Human Rights Ethics Clark Butler, 2008 Human Rights Ethics makes an important contribution to contemporary philosophical and political debates concerning the advancement of global justice and human rights Butler's book also lays claim to a significant place in both normative ethics and human rights studies in as much as it seeks to vindicate a universalistic rational approach to human rights ethics Butler's innovative approach is not based on murky claims to natural rights that supposedly hold wherever human beings exist nor does it succumb to the traditional problems of justification associated with utilitarianism Kantianism and other procedural approaches to human rights studies Instead Butler proposes a dialectical justification of human rights by indirect proof that claims not to be question begging Very much in the spirit of Hegel and Habermas Butler proposes to vindicate a totally rational account of human rights but one that depends concretely and historically on a dialectically constructed right to freedom of thought in its universal modes
