Simulating The Evolution Of Language:

Simulating the Evolution of Language Angelo Cangelosi, Domenico Parisi, 2012-12-06 This book is the first to provide a comprehensive survey of the computational models and methodologies used for studying the evolution and origin of language and communication. Comprising contributions from the most influential figures in the field, it presents and summarises the state of the art in computational approaches to language evolution and highlights new lines of development. Essential reading for researchers and students in the fields of evolutionary and adaptive systems, language evolution, modelling and linguistics, it will also be of interest to researchers working on applications of neural networks to language problems. Furthermore, due to the fact that language evolution models use multi-agent methodologies, it will also be of great interest to computer scientists working on multi-agent systems, robotics and internet agents. *The Evolution of Language* Angelo Cangelosi, Andrew D. M. Smith, Kenny Smith, 2006 This volume comprises refereed papers and abstracts from the 6th International Conference on the Evolution of Language (EVLANG6). The biennial EVLANG conference focuses on the origins and evolution of human language and brings together researchers from many disciplines including anthropology, archaeology, artificial life, biology, cognitive science, computer science, ethology, genetics, linguistics, neuroscience, palaeontology, primatology and psychology. The collection presents the latest theoretical, experimental and modeling research on language evolution and includes contributions from the leading scientists in the field, including T. Fitch, V. Gallese, S. Mithen, D. Parisi, A. Piazza, L. Cavalli-Sforza, R. Seyfarth, D. Cheney, L. Steels, L. Talmy and M. Tomasello. *Evolution Of Language, The - Proceedings Of The 10th International Conference (Evolang X)* Erica A. Cartmill, Sean Roberts, Heidi Lyn, Hannah Cornish, 2014-04-04 This volume comprises refereed papers and abstracts of the 10th International Conference on the Evolution of Language (EVLANGX) held in Vienna on 14-17th April 2014. As the leading international conference in the field, the biennial EVLANG meeting is characterised by an invigorating multidisciplinary approach to the origins and evolution of human language and brings together researchers from many subject areas including anthropology, archaeology, biology, cognitive science, computer science, genetics, linguistics, neuroscience, palaeontology, primatology and psychology. For this 10th conference, the proceedings will include a special perspectives section featuring prominent researchers reflecting on the history of the conference and its impact on the field of language evolution since the inaugural EVLANG conference in 1996. **Artificial Intelligence for Advanced Problem Solving Techniques** Vlahavas, Ioannis, Vrakas, Dimitris, 2008-01-31 One of the most important functions of artificial intelligence automated problem solving consists mainly of the development of software systems designed to find solutions to problems. These systems utilize a search space and algorithms in order to reach a solution. Artificial Intelligence for Advanced Problem Solving Techniques offers scholars and practitioners cutting-edge research on algorithms and techniques such as search domain independent heuristics, scheduling, constraint satisfaction, optimization, configuration and planning, and highlights the relationship between the search categories and the various ways

a specific application can be modeled and solved using advanced problem solving techniques

Emergence of Communication and Language Caroline Lyon, Chrystopher L. Nehaniv, Angelo Cangelosi, 2010-03-10 Current Work and Open Problems A Road Map for Research into the Emergence of Communication and Language Chrystopher L Nehaniv Caroline Lyon and Angelo Cangelosi 1 1 Introduction This book brings together work on the emergence of communication and language from researchers working in a broad array of scientific paradigms in North America Europe Japan and Africa We hope that its multi disciplinary approach will encourage cross fertilization and promote further advances in this active research field The volume draws on diverse disciplines including linguistics psychology neuroscience ethology anthropology robotics and computer science Computational simulations of the emergence of phenomena associated with communication and language play a key role in illuminating some of the most significant issues and the renewed scientific interest in language emergence has benefited greatly from research in Artificial Intelligence and Cognitive Science The book starts with this road map chapter by the editors pointing to the ways in which disparate disciplines can inform and stimulate each other It examines the role of simulations as a novel way to express theories in science and their contribution to the development of a new approach to the study of the emergence of

communication and language We will also discuss and collect the most promising directions and grand challenge problems for future research The present volume is organized into three parts I Empirical Investigations on Human Language II Synthesis and Simulation of Communication and Language in Artificial Systems and III Insights from Animal Communication
