Foundation the Smithsonian Institution the Office of Science and Technology Policy the Office of Management and Budget and the intelligence community NSTC 1997 The USGCRP s research program is described in detail in Our Changing Planet NSTC 1997 1999 In brief the program focuses on four major areas of earth system science 1 Seasonal to interannual climate variability 2 Climate change over decades to centuries 3 Changes in ozone ultraviolet UV radiation and atmospheric chemistry and 4 Changes in land cover and in terrestrial and aquatic ecosystems The fourth topic is the area in which advice was requested from the ecosystems panel The Ecosystems Panel s charge has three parts to provide a forum for the discussion of questions of ecosystem science of interest to scientists in and out of the federal agencies to periodically review the ecosystem aspects of the USGCRP s research program and to help identify general areas of ecosystem science that need additional attention especially areas that cut across ecosystems and levels of ecological organization In addressing the second item of its charge for this report the panel first identified the most significant and challenging areas in ecosystem science then used that identification as a basis to make recommendations to the USGCRP Thus this report is not a detailed review of the USGCRP s program but rather an attempt to identify those areas that the panel concludes are most in need of attention by a general research program on global change As noted in this report some of those areas are already receiving attention by the USGCRP
