understandings of human development from a multidisciplinary perspective Uniquely inclusive of the moral and faith dimensions of context and life cycle development Human Development and Faith examines the interplay of mind body family community and soul at every stage of development It addresses two central questions What are the good enough conditions of parenting family and community in each phase of life from birth to death which support growth and development What gives life adequate meaning as development proceeds If human development describes the normative and hoped for passages of life then faith provides the necessary component of meaning Throughout the various perspectives offered in this volume is the premise that faith is that quality of living that makes it possible to fully live The Journal of Pastoral Theology called the first edition of Human Development and Faith an excellent text for pastoral theology courses because it fulfills its ambitious goal of bringing a holistic faith perspective to the usual topics of development This second edition includes a new chapter on infancy updates reflecting our growing awareness of cultural diversity and a new preface Beyond Intolerance Stella Adamma Nneji, 2018-04-20 There is no gainsaying the fact that the problem of religious intolerance has become a worldwide problem In todays pluralistic society the dialogical tension between openness and identity has become a major challenge for interreligious dialogue and peaceful co existence This tension is expressed in the guestion Can one maintain ones own religious identity without one closing oneself off from the other This question is central to the challenges posed on how religious education can contribute to sustainable peace in Nigeria and the world over In this book Stella Nneji critically assesses the various models of religious pedagogy mono religious multi religious and inter religious by asking how these models relate to the dialogical tension between openness and identity in Nigeriaa nation perceivably confronted with an enduring history of post colonial strife religious intolerance and violence The contention is that the mono religious and multi religious models which while dominant in current practice and in academia nevertheless fall short of expressing the authentic challenges and opportunities religious intolerance presents in Nigerian multi religious cultural context In this connection this book provides a clear notion of the theological foundation principles and framework of inter religious education and a practical guide for authentic dialogue in a plural context She calls for a paradigm shift for confessional religious pedagogy to a model of inter religious learning as incorporated within the hermeneutical communicative education On this basis the book proposes a new model for the role of religious education in Nigeria This model in a critical enculturated way attempts to recognize the tensions of authentic religious difference presupposing a broad spectrum of difference in the classroom in a way that also incorporates genuine religious encounters and expressions of identity
