[Deadly Contradictions](#) Stephen P. Reyna, 2016-08-01 As US imperialism continues to dictate foreign policy Deadly Contradictions is a compelling account of the American empire Stephen P Reyna argues that contemporary forms of violence exercised by American elites in the colonies client state and regions of interest have deferred imperial problems but not without raising their own set of deadly contradictions This book can be read many ways as a polemic against geopolitics as a classic social anthropological text or as a seminal analysis of twenty four US global wars during the Cold War and post Cold War eras

[Human Rights and America's War on Terror](#) Satvinder S. Juss, 2018-10-25 This volume examines the success of the 9 11 attacks in undermining the cherished principles of Western democracy free speech and tolerance which were central to US values It is argued that this has led to the USA fighting disastrous wars in Afghanistan and Iraq and to sanctioning the use of torture and imprisonment without trial in Guant namo Bay extraordinary rendition surveillance and drone attacks At home it has resulted in restrictions of civil liberties and the growth of an ill affordable military and security apparatus In this collection the authors note the irony that the shocking destruction of the World Trade Center on 9 11 should become the justification for the relentless expansion of security agencies Yet this is a salutary illustration of how the security agencies in the USA have adopted faulty preconceptions which have become too embedded within the institution to be abandoned without loss of credibility and prestige The book presents a timely assessment of both the human rights costs of the war on terror and the methods used to wage and relentlessly continue that war It will be of interest to researchers academics practitioners and students in the fields of human rights law criminal justice criminology politics and international studies

Turpin,Lester R. Kurtz,1997 An excellent representation of the interdisciplinary thrust of peace studies Paul Joseph Tufts University Violence is a topic of concern everywhere in the media in churches in the halls of governments In every land and in every culture violence is considered by most to be taboo a last resort Yet under certain conditions from the level of the family to the level of nations violence is used as a mechanism of social control Various rationalizations thus emerge to distinguish between legitimate and illegitimate violence The Web of Violence explores the interrelationship among personal collective national and global levels of violence This unique collection brings together a number of internationally known contributors to address the genesis and manifestations of violence in the search for a remedy for this confounding social problem As the global community becomes more intimate we must better understand the nature of violence The Web of Violence supports this aim by examining the dangerous human phenomenon from many perspectives at different levels and using multiple methodologies
