Handbook of Creativity John A. Glover,Royce R. Ronning,Cecil R. Reynolds,2013-03-09 The motivation underlying our development of a handbook of creativity was different from what usually is described by editors of other such volumes Our sense that a handbook was needed sprang not from a deluge of highly erudite studies calling out for organization nor did it stem from a belief that the field had become so fully articulated that such a book was necessary to provide summation and reference Instead this handbook was conceptualized as an attempt to provide structure and organization for a field of study that from our perspective had come to be a large scale example of a degenerating research program see Brown Chapter 1 The handbook grew out of a series of discussions that spanned several years At the heart of most of our interactions was a profound unhappiness with the state of research on creativity Our consensus was that the number of good works published on creativity each year was small and growing smaller Further we could not point to a journal text or professional organization that was providing leadership for the field in shaping a scientifically sound framework for the development of

research programs in creativity At the same time we were casting about for a means of honoring a dear friend E Paul Torrance Our decision was that we might best be able to honor Paul and influence research on creativity by developing a handbook designed to challenge traditional perspectives while offering research agendas based on contemporary psychological views International Handbook of Literacy and Technology Michael C. McKenna, Linda D. Labbo, Ronald D. Kieffer, David Reinking, 2013-01-11 This Handbook provides a comprehensive and international representation of state of the art research theory and practice related to principal areas in which significant developments are occurring in the study of literacy and technology It offers a glimpse of the commonalities faced by literacy educators around the world together with specific challenges raised by unique circumstances Volume I of this Handbook endeavored to lay essential groundwork for the study of literacy and technology it retains an explanatory value that will not weaken over time Volume II differs considerably in conception It assumes for the most part a higher level of expertise on the part of readers and the projects and applications described by the contributors are characterized by greater sophistication The scope of technology use is broader and the challenges that have emerged are in sharper focus A powerful feature of this volume is the addition of commentaries from experts across the field on the potential of technology in key dimensions of literacy The title of Volume II has changed slightly to reflect the inclusion of contributions on a broad geographic basis It is now a truly international Handbook with chapter authors from six countries and five continents The International Handbook of Literacy and Technology Volume II is organized in five sections The Role of Technology in the New Literacies Technology Applications with Specific Populations Literacy Software and the Internet Teacher Education and Professional Development and The Potential of Technology in Key Dimensions of Literacy The effects of technology on literate activity have been both sweeping and subtle marked by an increasing variety of changes that are difficult to evaluate and project Perhaps the only prediction that can be offered with certainty is that the impact of technology is irreversible Specific changes may come and go but literacy and technology seem inextricably linked This Handbook is dedicated to that linkage and to examining the intricacies that define it International Handbook of Literacy and Technology Volume II is an essential reference for researchers professionals and students in reading literacy education literacy and technology educational technology and related areas and will serve well as a text for upper level and graduate courses on these topics **Second Language Creative Writers** Yan (Niles) Zhao, 2015 This book elicits L2 creative writers own perspectives of their life histories through the form of interviews and think aloud story writing sessions and investigates the writers emerging writing processes It integrates socioculturalist L2 identity studies with the typically cognitivist process oriented L2 writing research Discourse, conversation and argumentation: Theoretical perspectives and innovative empirical studies, volume II Antonio Bova, Lise Haddouk, Carlo Galimberti, Francesco Arcidiacono, 2023-06-22
