Intermediate Macroeconomics highlights the need for an alternative framework to demonstrate the irrelevance of mainstream economic theory and its inability to provide satisfactory responses to the continuing challenges of modern economies. Topics covered include the role of commercial banks and the central bank, unemployment and inflation, fiscal policy, monetary policy, and worsening worldwide inequality. Key Features: Presents exam questions at the end of each chapter to highlight key learnings and direct further discussion. reconsidering the policy instruments and transmission mechanisms offered by the new classicals Its central question points to the real nature of new classical macroeconomics what consequences are grounded by the assumptions new classicals used Moreover issues raised by automatic fiscal stabilizers and fiscal reforms are analyzed as well even if they were out of the range of classical texts The book draws a picture of new classical macroeconomics stressing the analogies with Keynesian countercyclical policies instead of the discrepancies commonly held
