Sharing The Kingdom Animals And Their Rights

Diane L. Beers

Sharing The Kingdom Animals And Their Rights:

Sharing the Kingdom Karen O'Connor, 1984 Examines the issue of animal rights discussing the use of animals in laboratory experiments factory farms and in entertainment For the Prevention of Cruelty Diane L. Beers, 2006-05-25 Animal rights Those two words conjure diverse but powerful images and reactions Some nod in agreement while others roll their eyes in contempt Most people fall somewhat uncomfortably in the middle between endorsement and rejection as they struggle with the profound moral philosophical and legal questions provoked by the debate Today thousands of organizations lobby agitate and educate the public on issues concerning the rights and treatment of nonhumans For the Prevention of Cruelty is the first history of organized advocacy on behalf of animals in the United States to appear in nearly a half century Diane Beers demonstrates how the cause has shaped and reshaped itself as it has evolved within the broader social context of the shift from an industrial to a postindustrial society Until now the legacy of the movement in the United States has not been examined Few Americans today perceive either the companionship or the consumption of animals in the same manner as did earlier generations Moreover powerful and lingering bonds connect the seemingly disparate American Society for the Prevention of Cruelty to Animals of the nineteenth century and the People for the Ethical Treatment of Animals of today For the Prevention of Cruelty tells an intriguing and important story that reveals society's often changing relationship with animals through the lens of those who struggled to shepherd the public toward a greater compassion The Animals' Agenda, 1997 **Beacham's Guide to Environmental Issues & Sources** Walton Beacham, 1993 *Christianity and the Rights of Animals* Andrew Linzey, 2016-03-03 Christian concern about how we treat animals has increased strikingly in recent years More and more Christians are deciding that our attitudes toward animals must change Here is a book that presents for the first time a comprehensive and well argued theological case for the rights of animals and offers a challenging critique of our existing insensitivity toward animal life Everyone who cares about the rights of animals particularly clergy and ministers who are constantly being asked for answers on the issue will welcome this new and important book The Case for the Legal Protection of Animals Kimberly C. Moore, 2023-12-22 This book presents the case for legal protection for animals based on humanity's shared interests and destinies with the animal kingdom To underscore the urgent need for legal reform the book documents how animals are in crisis with separate discussions on animals in entertainment research fashion the food industry and animals in our homes as well as issues that impact wildlife and aquatic animals In each of the foregoing areas there is a discussion of major developments for animals across the globe the objective being to demonstrate how the U S is out of step with other major countries in its legal treatment of animals The importance of media as a driver of change is also considered This background culminates to the heart of the book which discusses and analyzes the link between human rights and animal rights with nine areas explored e g loss of biodiversity environmental destruction zoonotic diseases world hunger violence Challengesto legal reforms are also explored including issues associated with weak laws the failure to enforce

existing laws and governmental agencies that tend to overlook the actions of industries Finally the book explores the development of animal law and the trajectory of current laws with analysis of developing rights of nature laws and legal personhood status for animals **Appraisal** ,1984 Animal Organizations & Services Directory ,1992 **The Elementary School Library Collection, Phases 1-2-3** ,1992 **The Rights of Nature** David R. Boyd,17-09-05 An important and timely recipe for hope for humans and all forms of life Palila v Hawaii New Zealand s Te Urewera Act Sierra Club v Disney These legal phrases hardly sound like the makings of a revolution but beyond the headlines portending environmental catastrophes a movement of immense import has been building in courtrooms legislatures and communities across the globe Cultures and laws are transforming to provide a powerful new approach to protecting the planet and the species with whom we share it Lawyers from California to New York are fighting to gain legal rights for chimpanzees and killer whales and lawmakers are ending the era of keeping these intelligent animals in captivity In Hawaii and India judges have recognized that endangered species from birds to lions have the legal right to exist Around the world more and more laws are being passed recognizing that ecosystems rivers forests mountains and more have legally enforceable rights And if nature has rights then humans have responsibilities In The Rights of Nature noted environmental lawyer David Boyd tells this remarkable story which is at its heart one of humans as a species finally growing up Read this book and your world view will be altered forever *The Publishers' Trade List Annual* ,1985 Advances in Farm Animal Genomic Resources Stéphane Joost,Michael W. Bruford,Ino Curik,Juha Kantanen,Johannes A. Lenstra,Johann Sölkner,Göran Andersson,Philippe V. Baret,Nadine Buys,Jutta Roosen,Michèle Tixier-Boichard,Paolo Ajmone Marsan,2016-01-28 The history of livestock started with the domestication of their wild ancestors a restricted number of species allowed to be tamed and entered a symbiotic relationship with humans In exchange for food shelter and protection they provided us with meat eggs hides wool and draught power thus contributing considerably to our economic and cultural development Depending on the species domestication took place in different areas and periods After domestication livestock spread over all inhabited regions of the earth accompanying human migrations and becoming also trade objects This required an adaptation to different climates and varying styles of husbandry and resulted in an enormous phenotypic diversity Approximately 200 years ago the situation started to change with the rise of the concept of breed Animals were selected for the same visible characteristics and crossing with different phenotypes was reduced This resulted in the formation of different breeds mostly genetically isolated from other populations A few decades ago selection pressure was increased again with intensive production focusing on a limited range of types and a subsequent loss of genetic diversity For short term economic reasons farmers have abandoned traditional breeds As a consequence during the 20th century at least 28% of farm animal breeds became extinct rare or endangered The situation is alarming in developing countries where native breeds adapted to local environments and diseases are being replaced by industrial breeds In the most marginal areas farm animals are considered to be essential for

viable land use and in the developing world a major pathway out of poverty Historic documentation from the period before the breed formation is scarce Thus reconstruction of the history of livestock populations depends on archaeological archaeological and DNA analysis of extant populations Scientific research into genetic diversity takes advantage of the rapid advances in molecular genetics Studies of mitochondrial DNA microsatellite DNA profiling and Y chromosomes have revealed details on the process of domestication on the diversity retained by breeds and on relationships between breeds However we only see a small part of the genetic information and the advent of new technologies is most timely in order to answer many essential questions High throughput single nucleotide polymorphism genotyping is about to be available for all major farm animal species The recent development of sequencing techniques calls for new methods of data management and analysis and for new ideas for the extraction of information To make sense of this information in practical conditions integration of geo environmental and socio economic data are key elements The study and management of farm animal genomic resources FAnGR is indeed a major multidisciplinary issue The goal of the present Research Topic was to collect contributions of high scientific quality relevant to biodiversity management and applying new methods to either new genomic and bioinformatics approaches for characterization of FAnGR to the development of FAnGR conservation methods applied ex situ and in situ to socio economic aspects of FAnGR conservation to transfer of lessons between wildlife and livestock biodiversity conservation and to the contribution of FAnGR to a transition in agriculture FAnGR and agro ecology

Qualitative Freedom - Autonomy in Cosmopolitan Responsibility Claus Dierksmeier, 2019-01-18 In the light of growing political and religious fundamentalism this open access book defends the idea of freedom as paramount for the attempt to find common ethical ground in the age of globality The book sets out to examine as yet unexhausted ways to boost the resilience of the principle of liberalism Critically reviewing the last 200 years of the philosophy of freedom it revises the principle of liberty in order to revive it It discusses many different aspects that fall under its three main topics the metaphysics of freedom quantitative freedom and qualitative freedom Open societies worldwide have come under increasing pressure in the last decades The belief that politics and markets fare best when guided by the principle of liberty presently faces multiple challenges such as terrorism climate warming inequality populism and financial crises In the view of its critics the idea of freedom no longer offers adequate guidance to meet these challenges and should be partially corrected or even entirely replaced by countervailing values Against the reduction of freedom to the merely quantitative question as to how much liberties individuals call their own this book draws attention to the qualitative concerns which and whose opportunities society should foster It argues that correctly understood the idea of liberty commits us to defend as well as advance the freedom of each and every world citizen

Freeman asks us to reconsider the devastating division we have created between the human and animal conditions leading to mass exploitation injustice and extinction As a remedy Freeman believes social movements should collectively foster a cultural shift in human identity away from an egoistic anthropocentrism human centered outlook and toward a universal altruism species centered ethic so people may begin to see themselves more broadly as human animal earthlings To formulate the basis for this identity shift Freeman examines overlapping values supporting life fairness responsibility and unity that are common in global rights declarations and in the current campaign messages of sixteen global social movement organizations that work on human civil rights nonhuman animal protection and or environmental issues such as Amnesty International Human Rights Watch CARE People for the Ethical Treatment of Animals the World Wildlife Fund the Sea Shepherd Conservation Society the Nature Conservancy the Rainforest Action Network and Greenpeace She also interviews the leaders of these advocacy groups to gain their insights on how human and nonhuman protection causes can become allies by engaging common opponents and activating shared values and goals on issues such as the climate crisis enslavement extinction pollution inequality destructive farming and fishing and threats to democracy Freeman s analysis of activist discourse considers ethical ideologies on behalf of social justice animal rights and environmentalism using animal rights respect for sentient individuals as a bridge connecting human rights to a more holistic valuing of species and ecological systems Ultimately Freeman uses her findings to recommend a set of universal values around which all social movements campaign messages can collectively cultivate respectful relations between human animal earthlings fellow sentient beings and the natural world we share **The Anglo-Saxon Fenland** Susan
