Polands Transformation:

Poland's Transformation Bjorn Kurten, 2017-07-12 Poland has carried out two peaceful revolutions in the span of one generation first the self limiting movement of Solidarity which undermined the legitimacy of Communism and then a negotiated transfer of power from Communism to free market democracy Today while Poland is seen as a success story and is joining political and economic associations in the democratic West Poles themselves seem downcast They ask is social anomie a price worth paying for a successful transformation In making moral compromises with an outgoing tyranny can one avoid cynicism and disappointment with democracy Zbigniew Brzezinski professor of American Foreign Policy at Johns Hopkins University has called Polish Transformation a work that provides a comprehensive as well as incisive overview of the extraordinary difficult and historically unprecedented process of transforming an increasingly corrupt and decayed totalitarian system into a modern democracy John Lenczowski director of the Institute of World Politics adds that this extremely useful volume explains the essential elements of the post communist political transition in Poland Its authors convey the cultural and ideological underpinnings that can be captured only by authorities who have developed over a lifetime that special sixth sense for detecting the elusive and unquantifiable soul of a country Radek Sikorski the executive director of the New Atlantic Initiative at the American Enterprise Institute writes that we should be grateful to the authors and editors of this thoughtful volume for asking questions which remain relevant for that uncomfortably large part of humanity that still lives under totalitarian or authoritarian regimes

humanity that still lives under totalitarian or authoritarian regimes Marek Jan Chodakiewicz holds the Kosciuszko chair in Polish Studies at the Miller Center of Public Affairs at the University of Virginia He is the author of *After the Holocaust Polish Jewish Conflict in the Wake of World War II and Between Nazis and Soviets A Case Study of Occupation Politics in Politics 1939 1947* John Radzilowski is author and editor of numerous works ranging from Polish to East European history Dariusz Tolczyk is associate professor of Slavic Languages at the University of Virginia He is the author of *See No Evil Literary Cover Ups and Discoveries of the Soviet Camp Experience* **The Political Economy of Poland's Transition** John E.

Jackson, Jacek Klich, Krystyna Poznanska, 2005-06-06 In the time span of a two term US presidency Poland went from an authoritarian one party state with a faltering centrally planned economy to become a relatively stable multiparty democracy and a market economy with one of the highest GDP growth rates in Europe A central feature of these economic and political reforms is a high rate of entry of new domestically owned firms This book uses detailed economic and political data to examine how these new firms contributed to the Polish transition The authors test propositions about why some regions have more new firms than others and how the success of these new firms contributed to political constituencies that supported economically liberal parties The book concludes by contrasting the Polish with the experiences of other transitional countries

Three Decades of Polish Socio-Economic Transformations Paweł Churski, Tomasz Kaczmarek, 2022-08-27 This edited volume analyses and discusses the systematisation of Polish socio economic transformations of the last three decades using selected examples of the most important changes 1989 marked the onset of the political transformation process in Poland and other countries of Central and Eastern Europe The transition involved a shift from a socialist system to a parliamentary democracy and from a command economy to a market one Due to the deep economic crisis that culminated in 1988 and the peaceful model of change developed and implemented in Poland the magnitude and manner of implementing various initiatives was unprecedented and had specific implications This transformation opened Polish society and the Polish economy to the impact of global social and economic changes triggering successive transformations often overlapping in terms of their causes and consequences This publication aims to present the course and effects in particular territorial of Poland's socio economic transformation in the years 1990 2020 The analysis covers the key aspects of this transformation illustrated with references to the concepts and theories of development domestic and foreign literature own empirical research and existing or newly developed model approaches to transformation in the territorial dimension The book appeals to researchers and student in the fields of geography spatial management economics and business sociology and political sciences public and private economic research institutes employees of governmental bodies and corporations consultants in public administration journalists and policymakers Global Long-term Economic Growth and the Economic Transformation of Poland and Eastern Europe Stanisław Gomułka, 2023 One of the characteristic facts concerning the catching up countries is the exceptionally large variation in their per capita annual rate of growth from about zero to about 10% The papers

published in this monograph show that this rate is strongly dependent on the rate of investment the quality of the labour force and the quality of institutions The rate of investment is in turn dependent on the rate of domestic savings In Poland domestic savings are shown to have been and continue to be very low by international standards The trend rate of growth of about 3.7% has been about 2 pp higher than that of the most developed economies mainly thanks to the development of modern market institutions and a new private sector and partly thanks to foreign direct investments and a significant inflow of finance from the European Union EU The data also show that by far the least successful transformation in Eastern Europe has taken place in Ukraine Author's Introduction Our discussion is limited to the Technology Frontier Area TFA of the world The central question is how the area's innovation rate changes over time in the course of centuries The analysis indicates that the pattern of change of the innovation rate over time may be eventually hat shaped This Hat Shape Relationship is an empirical law that is given a theoretical interpretation It is in part a prediction based on the author's model of innovation and growth Its acceleration and steady growth segments correspond well to the past reality Its slowdown part is the central thesis of the book

Poland's Protracted Transition Kazimierz Poznański, 1996 This book first published in 1997 offers an integrated study of institutional change in the Polish economy since 1971

The Polish Transformation Grzegorz Konat, 2024-03-18 The book takes an in depth look at a hitherto unexplored part of the oeuvre of prominent Polish economist and historian of economic thought Tadeusz Kowalik his thesis that the systemic transformation that took place in Poland in the late 1980s was a de facto epigonic bourgeois revolution Since Kowalik actually never extended his argument to support this thesis the aim of the book is to answer the following question If some important reflections on the revolutionary character of the Polish transformation scattered throughout Kowalik's works were to be found would they together constitute a convincing justification for the thesis of the epigonic bourgeois revolution

Trade and Transition Alasdair MacBean, 2014-05-12 Export promotion covers various fiscal commercial and exchange rate measures that governments can take to ensure some neutrality when comparing domestic and export markets These essays discuss export promotion and its pros and cons
