Walt Whitman Harold Bloom, 2009 Presents a critical analysis of some of the works of Walt Whitman including a short biography **Singing the Body Electric: The Human Voice and Sound Technology** Miriama Young, 2016-03-03 Singing the Body Electric explores the relationship between the human voice and technology offering startling insights into the ways in which technological mediation affects our understanding of the voice and more generally the human body From the phonograph to magnetic tape and now to digital sampling Miriama Young visits particular musical and literary works that define a century and a half of recorded sound She discusses the way in which the human voice is captured transformed or

synthesised through technology This includes the sampled voice the mechanical voice the technologically modified voice the pliable voice of the digital era and the phenomenon by which humans mimic the sounding traits of the machine The book draws from key electro vocal works spanning a range of genres from Luciano Berio's *Thema Omaggio a Joyce* to Radiohead from Alvin Lucier's *I Am Sitting in a Room* to Björk and from Pierre Henry's *Variations on a Door and a Sigh* to Christian Marclay's *Maria Callas* In essence this book transcends time and musical style to reflect on the way in which the machine transforms our experience of the voice The chapters are interpolated by conversations with five composers who work creatively with the voice and technology Trevor Wishart Katharine Norman Paul Lansky Eduardo Miranda and Bora Yoon This book is an interdisciplinary enterprise that combines music aesthetics and musical analysis with literature and philosophy
