Meditation For Streb Release:

Therapeutic process and treatment evaluation in forensic psychiatry and prison Manuela Dudeck, Najat R. Khalifa, Jürgen Leo Müller, Birgit Angela Völm, Judith Streb, 2022-12-29 Stagecraft Fundamentals Rita Kogler Carver, 2012-09-10

Stagecraft Fundamentals Second Edition tackles every aspect of theatre production with Emmy Award winning author Rita Kogler Carver's signature witty and engaging voice. The history of stagecraft safety precautions, lighting, costumes, scenery, career planning tips and more are discussed, illustrated by beautiful color examples that display step by step procedures and the finished product. This second edition offers even more in demand information on stage management, drawing and drafting both by hand and CAD, lighting fixtures and special effects. Also new to this edition are current articles from *Lighting and Sound America*, brand new diagrams that illustrate hard to grasp concepts and a plethora of information on European conversions, standards and practices making the skills you learn applicable to stage jobs on either side of the ocean. The accompanying website www.stagecraftfundamentals.com is bursting with additional material such as an instructor's manual, exercises and study questions that coincide with chapters from the book, CAD drawings, color theory, manufacturing information and so much more to help you along the way as you learn all about the world of theatre production. Praise for the Book: Beautifully written. The author has succeeded in relaying technical theatre information without being too technical and putting the reader to sleep. I read three sentences and instantly knew this book was for me and the way I teach. When I think back on the insufferable intro to tech theatre books I had to read, I feel cheated I didn't have this one as a student. I will be using this text in my class. Rob Napoli, Designer and Technical Director at Penn State University Berks Campus. This text has tempted me to return to teaching with a textbook for the first time in seven years. The language is both accessible and informal yet the text goes a long way in debunking some of the typical jargon that may alienate students just getting into the field or trying it out for the first time. The illustrations, the text is full of them coupled with the stories reinforce the fundamental information being conveyed. John Paul Devlin, Associate Professor of Theatre at Saint Michael's College. What a great idea. Thank heavens someone is doing this for students at that impressionable age. That has been one of my mantras: education of teachers and students on the use of scenic materials. The teachers don't have enough time in college to learn and do everything they have to teach. Most get thrown into the theatre area by default and struggle with designing, building, painting the scenery. Jenny Knott, Rosco. Stagecraft Fundamentals is beautifully illustrated throughout and the profusion of color on every page gives this textbook the appearance of a coffee table book. The writing is clear and personal which should be very appealing to students. Rita Carver covers all aspects of theatre production from scenery to lighting to an actor's makeup. Her close ties to the New York theatre scene gives this book a special insight into the professional world, one that goes well beyond what is found in most college textbooks. John Holloway, Professor in the Theatre Department at the University of Kentucky and President of the International Association of Theatrical Stage Employees IATSE Local 346. I can't

thank you enough for Stagecraft Fundamentals I have been teaching stagecraft since 1976 and you have saved me from the nightmare of writing a text to suit my class needs After two semesters with your text I have found that I had more time to develop the skills necessary within the classroom than before The humor that you have infused in the book has enticed my students to read on That alone makes this text invaluable Meta Lasch Assistant Professor West Liberty University

The Materiality and Spatiality of Death, Burial and Commemoration Christoph Klaus Streb, Thomas

Kolnberger,2021-09-28 Death dying and burial produce artefacts and occur in spatial contexts The interplay between such materiality and the bereaved who commemorate the dead yields interpretations and creates meanings that can change over time Materiality is more than simple matter void of meaning or relevance The apparent inanimate has meaning It is charged with significance has symbolic and interpretative value perhaps a form of selfhood which originates from the interaction with the animate In our case gravestones bodily remains and the spatial order of the cemetery are explored for their material agency and relational constellations with human perceptions and actions Consciously and unconsciously by interacting with such materiality one is creating meaning while materiality retroactively provides a form of agency Spatiality provides more than a mere context it permits and shapes such interaction Thus artefacts mementos and memorials are exteriorised materialised and spatialized forms of human activity they can be understood as cultural forms the function of which is to sustain social life However they are also the medium through which values ideas and criteria of social distinction are reproduced legitimised or transformed This book will explore this interplay by going beyond the consideration of simple grave artefacts on the one hand and graveyards as a space on the other hand to examine the specific interrelationships between materiality spatiality the living and the dead The chapters in this book were originally published as a special issue of the journal Mortality

How to Land Ann Cooper Albright,2018-11-16 How to Land Finding Ground in an Unstable World foregrounds the importance of embodiment as a means of surviving the disorientation of our twenty first century world Linking somatics and politics author Ann Cooper Albright argues that a renewed attention to gravity as both a metaphoric sensibility and a physical experience can help transform moments of personal disorientation into an opportunity to reflect on the important relationship between individual resiliency and communal responsibility Long one of the nation s preeminent thinkers in dance studies Albright asks how contemporary bodies are affected by repeated images of falling bodies bombed out buildings and displaced peoples as well as recurring evocations of global economies and governments in discursive free fall or dissolution What kind of fear gets lodged in connective tissue when there is an underlying anxiety that certain aspects of our world are in danger of falling apart To answer this question she draws on analyses of perception from cognitive studies tracing the discussions of meaning body and language through the work of Sara Ahmed Jean Luc Nancy and Shaun Gallagher among others In addition she follows the past decade of debate in contemporary media concerning the implications of the weightless and two dimensional social media exchanges on structures of attention and learning as well as their effect on the personal growth and socialization of a generation of young adults Each chapter interweaves discussions of movement actions with their cultural implications documenting specific bodily experiences and then tracing their ideological ripples out through the world
