Shaping Our Environmental Conscience:

Shaping Our Environmental Conscience Gary Cochran, 1995-09 The European Environmental Conscience in the EU Marjorie Tendero, Christoph Weber, 2025-02-17 This book analyses how sustainability affects internal decision making within the European Union and its external relations in working towards achieving its long term goal of a climate neutral Europe by 2050 Applying the term European environmental conscience as the perception of environmental degradation leading to a growing public awareness of the issues a notion of common responsibility and European institutions dealing with these growing concerns the book investigates its emergence as a lever for deeper European integration and in fostering a genuine European identity Examining policy areas such as green finance innovation policies and foreign policy it reveals the impact these concerns have for other policy fields This book is of key interest to scholars and students of environmental economics and politics sustainability governance green finance climate policy energy policy and more broadly to European studies and international relations *Environmental Awareness and the Design of Literature* François Specq, 2016-10-05 *Environmental Awareness and the Design of Literature* offers analyses of the diverse ways in which literature helps us escape the rigid frames of commonly assumed worldviews and modes of seeing Literary works are endowed with a capacity not only to reflect or to mediate but to resist our environment and thus to affect and transform our relation to the physical world Each essay points to the way literature shapes the human perception of environment as intellectual adventures and forays that draw upon a number of historical aesthetic philosophical and phenomenological stances Environmental Consciousness, Nature and the Philosophy of Education Michael Bonnett, 2020-12-30 This book explores alternative ways of understanding our environmental situation by challenging the Western view of nature as purely a resource for humans *Environmental Consciousness Nature and the Philosophy of Education* asserts that we need to retrieve a thinking that expresses a different relationship with nature one that celebrates nature's otherness and is attuned to its intrinsic integrity agency normativity and worth Through such receptivity to nature's address we can develop a sense of our own being in nature that provides a positive orientation towards the problems we now face Michael Bonnett argues that this reframing and rethinking of our place in nature has fundamental implications for education as a whole questioning the idea of human stewardship of nature and developing the idea of moral education in a world of alterity and non rational agents Drawing on and revising work published by the author over the last 15 years this book will be essential reading for students and scholars of environmental studies environmental education and the philosophy of education Environmental Awareness and Governance Mohamed Mlile, David Stringer, Mohammed Larouz, 2025-09-04 *Environmental Awareness and Governance Ecolinguistic and Discourse Perspectives* is a comprehensive exploration that delves into the intricate relationship between language discourse and environmental issues This book begins by examining the role of environmental governance in Moroccan political parties electoral programs followed by an analysis of how Moroccan online media communicates water stress as a risk issue It also

provides an ecolinguistic analysis of a computer animated Netflix film The Sea Beast and discusses the impact of climate change on Moroccan agriculture particularly focusing on the Generation Green strategy The editors and contributors explore the role of translation in the environmental movement and discusses the shift from the Anthropocene to the Capitalocene in the context of global climate change They also provide a critical discourse analysis of the environmental discourse of the COP27 highlighting the North South divide The latter part of this book focuses on environmental literacy and awareness among students and also examines the environmental awareness of Moroccan university students and its impact on their environmental practices The book further discusses the role of visual language in environmental representation using Moroccan cinema as a case study It explores the intersection of language translation and posthumanism focusing on cross species interaction in Margaret Atwood s trilogy This book concludes with an ecocritical interpretation of solastalgia in Mohsin Hamid s Exit West and a generic ecocritical reading of climate change in Kim Stanley Robinson s Science in the Capital Trilogy Each chapter provides a unique perspective on environmental issues making it a comprehensive resource for anyone interested in environmental studies

Environmental Consciousness and the Nine Schools of Indian Philosophy Vandana Sharma Diya, 2023-09-28 This book presents an analytical exposition of the Nine Schools of Indian philosophy extrapolating Environmental Ethics from the profound metaphysics of these Nine Schools which serve as the cornerstone of a life lived in wisdom This book uses the popular contemporary word Environment with the meaning expounded by the Vedic texts Therefore it includes the internal external and cosmic states of all the creatures of the world and relates them to the universal laws of creation preservation and annihilation of every existence following the path of the cosmic order R ta It argues that realization of the fact that all entities in the world are illuminated by the same Universal Spirit is also necessary

While the book emphasizes the external environmental woes of the world such as deforestation animal cruelty pollution climate change and more it also underscores that these are merely manifestations of humans internal perverted environmental states Thus humankind should not look at external issues that are limited and temporary but should focus on the longer lasting internal transformation Environmental Consciousness Stephen Hussey, Paul Richard Thompson, 2004 Across the globe environmental questions feature more and more in today's social and political agendas In Western countries environmental campaigns target issues at home and abroad They have a special urgency which draws in an astonishing range of field campaigners from young militants to rebel aristocrats This book examines the roots of contemporary environmental consciousness and action in terms of both popular experience and tradition The global reach of this book reflects the character of contemporary environmentalism It examines a geographically and thematically diverse range of case studies including British environmental campaigners in the Brazilian rainforest ecocriticism and literature the environmental movement in Kazakhstan and medieval church iconography The common theme linking each chapter is that environmental consciousness and activism are shaped through people's life stories and that their memories are shaped not only through individual experience but also through myth tradition and collective memory Containing a wealth of empirical source material *Environmental Consciousness* will be invaluable for sociologists and historians alike It offers a cutting edge illustration of how narrative and oral history can illuminate our understanding of an uncertain present Stephen Hussey is a research associate at the School of Education at the University of Cambridge His previous publications include *Childhood in Question* and his next publication will be a book for the wider market entitled *Headline History* Paul Thompson is research professor in sociology and director of Qualidata at the University of Essex He is also founder of the National Life Story Collection at the British Library National Sound Archive and founder editor of *Oral History* His previous publications include *The Voice of the Past* *The Edwardians* and *The Work of William Morris* *Environmental Debates in Albania* Deniz Çupi, 2023-09-30 This book investigates the role played by classical and digital media and social networks in shaping debates on the environment Providing a unique window of observation on environmental debates the book explores the media theatre from the post communist perspective of Albania The work navigates the creation and development of environmental debate in Albania using evidence based case studies investigating the role of actors involved who are closely related to the media such as in business or politics *Environmental Debates in Albania* offers an original insight on environmental debate which is closely tied to and influenced by the place and culture within which it originates Rich literature exists on global environmental issues protests policy and the rhetoric around climate change this book supplies another piece to the puzzle through its focus on the under researched area of environmental debate in post communist and Eastern European countries
