policing courses Un-peeling Tradition Keith Bryett, Colleen Lewis, 1994 This text pursues the relevance of current policing techniques to Australian society and its future development It also considers the inherent resistance of the police to change The various issues addressed are divided into five broad themes the crime problem contemporary issues managing the police police and society and police and politics It relies on an interdisciplinary approach to the topics covered and introduces the reader to some of the most urgent controversial and perplexing questions in modern policing Includes references and an index Symbolic Communication Peter K. Manning, 1988 This first major empirical work on the semiotics of social action goes a long way toward answering substantive theoretical and pragmatic questions on how codes actually operate in a specific social setting It underscores the important yet often ignored role of the police as sign or information workers Calls to the police represent a rich variety of human troubles concerns and needs by focusing on how police handle calls from the public how they ascertain what a call means and what should be done with it and how this is transformed through subsystems within the organization Peter Manning provides a novel way of looking at organizational communication Symbolic Communication provides examples of how members of an organization interpret their environment in this instance how the meaning of a call to the police is transformed as it moves across the boundaries of the organization a transformation that involves a series of codings and recodings ensuring a continuous loose linkage of organization and environment Manning shows why the police act in ways that differ from the way citizens and politicians would have them act revealing the uncertainties that surround a policy agency's responsiveness And he points out how today's computer technologies constrain the coding process limiting in particular the effectiveness of the 911 systems used in most of our major cities Peter K Manning is a Professor of Psychiatry and of Sociology at Michigan State University and a member of the Centre for Socio Legal Studies at Oxford Symbolic Communication brings to fruition themes and ideas introduced in his previous books Police Work and The Narc's Game Symbolic Communication is included in the Organization Studies series edited by John van Maanen
