reserving the more scientific portions for the Compendium of Generic Distinctions at the end of the volume Much pains has been taken with that part of the work for which I am in a great degree indebted to the invaluable Genera of Birds by Dr Gray a work which has long established itself as the standard of systematic Ornithology as at present accepted by the learned world The system employed and the names that are given 111 this work are those which have been sanctioned by the usage of the national collection in the British Museum and any one who wishes to study the Birds in a systematic manner can accomplish his object by taking this volume to the Museum and comparing the specimens with the history of the species in the body of the work and the characteristic distinctions of the genera at its end By means of this Table also any one can ascertain the approximate position which any bird holds in the system of the present day About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
