Franchthi Catherine Perlès,2018-01-10 A fresh and authoritative study of the ornaments recovered from the Franchthi Cave  
sediments with illustrations included The famous Franchthi Cave excavations in Greece brought to light an exceptionally long  
sequence of ornaments spanning from the earliest Upper Palaeolithic to the end of the Neolithic This volume focuses on the  
Palaeolithic and Mesolithic ornaments and ornamental species which constitute one of the largest collections in Europe for  
these periods combined Franchthi is one of the few identified production centers for ornaments which are overwhelmingly  
dominated by marine molluscs The detailed publication of these collections Cyclope neritea Antalis sp and Columbella rustica  
will be useful to all malacologists and specialists in ornaments working around the Mediterranean These reference  
collections coupled with the examination of manufacturing and wear traces on the archaeological specimens allow a detailed  
reconstruction of the whole production cycle from procurement to discard The systematic association of unworked freshly  
worked and very worn shells suggests that the ornaments mostly served for the production or rejuvenation of embroidered  
garments Despite the richness of the assemblages and varied local resources the range of ornament types is surprisingly  
narrow and fundamentally stable through time The ornaments from Franchthi Cave therefore paint a different portrait of the  
European Upper Palaeolithic and Mesolithic one based on regional cultural continuity      *Foreign Commerce and Navigation*

up of an earlier one on the 2007 2008 excavations published as Aegis 1 and presents a preliminary report on the excavations  
carried out in 2009 and 2010 It concentrates on the different zones examined within the cemetery and settlement There are
