Macro-quantitative Analysis John V. Gillespie, Betty A. Nesvold, 1971 **Democratization** Tatu Vanhanen, 2004-02-24

This book examines the relationship between indicators of resource distribution and democratization in the group of 170 countries with data ranging from the 1850s to the present day Vanhanen constructs a compelling argument concluding that the emergence of democracy is closely linked to resource distribution **Learning Democracy** Leslie E.

Anderson, Lawrence C. Dodd, 2009-11-15 Historically Nicaragua has been mired in poverty and political conflict yet the country has become a model for the successful emergence of democracy in a developing nation Learning Democracy tells the story of how Nicaragua overcame an authoritarian government and American interventionism by engaging in an electoral revolution that solidified its democratic self governance By analyzing nationwide surveys conducted during the 1990 1996 and 2001 Nicaraguan presidential elections Leslie E Anderson and Lawrence C Dodd provide insight into one of the most unexpected and intriguing recent advancements in third world politics They offer a balanced account of the voting patterns and forward thinking decisions that led Nicaraguans to first support the reformist Sandinista revolutionaries only to replace them with a conservative democratic regime a few years later Addressing issues largely unexamined in Latin American studies Learning Democracy is a unique and probing look at how the country's mass electorate moved beyond revolutionary struggle to establish a more stable democratic government by realizing the vital role of citizens in democratization processes

Political Violence, Crises and Revolutions (Routledge Revivals) Ekkart Zimmermann, 2013-04-15 First published in 1983 this extraordinary study provides a comprehensive systematic evaluation of cross national theorizing and quantitative empirical evidence on four interrelated phenomena Political violence Crises Military Coups D tat Revolutions Findings from social psychological

research on aggression are integrated in this outstanding study as well as results reported in social historical studies of revolution. The focus of the book is always on analytical perspectives and corresponding empirical evidence. The author continually highlights the sociostructural and political conditions of political violence crises and revolutions. This exceptionally detailed and systematic inventory of theories and research on a classic triad of political science: political violence crises and revolutions also includes a remarkable bibliography encompassing over 3000 items.

Power Kills R. J. Rummel, 2017-07-12. This volume newly published in paperback is part of a comprehensive effort by R. J. Rummel to understand and place in historical perspective the entire subject of genocide and mass murder or what he calls democide. It is the fifth in a series of volumes in which he offers a detailed analysis of the 120 000 000 people killed as a result of government action or direct intervention. In *Power Kills*, Rummel offers a realistic and practical solution to war, democide and other collective violence. As he states it: The solution is to foster democratic freedom and to democratize coercive power and force. That is mass killing and mass murder carried out by government is a result of indiscriminate irresponsible Power at the center. Rummel observes that well established democracies do not make war on and rarely commit lesser violence against each other. The more democratic two nations are the less likely is war or smaller scale violence between them. The more democratic a nation is the less severe its overall foreign violence the less likely it will have domestic collective violence and the less its democide. Rummel argues that the evidence supports overwhelmingly the most important fact of our time: democracy is a method of nonviolence.

Prospects of Democracy Tatu Vanhanen, 2002-11-01. This book provides the most extensive comparative survey of the state and conditions of democracy ever made. It focuses on 172 contemporary states with historical data on the measures of democracy and on explanatory variables extending back to the 1850s. It presents a comprehensive exploration of democratization: its successes and failures, making predictions on the prospects for democracy for single countries and for seven regions of the world. As well as presenting empirical analyses of democratization on the basis of Vanhanen's resource distribution theory of democratization and making predictions on the prospects, the book includes contributions from five commentators: Mitchell A. Seligson on Latin America, Samuel Decalo and John W. Forje on Africa, John Henderson on Oceania and Ilter Turan on why some of the countries that pass Vanhanen's democratic threshold cannot in fact be seen as democracies. The volume also includes an introductory chapter which examines and compares other theoretical interpretations of democratization. Prospects for Democracy will be essential reading for all serious students of comparative politics and democracy.
