Singing wires A. W. Cashman, 1974 *Historical Atlas of Canada: Addressing the twentieth century, 1891-1961* Geoffrey J. Matthews, 1987-01-01 Uses maps to illustrate the development of Canada from the last ice sheet to the end of the eighteenth century *The People's Network* Robert MacDougall, 2014-01-08 The Bell System dominated telecommunications in the United States and Canada for most of the twentieth century but its monopoly was not inevitable In the decades around 1900 ordinary citizens farmers doctors small town entrepreneurs established tens of thousands of independent telephone systems stringing their own wires to bring this new technology to the people Managed by opportunists and idealists alike these small businesses were motivated not only by profit but also by the promise of open communication as a weapon against monopoly capital and for protection of regional autonomy As the Bell empire grew independents fought fiercely to retain control of their local networks and companies a struggle with an emerging corporate giant that has been almost entirely forgotten The People's Network reconstructs the story of the telephone's contentious beginnings exploring the interplay of political economy business strategy and social practice in the creation of modern North American telecommunications Drawing from government documents in the United States and Canada independent telephone journals and publications and the archives of regional Bell operating companies and their rivals Robert MacDougall locates the national debates over the meaning use and organization of the telephone industry as a turning point in the history of information networks The competing businesses represented dueling political philosophies regional versus national identity and local versus centralized power Although independent telephone companies did not win their fight with big business they fundamentally changed the way telecommunications were conceived **Canadas of the Mind**, Invisible Empire Jean-Guy Rens, 2001 The Invisible Empire provides the first overview of Canadian telecommunications from the laying of the first telegraph line between Toronto and Hamilton in 1846 to the separation between Nortel then known as Northern Electric and the American Bell System in 1956 **America Calling** Claude S. Fischer, 2023-11-15 The telephone looms large in our lives as ever present in modern societies as cars and television Claude Fischer presents the first social history of this vital but little studied technology how we encountered tested and ultimately embraced it with enthusiasm Using telephone ads oral histories telephone industry correspondence and statistical data Fischer's work is a colorful exploration of how when and why Americans started communicating in this radically new manner Studying three California communities Fischer uncovers how the telephone became integrated into the private worlds and community activities of average Americans in the first decades of this century Women were especially avid in their use a phenomenon which the industry first vigorously discouraged and then later wholeheartedly promoted Again and again Fischer finds that the telephone supported a wide ranging network of social relations and played a crucial role in community life especially for women from organizing children's relationships and church activities to alleviating the loneliness and boredom of rural life Deftly written and meticulously

researched America Calling adds an important new chapter to the social history of our nation and illuminates a fundamental aspect of cultural modernism that is integral to contemporary life The telephone looms large in our lives as ever present in modern societies as cars and television Claude Fischer presents the first social history of this vital but little studied technology how we encountered tested and ultimately embraced it with en Telecommunications in Canada Robert E. Babe, Richard Collins, 1990-01-01 This study provides Canada's first comprehensive integrated treatment of the emergence and development of key communication sectors telegraph telephones cable TV broadcasting communication satellites and electronic publishing By focusing on real institutions actual and frequently predatory business practices and law and regulatory policies in both historical and contemporary perspectives Babe helps demystify current communication issues Stressing the flexibility of communication technologies on the one hand and the element of corporate power on the other Babe reintroduces the principle of corporate governmental responsibility for communication outcomes a principle that has been largely drowned out by the shrill cries of Information Revolution
