Educational Philosophy in the French Enlightenment Natasha Gill, 2016-04-29 Though Emile is still considered the central pedagogical text of the French Enlightenment a myriad of lesser known thinkers paved the way for Rousseau's masterpiece Natasha Gill traces the arc of these thinkers as they sought to reveal the correlation between early childhood experiences and the success or failure of social and political relations and set the terms for the modern debate about the influence of nature and nurture in individual growth and collective life Gill offers a comprehensive analysis of the rich cross fertilization between educational and philosophical thought in the French Enlightenment She begins by showing how in *Some Thoughts Concerning Education* John Locke set the stage for the French debate by transposing key themes from his

philosophy into an educational context Her treatment of the abb Claude Fleury the rector of the University of Paris Charles Rollin and Swiss educator Jean Pierre de Crousaz illustrates the extent to which early Enlightenment theorists reevaluated childhood and learning methods on the basis of sensationist psychology Etienne Gabriel Morelly usually studied as a marginal thinker in the history of utopian thought is here revealed as the most important precursor to Rousseau and the first theorist to claim education as the vehicle through which individual liberation social harmony and political unity could be achieved Gill concludes with an analysis of the educational philosophical dispute between Helv tius and Rousseau and traces the influence of pedagogical theory on the political debate surrounding the expulsion of the Jesuits in 1762 **Values and Psychiatric**

Constructions and Experiences of Madness Monika dos Santos,Jean-Francois Pelletier,2018-02-01 Over the course of the centuries the meanings around mental illness have shifted many times according to societal beliefs and the political atmosphere of the day The way madness is defined has far reaching effects on those who have a mental disorder and determines how they are treated by the professionals responsible for their care and the society of which they are a part Although madness as mental illness seems to be the dominant Western view of madness it is by no means the only view of what it means to be mad The symptoms of madness or mental illness occur in all cultures of the world but have different meanings in different social and cultural contexts Evidence suggests that meanings of mental illness have a significant impact on subjective experience the idioms used in the expression thereof indigenous treatments and subsequent outcomes

Thus the societal understandings of madness are central to the problem of mental illness and those with the lived experience can lead the process of reconstructing this meaning
