Devereux, Research Fellow at the Institute for Fiscal Studies London Professor of Finance Department of Economics Michael Devereux, Philip R Lane, Cyn-Young Park, Shang-Jin Wei, 2011-05-03 The ongoing global financial crisis has manifested a remarkable degree of global financial integration and its implications for emerging Asian financial markets The current crisis will not and should not deter the progress that the region has made toward financial openness and integration However events like this clearly demonstrate that financial liberalization and integration is not without risks Hence emerging Asian economies growing financial ties have motivated us to look closer at the repercussions of increased financial integration and evaluate the benefits of risk sharing and better access to international capital markets against the costs of cross border financial contagion The crisis also presents a timely opportunity for the region's policy makers to rethink their strategies for financial deregulation and liberalization and to reconsider a next step to integrate emerging East Asia's financial markets

further. However, doing so requires deeper understanding of financial market integration. While much has been said in both academic and policy circles about financial globalization and regional financial integration as separate areas of study, existing research has been relatively silent on the dynamics between these two distinctive forces. The book addresses this gap in financial literature and assesses financial integration in emerging East Asia at both regional and global levels. The publication studies the factors driving the progress of regional financial integration in relation to financial globalization and identifies the relevant policy challenges facing emerging market economies in the region. Chapters look into three broad aspects of regional and global financial market integration: i) measurement of regional and global financial integration; ii) understanding dynamics of regional financial integration versus global financial integration; and iii) welfare implications from regional financial market integration amid financial globalization. Against this context, academics, policy makers, and other readers will appreciate the rigorous research contribution provided by the book.

**Sharing the Harvest** Elizabeth Henderson, Robyn Van En, 2007-11-01. To an increasing number of American families, the CSA community supported agriculture is the answer to the globalization of our food supply. The premise is simple: create a partnership between local farmers and nearby consumers who become members or subscribers in support of the farm. In exchange for paying in advance at the beginning of the growing season when the farm needs financing, CSA members receive the freshest healthiest produce throughout the season and keep money jobs and farms in their own community. In this thoroughly revised and expanded edition of a Chelsea Green classic, authors Henderson and Van En provide new insight into making CSA not only a viable economic model but the right choice for food lovers and farmers alike. Thinking and buying local is quickly moving from a novel idea to a mainstream activity. The groundbreaking first edition helped spark a movement, and with this revised edition, *Sharing the Harvest* is poised to lead the way toward a revitalized agriculture.
