Refactoring at Scale Maude Lemaire, 2020-10-13 Making significant changes to large complex codebases is a daunting task one that s nearly impossible to do successfully unless you have the right team tools and mindset If your application is in need of a substantial overhaul and you re unsure how to go about implementing those changes in a sustainable way then this book is for you Software engineer Maude Lemaire walks you through the entire refactoring process from start to finish You ll learn from her experience driving performance and refactoring efforts at Slack during a period of critical growth including two case studies illustrating the impact these techniques can have in the real world This book will help you achieve a newfound ability to productively introduce important changes in your codebase Understand how code degrades and why some degradation is inevitable Quantify and qualify the state of your codebase before refactoring Draft a well scoped execution plan with strategic milestones Win support from engineering leadership Build and coordinate a team best suited for the project Communicate effectively inside and outside your team Adopt best practices for successfully executing the

refactor **BLOCKCHAIN AND THE INTERNET OF THINGS (IOT): A CONVERGENCE OF TECHNOLOGIES** Mukesh Soni, Mohan Raparathi, Sarath Babu Dodda, Dr. Sheshang D. Degadwala, 2023-12-12

It has been demonstrated that the evolution of information and communication technology may result in the construction of industrial applications and systems that are extraordinarily effective intelligent and savvy. One possible outcome of this development is the creation of artificial intelligence. The Internet of Things (IoT) is an initiative that aims to facilitate the interconnection of intelligent devices collect and evaluate data from a variety of sources and provide goods and services to end users application groups and industries including farms governments transportation systems healthcare management systems and so on. The Internet of Things (IoT) is an acronym that stands for the Internet of Everything. The Internet of Things (IoT) and digital technologies have found increased application within the framework of smart cities which has resulted in the rise of new difficulties within the new digital ecosystem. These difficulties have brought about the emergence of brand new difficulties. Machine learning and artificial intelligence algorithms have been used to various electronic devices that have been deployed in smart cities along with platforms for the Internet of Things (IoT). These cities also contain a wide range of electronic gadgets. Because of this smart cities are currently at their most resourceful and technologically sophisticated state to date. In spite of this buildings continue to be the most important component of a city and as a consequence the most critical component of an ecosystem for a smart city. Because of this in addition to the intelligent devices and services that have been developed in a smart city the recording of the characteristics of a building will be the basis of the IoT platforms and the services that are offered in an integrated digital ecosystem. This is because the recording of the features of a building will be the foundation of the IoT platforms and the services that are given in an integrated digital ecosystem. This documentation will be carried out with the assistance of Building Information Modeling (BIM) and it will be combined with the information collected from intelligent apps and smart gadgets that have been developed. Even though the communication infrastructure provides the desirable QoS for example through the expansion of fiber optics networks development of broadband wireless networks WSNs MIMO and 5G Technologies modern short range communication etc the application of Blockchain will help to address the security issues in the BIM IoT architecture. This is because Blockchain uses cryptography to verify transactions. This is due to the fact that transactions on Blockchain are verified using cryptography. In order to accomplish this objective it will be necessary to reduce the number of third parties who have access to the sensitive information that is being sought. The Architecture Engineering and Construction (AEC) industry is comprised of a significant number of stakeholders in the construction industry as a whole. Since they've been doing their jobs in the same way for several decades these stakeholders have developed a habit of doing everything exactly the same way. In spite of this the AEC sector has not demonstrated the same amount of excitement for digital transformation as other industries such as the manufacturing industry the aerospace industry or the financial industry for example. In point of fact the architecture engineering and construction AEC industry is one of the

sectors that has undergone the least degree of digital transformation and many individuals who are considered to be economic experts believe that this is one of the contributing causes to the stagnation or decline in. Despite this the construction industry is a strategically important part of economies both in terms of the amount of production it creates and the number of employments it offers. This is due to the fact that the building industry generates a significant number of job opportunities. The construction industry in Europe employs a total of 18 million people and is responsible for around 9 percent of the region's gross domestic output. This industry provides employment for more than 18 million people. The total value of its output is 1 300 000 000 000 000 euro. The capacity of change resistant construction businesses to continue to be competitive over the long term would be put in peril if these companies failed to acknowledge the significance of transformation as being significant. This would put the ability of these companies to continue to be competitive in jeopardy. The construction sector has been making significant strides in recent years toward self reform through the use of innovative technologies that have a significant amount of unrealized potential for the advancement of information and communications technology ICT. This is being done in order to find a solution to the issue that has been affecting the industry for some time now.

Simple Giving Jennifer Iacovelli, 2015-10-27 You can make a difference on a daily basis and it's not as difficult as you might think. Simple Giving includes more than 40 ideas to make the world a better place. Most people think they have to donate a lot of time and money in order to make a difference. But there are simple ways to integrate giving into our personal and professional lives that don't involve either. In Simple Giving Jennifer Iacovelli shows us how to make giving a part of our daily routines. It can involve something as simple as holding the door open for a stranger or paying someone else's toll which will brighten that person's day. We can also think about ways to make sustainability and social good a part of our business models. After working in the nonprofit sector and soliciting and coordinating donations for ten years Iacovelli became frustrated with the disconnect between givers and receivers. Givers or potential givers didn't realize how much of an impact they could make while recipients couldn't thank the organization enough. In Simple Giving Iacovelli inspires us with the stories of how people ranging from moms to social entrepreneurs are giving back in creative ways. By being more mindful of how our actions impact others and taking steps toward positive change we also live happier and more fulfilled lives.

Rise of the Stormcrow Ian D Macallan, 2012-05-24 The lightning glistened from one black marble eye. In that darkness worlds had risen and fallen stars had burned to dust and men had fought and died for centuries. The Great Birds are forgotten. Magic is a transient whisper in the memory of old men now swords and intrigue rule the world and the darkness clings to the horizon like smoke. A crown lies broken. A newborn heir and a young Queen must rule amidst wolves. Ryper Kilstroke flees the capital and men cry that he is a traitor. Gray Doon stalks the downtrodden and destitute carving them like meat for sport. Eadred Lord of the North must resist the temptations of the rotten city. And what of Allen Fontaine. A young squire who holds an important secret. For Brand Stormborn regicide infidelity and ambition threaten to plunge Leonia back into civil conflict.
