The Experience of Science I.F. Goldstein, M. Goldstein, 2013-06-29 Our earlier book How We Know An Exploration of the Scientific Process was written to give some conception of what the scientific approach is like how to recognize it how to distinguish it from other approaches to understanding the world and to give some feeling for the intellectual excitement and aesthetic satisfactions of science These goals represented our concept of the term scientific literacy Though the book was written for the general reader to our surprise and gratification it was also used as a text in about forty colleges and some high schools for courses in science for the non scientist in methodology of science for social and behavioral sciences and in the philosophy of science As a result we were encouraged to write a textbook with essentially the same purpose and basic approach but at a level appropriate to college students We have drawn up problems for those chapters that would benefit from them described laboratory experiments that illustrate important points discussed in the text and made suggestions for additional readings term papers and other projects Throughout the book we have introduced a number of chapters and appendices that provide examples of the uses of quantitative thinking in the sciences logic mathematics probability statistics and graphical representation

Logic and African Philosophy Jonathan O. Chimakonam, 2020-10-06 Logic and African Philosophy Seminal Essays on African Systems of Thought aims to put African intellectual history in perspective with focus on the subjects of racism logic language and psychology The volume seeks to fill in the gaps left by the exclusion of African thinkers that are frequent in the curricula of African schools concerning history sociology philosophy and cultural studies The book is divided into four parts that are preceded by an introduction to link up the essays and emphasise their sociological

implications Part one is comprised of essays that opened the controversy of whether logic can be found in traditional African cultures as well as other matters like the nature of the mind and behaviour of African peoples The essays in part two are centred on the following question are the laws of thought present in African languages and cultures Part three brings together essays that sparkle the debate on whether there can be such a thing as African logic which stems from the discussions in part two Part four is concerned on the theme of system building in logic contributions are written by members of the budding African philosophy movement called the Conversational School of Philosophy based at the University of Calabar and the main objective of their papers is to formulate systems of African logic Motherland Luke

Pepera,2025-06-03 A groundbreaking exploration of 500 000 years of African history cultures and identity Historian archaeologist and anthropologist Luke Pepera takes us on a personal journey discovering 500 000 years of African history and cultures in order to reclaim and reconnect with this extraordinary heritage He tackles the question many people of African descent ask Who are we Where do we come from What defines us And it explores how knowledge of this deeper history might affect current understandings of African identity Through thematically linked chapters that explore aspects of African identity from nomadic culture and matriarchal society to beliefs about the afterlife and the tradition of oral storytelling and interwoven with Luke s own experiences of exploring his Ghanaian family history and his personal questions of identity this is a comprehensive relevant and beautifully told new history of Africa and how it has shaped the world we know today *Witchcraft, Oracles, and Magic Among the Azande* Edward Evan Evans-Pritchard,Eva Gillies,1976 *Witchcraft Oracles and Magic among the Azande* first published in 1977 was based on anthropological reseaches carried out in the Southern Sudan during the late 1920s For a decade of so the book had little discernable impact but from the early 1950s to present day its influence has grown incalculably so that it is now difficult even to discuss beliefs about witchcraft or sorcery without reference to it This abridgement of E E Evans Pritchard s acknowledged masterpiece is intended to make it more accessible to students and the general reader
