Police Confidential:

Conflict of Interest in Policing Cindy Davids, 2008 Conflict of interest allegations have become a prominent part of the landscape of political and public sector ethics in Australia and overseas The arena of policing has not been immune from this problem and this book is based on unique and unfettered access to ten years of internal investigation files held by Victoria Police Through detailed analysis of actual complaint cases it gives the reader a comprehensive map by which to chart the particular kinds of interests involved the nature of conflicts with official police duties and the particular contexts from which conflicts of interest emerge The book examines conflicts of interest across the private and public realm of the everyday lives of police officers The author outlines how the problem of conflict of interest is an important aspect of police ethics arguing that recognition of and accountability for conflict of interest may be a significant element in preventing upstream police misconduct and corruption Conflict of Interest in Policing seeks to provide a conceptual and practical understanding of how integrity and trust must be integrated into the profession of policing through processes of active responsibility rather than more traditional passive obedience to prescriptive rules Confidential Informants Jon Shane, 2015-09-19 While confidential informants CI s can play a crucial role in police investigations they also have the potential to cause great harm if they are dishonest The process by which police agencies qualify a CI to work and the strength of agency policy may be the source of the problem This Brief examines the integrity problem involving CIs in police operations within the United States provides an overview of pitfalls and problems related to veracity and informant integrity including the difficulties in detecting when a CI is lying and compares the provisions of actual published police policy to the model CI policy published by the International Association of Chiefs of Police IACP The analysis shows a wide divergence between actual police policy and the national standard promulgated by the IACP The Brief provides policy recommendations for improving use of CIs that can potentially reduce or eliminate integrity problems that can lead to organizational accidents such as wrongful arrests and convictions injuries or deaths Some Courts have issued measures to ensure that information received from CIs is reliable by examining sworn testimony and documents related to their work However as this Brief explores this judicial effort arises only after a police operation has taken place and the use of force even deadly force has already been employed The author proposes integrity testing beforehand which would allow police to have a greater understanding of a CI s motivation ability and veracity when conducting law enforcement operations In addition there are aspects of police policy that can enhance CI management such as training supervision and entrapment that can further guard against integrity problems Although integrity testing is not flawless it does interpose an additional step in the CI management process that can help guard against wrongful conviction and perjury that harms the judicial process *Peace without Politics? Ten Years of State-Building in Bosnia* David Chandler, 2013-09-13 Ten years on from the signing of the Dayton Peace Agreement in November 1995 the legacy of the Bosnian war still shapes every aspect of the political social and economic environment of the tiny state This

state of affairs is highlighted by the fact that Bosnia is still under international control with the Office of the International High Representative regularly using its powers to dismiss elected presidents prime ministers and MPs and to impose legislation over the resistance of elected legislatures at national regional and local level What has changed in the ten years since Dayton Is international regulation helping to establish a sustainable peace in Bosnia What lessons can be learned for nation building in Bosnia This volume was previously published as a special issue of the leading journal International Peacekeeping Policing's Problems in the Twenty-First Century Tom Barker,2024-09-09 Based on personal experience and academic research Tom Barker shines a light on the dark side of American policing by examining misconduct and corruption as occupational and workplace forms of deviance Barker outlines patterns of rule breaking and criminal behavior while providing strategies for management and control This textbook is appropriate for undergraduate and graduate courses in criminal justice criminology justice studies sociology and public administration California.
