Maycock,2025-03-25 A marvelously illustrated look at the life of the shark No two species of shark have the same life history yet these magnificent creatures share many things in common This one of a kind narrative biography brings together a wide array of species from habitats around the globe examining the biology ecology and behavior of sharks as well as their cultural role in human history Written by two experienced shark educators scientists and conservationists Shark The Illustrated Biography blends engaging profiles of selected species with captivating illustrations to offer an unparalleled exploration of the life and times of the shark Features a beautiful and informative array of watercolors Tells the biographical story of the shark using the life histories of representative species from birth and early family life to adolescence and the adult years Discusses sharks of all kinds such as Shortfin Makos Sandbar Sharks Spiny Dogfish Great Whites Tiger Sharks Basking Sharks Angel Sharks and Great Hammerheads Covers evolutionary history distinguishing features habitats reproduction and migration Examines the role of sharks in art music literature spirituality and mythology An essential must have reference for shark lovers everywhere     *The Canadian Who's who* ,1983     *Field Guide to Drawing & Sketching Animals* Tim Pond,2019-01-02 Artist Tim Pond s lively and engaging book fuses science with art providing the reader with the skills techniques and knowledge they need to create sketches of animals filled with life and movement There are some very good books written on life drawing yet when it comes to drawing wildlife illustrators and artists often revert to working solely from photographs which can leave the artwork looking lifeless and flat In this inspirational book artist Tim Pond shows you how to observe and draw animals in zoos farms wildlife parks and aquariums teaching you some fascinating facts about the animals along the way and ultimately bringing you closer to nature One of the challenges with sketching wildlife is that animals are constantly moving However by having some basic understanding of the biology of an animal such as knowing that a duck has a cheek or that a cheetah can t retract its claws can influence how you might sketch them and results in a lively drawing that captures the form movement and ultimately the spirit of the animal in question Combining scientific knowledge with expert practical guidance is key to creating successful drawings of animals and Tim s ability to convey this in a way that is both accessible and engaging makes this a unique and inspiring guide suitable for artists of all levels Tim s book takes you on a journey of discovery that will enable you to develop the skills techniques and knowledge you need to sketch a

broad range of wildlife encompassing mammals reptiles birds fish and insects It includes quick gestural sketches as well as linear and tonal studies in a variety of media pencil pen and ink and watercolour There are numerous studies comprising how to represent the different patterns of animals coats how to capture the plumage of an exotic bird in watercolour and how to sketch a hippo s hooves as well as guidance on tools materials and basic techniques The result is a treasure chest of fascinating facts studies sketches and annotated drawings that will not fail to ignite your enthusiasm for drawing animals from life **The News** ,2000 **Wild Inventions** Sandra Markle,2023-10-03 What do animals have to do with inventions Welcome to the world of bioinspiration Inventors observe and imitate strategies and adaptations that animals use in the natural world to find inspiration for new creations Sometimes two animal species face a similar challenge and come up with two very different ways for dealing with it For instance both sharks and pangolins have special skin that protects them from harm Shark skin inspired a type of armor for boats and pangolins inspired the design of a helmet for humans Wild Inventions introduces six pairs of animals and the inventions they inspired Take a peek at the creative process involved in designing new inventions to help people stay safe live more comfortably and go places and do things that weren t previously possible

*The Horn Book Guide to Children's and Young Adult Books* ,2003 **Theory of Electric and Magnetic Orientation in Sharks and Rays Revisited** Adrianus J. Kalmijn,2024-08-15 The book describes the theory of electromagnetic orientation in sharks and rays The theory evolved from studying the publications of Faraday von Arx and Longuett Higgins Sharks and rays can detect the earth s magnetic field as well as the ambient electric fields utilizing their electrosensory system the Ampullae of Lorenzini Dr Kalmijn provides the physical description of this sensory system in the context of his previously published behavioral studies performed in the laboratory and in natural open ocean settings The book lays bare the physics bedrock of the motional electric fields The physics of the entire sensory environment interacting with these very sensitive organs is made clear step by step so the reader can understand the source of the fields and how the animals detect them Dr Kalmijn analyzes the sensory organs from the perspective of the animal moving through these electric and magnetic fields to arrive at the appropriate relativistic frame to understand how the sensory system works Relying on his thorough understanding of Maxwell Faraday and Einstein he has sought to understand the miraculous abilities of Elasmobranchs The detailed presentation clears away many of the misunderstandings and mistakes of previous researchers Nearly all the mistakes pertain to the underlying physics The existing literature is discussed put in context and corrected This summary and final presentation of Dr Kalmijn s life time study of electromagnetic reception in Elasmobranchs will surely be recognized as the definitive treatise in years to come It gives researchers and students in biology physics oceanography and fisheries a detailed mathematical physics background for the understanding of electroreception in Elasmobranch fishes *Animal World* ,1914

*North Carolina Shark Attacks* John Hairr,2023 Swim at your own risk Millions of tourists visit North Carolina beaches each year but advertisements promoting fun in the sun along idyllic shores forget to mention the dangers lurking under the

waves The Old North State is home to some very large and lethal sharks bull sharks tiger sharks oceanic whitetips and great whites Large sharks used to be prolific along the coast especially in the waters of Carteret County where some brutal fatal attacks have happened Offshore mariners dreaded the infamous Graveyard of the Atlantic knowing their chances of meeting a gruesome end were high in those shark haunted waters As shark populations rebound in waters where humans congregate local author John Hairr tells forgotten tales of historic clashes between these two apex predators
