buttrey, Ian McPhee, 1998-01-29 Coins for reasons that do not always make sense are often treated by field excavators as more reliable chronological indexes than other classes of artifacts This always makes their discovery a welcome event especially when they are silver or gold which tend to survive in the ground in a more recognizable state than their bronze counterparts The Red Figure pottery does not have quite the same chronological relevance as the coins but does on occasion contribute to the dating of archaeological contexts Its often high quality and interesting variety of shapes has already generated commentary elsewhere in addition to what is presented here University Museum Monograph 97
