

Mad Cow Disease

What is it?

Mad Cow Disease is a neurological disorder commonly found in adult cattle.

Causes

It occurs in cows and humans when they eat food contaminated by misfolded proteins called prions.

Symptoms

Affected cows and humans often experience impaired movement, coordination, and thinking.

Prevention

There is currently no vaccine for the disease, though humans can avoid it by not eating beef.

Mad Cows:

Mad Cows and Mother's Milk, Second Edition William Leiss, Douglas Alan Powell, 2004 The first case study deals with the mad cow fiasco of 1996 one of the most expensive and tragic examples of poor risk management in the last twenty five years For ten years the British government failed to acknowledge the possibility of a link between mad cow disease and Creutzfeldt Jakob disease the human equivalent until increased scientific evidence and public pressure forced them to take action resulting in the slaughter of more than one million cattle The second study looks at what is commonly known as hamburger disease caused by a virulent form of the E coli bacterium which has struck thousands and killed over thirty people in the last few years Despite its widespread effects it is unclear whether scientific knowledge on preventing the disease is reaching the public Other case studies include the use of a genetically engineered hormone to increase milk production in cows health risks associated with silicone breast implants public controversies surrounding dioxins and PCBs and the introduction of agricultural biotechnology These case studies show that institutions routinely fail to communicate the scientific basis of various high profile risks These failures to inform the public make it difficult for governments industry and society to manage risk controversies sensibly and often result in massive costs With its detailed analyses of specific risk management controversies **Mad Cows and Mother's Milk** will help us avoid future mistakes Mad Cow U.S.A. Sheldon Rampton, John Clyde Stauber, 1997 **Mad Cow U S A** shatters the false belief that the government and food industry would never let it happen here Even as tens of thousands of cows died in Britain the government denied the risk to human beings Knowing the similar risk in the U S government and industry have managed a successful public relations offensive to keep Americans in the dark Rampton and Stauber expose for the first time the deadly game of dementia roulette being played with our food supply **How the Cows Turned Mad** Maxime Schwartz, 2003-03-15 A gripping biological detective story that traces the history of mad cow disease and related infectious brain disease of livestock and people The book also illustrates dramatically how scientific progress unfolds as researchers in various countries pursue new ideas and leads in order to identify the cause of and relationship between these enigmatic diseases Mad Cow Disease Carmen Ferreiro, 2009 Explains mad cow disease what it is how it is passed from cows to humans and possible treatment options **Mad Cow Crisis** Scott Ratzan, 2005-08-05 The announcement that BSE might cause a fatal human disease Creutzfeldt Jacob disease CJD triggered enormous media attention public alarm and government wrangling that threatened the future of European integration As Scott Ratzan argues It is my belief that the BSE crisis represents a quintessential case that will go down in history as the Exxon Valdez Union Carbide's Bhopal accident and other such cases of interdisciplinary study This book offers lessons learned from the crisis with contributions from experts with different viewpoints veterinarians Eurocrats public relations experts politicians policy makers journalists and representatives of the beef industry It also offers a compilation of the key reports from governmental bodies as a case study in policy making scientific health discovery and dissemination of

information as well as looking at the issues from the perspective of psychology and media studies Mad Cow Crisis Scott Ratzan, 2005-08-05 The announcement that BSE might cause a fatal human disease Creutzfeldt Jacob disease CJD triggered enormous media attention public alarm and government wrangling that threatened the future of European integration As Scott Ratzan argues It is my belief that the BSE crisis represents a quintessential case that will go down in history as the Exxon Valdez Union Carbide's Bhopal accident and other such cases of interdisciplinary study This book offers lessons learned from the crisis with contributions from experts with different viewpoints veterinarians Eurocrats public relations experts politicians policy makers journalists and representatives of the beef industry It also offers a compilation of the key reports from governmental bodies as a case study in policy making scientific health discovery and dissemination of information as well as looking at the issues from the perspective of psychology and media studies Cowed: The Hidden Impact of 93 Million Cows on America's Health, Economy, Politics, Culture, and Environment Denis Hayes, Gail Boyer Hayes, 2015-03-09 From leading ecology advocates a revealing look at our dependence on cows and a passionate appeal for sustainable living In Cowed globally recognized environmentalists Denis and Gail Boyer Hayes offer a revealing analysis of how our beneficial centuries old relationship with bovines has evolved into one that now endangers us Long ago cows provided food and labor to settlers taming the wild frontier and helped the loggers ranchers and farmers who shaped the country's landscape Our society is built on the backs of bovines who indelibly stamped our culture politics and economics But our national herd has doubled in size over the past hundred years to 93 million with devastating consequences for the country's soil and water Our love affair with dairy and hamburgers doesn't help either eating one pound of beef produces a greater carbon footprint than burning a gallon of gasoline Denis and Gail Hayes begin their story by tracing the co evolution of cows and humans starting with majestic horned aurochs before taking us through the birth of today's feedlot farms and the threat of mad cow disease The authors show how cattle farming today has depleted America's largest aquifer created festering lagoons of animal waste and drastically increased methane production In their quest to find fresh solutions to our bovine problem the authors take us to farms across the country from Vermont to Washington They visit worm ranchers who compost cow waste learn that feeding cows oregano yields surprising benefits talk to sustainable farmers who care for their cows while contributing to their communities and point toward a future in which we eat less but better beef In a deeply researched engagingly personal narrative Denis and Gail Hayes provide a glimpse into what we can do now to provide a better future for cows humans and the world we inhabit They show how our relationship with cows is part of the story of America itself Science and Politics Brent S. Steel, 2014-04-21 Recent partisan squabbles over science in the news are indicative of a larger tendency for scientific research and practice to get entangled in major ideological divisions in the public arena This politicization of science is deepened by the key role government funding plays in scientific research and development the market leading position of U S based science and technology firms and controversial U S exports such as

genetically modified foods or hormone injected livestock This groundbreaking one volume A to Z reference features 120 150 entries that explore the nexus of politics and science both in the United States and in U S interactions with other nations The essays each by experts in their fields examine Health environmental and social cultural issues relating to science and politics Concerns relating to government regulation and its impact on the practice of science Key historical and contemporary events that have shaped our contemporary view of how science and politics intersect Science and Politics An A to Z Guide to Issues and Controversies is a must have resource for researchers and students who seek to deepen their understanding of the connection between science and politics

Born With a Junk Food Deficiency Martha Rosenberg,2012-04-10 This hard hitting expos blows the lid off of everything you thought you knew about Big Pharma and Big Food What goes on behind the scenes in these industries is more suspicious more devious more disreputable than you could have ever imagined Rosenberg s message is clear the pharmaceutical and agricultural industries are tainting public health through marketing disguised as medical education and research aggressive lobbying and high level conflicts of interest If you re concerned about the safety of the drugs you take and the food you eat you owe it to yourself to read this important book Having gained the trust of more than twenty doctors researchers and experts who were willing to come forward and finally tell all reporter and editorial cartoonist Rosenberg presents us with her shocking findings Explosive material from whistle blowers scientists unsealed lawsuits and Big Pharma s and Big Food s own marketers exposes how these industries put profits before public safety and how the government puts the interests of business before the welfare of consumers creating a double whammy that pimps the public health What Rosenberg reveals about government complicity regulatory food and drug safety lapses and legislative injustices will both shock and appall

Bioterrorism J. V. Borrelli,2007 A bioterrorism attack is the deliberate release of viruses bacteria or other germs agents used to cause illness or death in people animals or plants These agents are typically found in nature but it is possible that they could be changed to increase their ability to cause disease make them resistant to current medicines or to increase their ability to be spread into the environment Biological agents can be spread through the air through water or in food Terrorists may use biological agents because they can be extremely difficult to detect and do not cause illness for several hours to several days Some bioterrorism agents like the smallpox virus can be spread from person to person and some like anthrax can not This new book presents new analyses on the prevention of preparedness for and protection from

Emotional Terrors in the Workplace: Protecting Your Business' Bottom Line Vali Hawkins Mitchell,2004-11 Annotation Reasonable variations of human emotions are expected at the workplace People have feelings Emotions that accumulate collect force expand in volume and begin to spin are another matter entirely Spinning emotions

can become as unmanageable as a tornado and in the workplace they can cause just as much damage in terms of human distress and economic disruption All people have emotions Normal people and abnormal people have emotions Emotions happen at home and at work So understanding how individuals or groups respond emotionally in a business situation is important in order to have a complete perspective of human beings in a business function Different people have different sets of emotions Some people let emotions roll off their back like water off a duck Other people swallow emotions and hold them in until they become toxic waste that needs a disposal site Some have small simple feelings and others have large complicated emotions Stresses of life tickle our emotions or act as fuses in a time bomb Stress triggers emotion Extreme stress complicates the wide range of varying emotional responses Work is a stressor Sometimes work is an extreme stressor Since everyone has emotion it is important to know what kinds of emotion are regular and what kinds are irregular abnormal or damaging within the business environment To build a strong well grounded value added set of references for professional discussions and planning for Emotional Continuity Management a manager needs to know at least the basics about human emotion Advanced knowledge is preferable Emotional Continuity Management planning for emotions that come from the stress caused by changes inside business from small adjustments to catastrophic upheavals requires knowing emotional and humanity based needs and functions of people and not just technology and performance data Emergency and Disaster Continuity planners sometimes posit the questions What if during a disaster your computer is working but no one shows up to use it What if no one is working the computer because they are terrified to show up to a worksite devastated by an earthquake or bombing and they stay home to care for their children The Emotional Continuity Manager asks What if no one is coming or no one is producing even if they are at the site because they are grieving or anticipating the next wave of danger What happens if employees are engaged in emotional combat with another employee through gossip innuendo or out and out verbal warfare And what if the entire company is in turmoil because we have an Emotional Terrorist who is just driving everyone bonkers The answer is that in terms of bottom line thinking productivity is productivity and if your employees are not available because their emotions are not calibrated to your industry standards then fiscal risks must be considered Human compassion needs are important And so is money Employees today face the possibility of biological nuclear incendiary chemical explosive or electronic catastrophe while potentially working in the same cubicle with someone ready to suicide over personal issues at home They face rumors of downsizing and outsourcing while watching for anthrax amidst rumors that co workers are having affairs An employee coughs someone jokes nervously about SARS or teases a co worker about their hamburger coming from a Mad Cow someone laughs someone worries and productivity can falter as minds are not on tasks Emotions run rampant in human lives and therefore at work sites High demand emotions demonstrated by complicated workplace relationships time consuming divorce proceedings addiction behaviors violence illness and death are common issues at work sites which people either manage well or do not manage well Low demand emotions demonstrated by

annoyances petty bickering competition prejudice bias minor power struggles health variables politics and daily grind feelings take up mental space as well as emotional space It is reasonable to assume that dramatic effects from a terrorist attack natural disaster disgruntled employee shooting or natural death at the work site would create emotional content That content can be something that develops evolves and resolves or gathers speed and force like a tornado to become a spinning energy event with a life of its own Even smaller events such as a fully involved gossip chain or a computer upgrade can lead to the voluntary or involuntary exit of valuable employees This can add energy to an emotional spin and translate into real risk features such as time loss recruitment nightmares disruptions in customer service additional management hours remediations and trainings consultation fees Employee Assistance Program EAP dollars spent Human Resources HR time spent administrative restructuring and expensive and daunting litigations Companies that prepare for the full range of emotions and therefore emotional risks from annoyance to catastrophe are better equipped to adjust to any emotionally charged event small or large It is never a question of if something will happen to disrupt the flow of productivity it is only a question of when and how large Emotions that ebb and flow are functional in the workplace A healthy system should be able to manage the ups and downs of emotions Emotions directly affect the continuity of production and services customer and vendor relations and essential infrastructure Unstable emotional infrastructure in the workplace disrupts business through such measurable costs as medical and mental health care employee retention and retraining costs time loss or legal fees Emotional Continuity Management is reasonably simple for managers when they are provided the justifiable concepts empirical evidence that the risks are real a set of correct tools and instructions in their use What has not been easy until recently has been convincing the powers that be that it is value added work to deal directly and procedurally with emotions in the workplace Businesses haven't seen emotions as part of the working technology and have done everything they can do to avoid the topic Now cutting edge companies are turning the corner Even technology continuity managers are talking about human resources benefits and scrambling to find ways to evaluate feelings and risks Yes times are changing Making a case for policy to manage emotions is now getting easier For all the pain and horror associated with the terrorist attacks of September 11 2001 employers are getting the message that no one is immune to crisis In today's heightened security environments the demands of managing complex workplace emotions have increased beyond the normal training supplied by in house Human Resources HR professionals and Employee Assistance Plans EAPs Many extremely well meaning HR and EAP providers just do not have a necessary training to manage the complicated strata of extreme emotional responses Emotions at work today go well beyond the former standards of HR and EAP training HR and EAP providers now must have advanced trauma management training to be prepared to support employees The days of easy emotional management are over Life and work is much too complicated Significant emotions from small to extreme are no longer the sole domain of HR EAP or even emergency first responders and counselors Emotions are spinning in the very midst of your team project cubicle
