Thexton, 1994 **An Introduction to Economics for Canadian Readers** Duncan Alexander MacGibbon, 1917 **Canadian Books in Print. Author and Title Index**, 1975 **A History of Canadian Economic Thought** Robin Neill, 1991-06-06 In A History of Canadian Economic Thought Robin Neill relates the evolution of economic theory in Canada to the particular geographical and political features of the country Whilst there were distinctively Canadian economic discourses in nineteenth century Ontario and early twentieth century Quebec Neill argues that these have now been absorbed into the broader North American mainstream He also examines the nature and importance of the staple theory controversy and its appositeness for the Canadian case With full accounts of the work of major Canadian economists including John Rae H A Innis and Harry Johnson A History of Canadian Economic Thought is the first definitive treatment of the subject for 30 years [Economics for Canadian Trade Unionists](#) Sidney Ingerman, Labour College of Canada, 1985

[Essays in Canadian Economic History](#) Harold A. Innis, 2017-01-01 This volume collects Innis published and unpublished essays on economic history from 1929 to 1952 thereby charting the development of the arguments and ideas found in his books *The Fur Trade in Canada* and *The Cod Fisheries* **Canadian Economic History** M.H. Watkins, 2000-02-17 Contemporary methodologies include the cliometric style of historical analysis econometrics labour and regional study and the changing parameters of government spending and public finance The juxtaposition of classic theoretical statements with works by outsiders such as G S Kealey B D Palmer R T Naylor R E Ommer among others makes this a solid yet innovative record of the progress in economics over the last forty years Canadian Economic History remains an essential classroom text

Canadian Economic Forecasting Mervin Daub, 1987-11-01 Daub discusses both the rationale for the practice of forecasting and the methods commonly used and traces the history of aggregate economic forecasting in Canada examining the structure conduct and performance of the present forecasting industry particularly the nature of demand and supply pricing and promotion considerations and profits and efficiency He also examines factors which influence the accuracy of forecasts and reviews the record of Canadian forecasting In the last chapters Daub considers public policy aspects of economic forecasting Should forecasters be held liable for inaccurate forecasts Should they be subject to regulation He concludes by observing that the practice of forecasting is inextricably linked to our sense of time as is the very different exercise of time keeping with clocks or watches It is socially complex highly institutionalized and informed by the many and varied visions we carry of the world Through it we attempt to organize and shape our individual and collective futures Until uncertainty is eliminated from human affairs forecasting will continue to be a necessary social practice despite recurring

book upturns many established ideas regarding the economic and social history of Quebec the Canadian province that is home to the majority of its French population It places the case of Quebec into the wider question of convergence in economic history and whether proactive governments delay or halt convergence The period from 1945 to 1960 infamously labelled the Great Gloom Grande Noirceur was in fact a breaking point where the previous decades of relative decline were overturned Geloso argues that this era should be considered the Great Convergence Grand Rattrapage In opposition the Quiet Revolution that followed after 1960 did not accelerate these trends In fact there are signs of slowing down and relative decline that appear after the 1970s The author posits that the Quiet Revolution sowed the seeds for a growth slowdown by crowding out social capital and inciting rent seeking behaviour on the part of interest groups
