Simply Ices:

Perfectly Simple Ice Cream Anthony Tassinello, Mary Jo Thoresen, 2024-04-30 Sweeten and savor any occasion with this incredible homemade ice cream book The next time you're even thinking of going out for an ice cream cone grab this book instead and take it into the kitchen because the best ice cream recipes imaginable are between these covers JOANNE WEIR author and James Beard Award winner Discover how easy it is to recreate recipes from your favorite ice cream shop at home in this irresistible celebration of all things sweet and frozen Brought to you by Anthony Tassinello and Mary Jo Thoresen veteran chefs of Alice Waters's famed Chez Panisse restaurant this book shows you how to whip up the perfect scoop of ice cream sherbet granita frozen yogurt and other delightful treats from the classic and nostalgic flavors to the surprising and festive 100 flavors to try Explore unique recipes that showcase fresh seasonal ingredients such as London Fog Ice Cream Creamy Lime Sherbet Vietnamese Coffee Ice Cream and more Tips and techniques Master your ice cream maker with step by step guidance for achieving smooth and delicious results every time Don't forget the toppings Go the extra mile with a section of recipes for homemade toppings like Caramel Sauce Candied Nuts and Perfectly Whipped Cream Whether you're making ice cream for the first time or looking for new takes on traditional favorites this ice cream cookbook includes everything you need to create luscious desserts that everyone will love *Level Ice Breaking by a Simple Wedge*

Jean-Claude Tatinclaux, 1985 Tests in level ice on an idealized icebreaker bow in the shape of a simple wedge were conducted in the test basin The horizontal and vertical forces on the wedge were measured and floe size distribution in the wake of the wedge was observed From the force measurements the ice wedge hull friction factor was calculated and found to be in general agreement with the friction factor measured in separate friction tests The ice floe length and ice floe area measured in the current study were found to follow log normal probability distributions defined by the length average L and area average A and corresponding standard deviations $S_{sub L}$ and $S_{sub A}$ The results of these tests and other tests conducted at another facility showed that the ratios A/h^2 and L/h A average floe area L average floe length h ice thickness were for the same type of model ice directly proportional to the parameter $\sigma \gamma h$ σ ice bending strength γ specific weight of water and $\sigma \gamma h$ respectively and independent of the velocity and ice strain modulus or ice characteristic length However the coefficients of proportionality appear to depend upon the type of model ice used in the tests The ratios $S_{sub L}/A$ were independent of $\sigma \gamma h$ but varied with the bow shape and the type of ice The available field data are not sufficient for meaningful comparison with the laboratory results Author **Super Simple Ice Projects: Fun and Easy**

Crafts Inspired by Nature Kelly Doudna, 2014-01-01 Get really cool with Super Simple Ice Projects Kids will use ice to create a colorful garland a lovely lantern ornaments and more All of the projects are super simple and super fun Each project includes how to photos and easy instructions Nurture a young reader's natural side by checking out the rest of the Nature Crafts series too Aligned to Common Core Standards and correlated to state standards Super Sandcastle is an imprint of
