Shaping Space:

Shaping Space Paul Zelanski, Mary Pat Fisher, 2007 Introductory guide to three dimensional design and sculpture which offers an in depth exploration of aesthetic and practical considerations of working three dimensionally **Shaping Space** Marjorie Senechal, 2013-03-22 This second edition is based off of the very popular *Shaping Space A Polyhedral Approach* first published twenty years ago The book is expanded and updated to include new developments including the revolutions in visualization and model making that the computer has wrought *Shaping Space* is an exuberant richly illustrated interdisciplinary guide to three dimensional forms focusing on the surprisingly diverse world of polyhedra Geometry comes alive in *Shaping Space* as a remarkable range of geometric ideas is explored and its centrality in our culture is persuasively demonstrated The book is addressed to designers artists architects engineers chemists computer scientists mathematicians bioscientists crystallographers earth scientists and teachers at all levels in short to all scholars and educators interested in and working with two and three dimensional structures and patterns **Shaping Space and Mobilities in Contemporary**

Walking Narratives Adrien Frenay, Giulio Iacoli, Lucia Quaquarelli, 2024-12-22 *Shaping Space and Mobilities in Contemporary Walking Narratives* represents an exploration of the dynamic intersections between mobility space and literature By focusing on walking as both a practice and a narrative device the book illustrates how mobilities shape and reconfigure our experiences of space Drawing from both literary and interdisciplinary approaches the contributors engage with diverse themes including urban flânerie rural wanderings migration and queer spatialities The research presented here shows how literary discourse mediates and constructs human relationships with space and place Addressing with key theoretical movements such as the narrative spatial and mobilities turns this book contributes to the recent humanities turn by advancing discussions within mobility studies particularly in French and Italian contexts **Shaping Space**, 2005

Shaping Space Marjorie Senechal, George M. Fleck, 1988 **Light: The Shape of Space** Lou Michel, 1995-10-27 *Light The Shape of Space* Designing with Space and Light Lou Michel Every design professional who touches a space shapes the light and the feeling of that space Architect lighting engineer interior designer lighting or home furnishing manufacturer each contributes an aesthetic layer sometimes yielding unexpected results All too often the best laid plans of one professional are unintentionally subverted by another Removing surprises and guess work from design Lou Michel honored architectural lighting educator has created *Light The Shape of Space* showing how to design with the effects of light rather than light itself The book is a revolutionary resource for all design professionals and manufacturers of surfacing materials Drawing on over fifteen years experience of research and teaching in the architectural Space and Light Laboratory at The University of Kansas Michel masterfully examines the interrelationship of lighting and the design of architectural space as perceived not in architectural photos or paint chips and fabric swatches but by human vision the gateway to emotional response The book was written for professionals who care about how people feel in the spaces they design and focuses on the humanization of

architecture Taking a non stylistic approach to design Michel analyzes architecture from the perspective of how the users see their surroundings as they move through space The reader will learn what pleases and what disturbs people based on how the human visual system responds to color texture pattern and brightness The book features principles of design for the student and professional and is generously supported by illustrations and research Michel also provides a method for evaluating the visual effectiveness of building materials and lighting systems including those that will appear on the market long after this book is dog eared Michel unveils a groundbreaking luminance brightness rating system LBR and a nine zone brightness scale to aid designers in previsualizing the appearance of surfacing materials at every stage of the design process from schematics to development to refinement Among the topics treated are the interaction of lighting and spatial design color theory for space and light the luminance relationships between free standing objects and the surrounding spatial boundaries against which they are seen the appearance of building materials in color and brightness when modified by light and spatial location lighting spatial connections including the perception of rooms adjacent to the observer lighting and perception of spaces screened by architectural grilles creating lighted space Designing with the effects of light is both an art and a science No other book on the market bridges that gap as successfully as Light The Shape of Space Eloquent Spaces Shonaleeka Kaul,2019-04-25 Eloquent Spaces adopts the twin analytic of meaning and community to write a fresh history of building in early India It presents a new perspective on the principles and practices of early Indian architecture Defining it broadly over a range of space uses the book argues for architecture as a form of cultural production as well as public consumption Ten chapters by leading archaeologists architects historians and philosophers examining different architectural sites and landscapes including Sanchi Moodabidri Srinagar Chidambaram Patan Konark Basgo and Puri demonstrate the need to look beyond the built form to its spirit beyond aesthetics to cognition and thereby to integrating architecture with its myriad living contexts The volume captures some of the semantic diversity inherent in premodern Indian traditions of civic building both sacred and secular which were however unified in their insistence on enacting meaning and a transcendent validity over and above utility and beauty of form The book is a quest for a culturally rooted architecture as an alternative to the growing crisis of disembeddedness that informs modern praxis This volume will be of interest to scholars and practitioners of architecture ancient Indian history philosophy art history and cultural studies **Planting Design** Patrick Mooney,2019-10-30 Landscape designers have long understood the use of plants to provide beauty aesthetic pleasure and visual stimulation while supporting a broad range of functional goals However the potential for plants in the landscape to elicit human involvement and provide mental stimulation and restoration is much less well understood This book meshes the art of planting design with an understanding of how humans respond to natural environments Beginning with an understanding of human needs preferences and responses to landscape the author interprets the ways in which an understanding of the human environment interaction can inform planting design Many of the principles and techniques that

may be used in planting design are beautifully illustrated in full colour with examples by leading landscape architects and designers from the United Kingdom Europe North America and Asia including Andrea Cochran Landscape Architecture San Francisco CA Design Workshop Inc Richard Hartlage Land Morphology Seattle WA Shunmyo Masuno Japan Landscape Consultants Ltd Yokohama Piet Oudolf Hummelo The Netherlands Melody Redekop Vancouver Christine Ten Eyck Ten Eyck Landscape Architects Inc Austin TX Kongjian Yu Turenscape Ltd Beijing The book stimulates thought provides new direction and assists the reader to find their own unique design voice Because there are many valid processes and intentions for landscape design the book is not intended to be overly prescriptive Rather than presenting a strict design method and accompanying set of rules Planting Design provides information insight and inspiration as a basis for developing the individual designer's own expression in this most challenging of art forms

Movement Theresa Mitchell, 1998-02-19 The acting process is an interlocking trinity the person the actor and the character The person has habits and idiosyncrasies cultivated over the years in response to life experiences The actor may have developed another set of behaviors that manifest themselves during a performance The exercises within this text will guide the user toward making the necessary choices needed to achieve the extension of self to character whether that involves utilizing personal traits that are congruent to a character's make up or discarding personal habits which do not fit Movement From Person to Actor to Character concisely collects many common movement principles such as use of breath alignment relaxation imagery and surroundings Illustrations are included which provide the actor with a basic knowledge of the human body and function that can serve as a foundation for advanced movement techniques Case studies outline a variety of characterization projects from a range of well known plays to further illustrate some of the exercises within the text Mitchell's text will be useful for beginning to intermediate movement courses or as a supplement to acting or directing courses or by actors seeking to enrich their movement technique

Understanding Architecture Leland M. Roth, Amanda C. Roth Clark, 2024-07-18 The widely acclaimed and beautifully illustrated Understanding Architecture is now revised and expanded in its fourth edition vividly examining the structure function history and meaning of architecture from prehistory to the present in ways that are both accessible and engaging Significant features of the fourth edition include Expanded global essays outlining the encounters and interchanges conflicts and accommodations between disparate global communities A brand new final chapter addressing the twenty first century during which Western and global architectural developments have increasingly become one broad interwoven expression This chapter includes sections on CAD Contemporary Architecture of the Twenty First Century Architects Contemporary Architectural Prizes Architecture and Energy Consumption and Architecture Integrated with Nature New sections on Frank Lloyd Wright and Late Twentieth Century Expressionism Thoroughly revised and expanded illustration including over 700 images over half of which are in full color and 120 original line art drawings Understanding Architecture continues to be the only text in the field to examine architecture as a cultural phenomenon as well as an artistic

and technological achievement with its straightforward two part structure The Elements of Architecture and the History and Meaning of Architecture Comprehensive and clearly written Understanding Architecture is both a primer for visual environmental literacy and a classic survey of architecture This is an essential book for anyone interested in our built environment and the layered historical meaning embodied within it **The Moving Researcher** Ciane Fernandes,2014-12-21 The Moving Researcher offers a complete approach to Laban Bartenieff Movement Analysis detailing the original method exploring recent developments and examining its applications With contributions from internationally renowned professionals at key institutions this book covers all concepts taught as part of the Certificate of Movement Analysis **Interactive Experience in the Digital Age** Linda Candy,Sam Ferguson,2014-03-28 The use of interactive technology in the arts has changed the audience from viewer to participant and in doing so is transforming the nature of experience From visual and sound art to performance and gaming the boundaries of what is possible for creation curating production and distribution are continually extending As a consequence we need to reconsider the way in which these practices are evaluated Interactive Experience in the Digital Age explores diverse ways of creating and evaluating interactive digital art through the eyes of the practitioners who are embedding evaluation in their creative process as a way of revealing and enhancing their practice It draws on research methods from other disciplines such as interaction design human computer interaction and practice based research more generally and adapts them to develop new strategies and techniques for how we reflect upon and assess value in the creation and experience of interactive art With contributions from artists scientists curators entrepreneurs and designers engaged in the creative arts this book is an invaluable resource for both researchers and practitioners working in this emerging field Conflicted Identities Alexandra Staub,2015-10-23 Nation states have long used representational architecture to create symbolic identities for public consumption both at home and abroad Government buildings major ensembles and urban plans have a visibility that lends them authority while their repeated portrayals in the media cement their image as icons of a shared national character Existing in tandem with this official self however is a second often divergent identity represented by the vast realm of domestic space defined largely by those who occupy it as well as those with a vested interest in its cultural meaning Using both historical inquiry and visual spatial and film analysis this book explores the interaction of these two identities and its effect on political control class status and gender roles Conflicted Identities examines the politicization of both public and domestic space especially in societies undergoing rapid cultural transformation through political social or economic expansion or restructuring when cultural identity is being rapidly modernized shifted or realigned to conform to new demands Using specific examples from a variety of national contexts the book examines how vernacular housing legislation marketing and media influence a large but often underexposed domestic culture that runs parallel to a more publicly represented one As a case in point the book examines West Germany from the end of World War II to the early 1970s to probe more deeply into the mechanisms of such

cultural dichotomy On a national level post war West Germany demonstratively rejected Nazi era values by rebuilding cities based on interwar modernist tenets while choosing a decidedly modern and transparent architecture for high visibility national projects In the domestic realm government media and everyday citizens countered this turn to state sponsored modernism by embracing traditional architectural aesthetics and housing that encouraged patriarchal family structures

Written for readers interested in cultural theory history and the politics of space as well as those engaged with architecture and the built environment *Conflicted Identities* provides an engaging new perspective on power and identity as they relate to architectural settings

Digitally Disrupted Space Anastasia Panori, 2024-02-15 *Digitally Disrupted Space* Proximity and New Development Opportunities for Regions and Cities develops an analytical framework of the key structural elements in relation to digital space and its impact on existing spatial interactions at a regional and urban level It puts forth the argument that digital space is a new form of space acting complementary to existing spatial structures and creating novel interactions between and or within them It explores how digital space enhances connected intelligence by combining knowledge intensive activities cooperation between organisational and institutional actors and smart environments of knowledge creation and diffusion Readers will better understand the connections between digital transformations and traditional paths of regional development as well as underlying mechanisms fostering externalities and proximity emergence triggering effective collaboration between the digital and other expressions of space The first set of chapters Part I focuses on space disruptions in a digitalising world The key notions of space and digital space are defined alongside the main concepts that form it in relation to space dynamics space connectors and space routines The following group of chapters Part II discuss aspects related to the digital space reshaping transition processes exploring the role of digital space under the multi level perspective and the digital space in the forefront of twin transition Finally the last three chapters Part III focus on digital space challenges and opportunities for regional development A specific focus is given in three key areas of regional development and the ways in which digital space can enhance them including Productivity Resilience and Inclusion

Academics and researchers will find insights into how cities and regions can adopt this new developmental paradigm how to organise connected intelligence within regional and urban environments and how to sustain productivity resilience and inclusion through the use of digital space Digital transformation managers in the public sector and entrepreneurs in private organisations can leverage the opportunities offered from this transition process not only by identifying actions and strategies for boosting their productivity but also for making them more resilient during socio economic environmental and health crises And professionals and policymakers in urban and regional development will find concrete guidance about the design development and management of the digital space and the creation of connected intelligence environments at the urban and regional level Thoroughly analyzes the role of digital space to complement existing structures and generate new interactions and networks revealing the digital elements that are essential for the rise of new dynamics connectors and

routines Positions the digital space emergence under the framework of a multi level transition perspective shedding light on how digital space reshapes transition processes Explores the potential challenges and opportunities arising from the emergence of the digital space for regional development *Official Gazette of the United States Patent and Trademark Office* United States.
